YOUR DATE OF BIRTH AND CHARACTERISTICS

INDEPENDENT NUMBERS: 1—9

Date of birth: 1st of the month (independent number)

Number 1 basically is the first in a row of numerals—from 1 to 9. So let us take this number as the leader of the house. People born under the influence of number 1 are highly creative. They have the outstanding individual character based on their own views and have most inventive nature. The combination of all the above mentioned characteristics makes number 1 the leader and brings dictatorship in their character. Another very strong characteristic for which they are known is determination. All the above mentioned characteristics develop gradually, but during childhood they are most stubborn and will not agree till the things will be done for which they have taken a stand.

They are highly ambitious. They dislike restraint. They mostly occupy the top position in their life, provided the lines on the palm are in consonance with the numerological analysis. They are mostly very independent of their subordinates.

Bad Aspects

As all the above mentioned good qualities make the individual position strong, will-power encourages them not to withdraw under any circumstances. Moreover they succeed in achieving the goal. During the course of life they make lot of opposition and enemies and they should be ready to face the consequences of their own created problems.

Opinion and Suggestions

As far as the numerological analysis are concerned, I fully agree that it is the fine number to have and ideal house to possess but it is only their individual capacity that is concerned. The people related to them should be of very understanding nature, as such these people are not bad at heart. But they have loose tongue by nature. Another point which I have observed is that

the people of this number are mostly tense and because of this temperament they become the victims of high blood pressure.

Favourable days: Sunday and Monday.

Lucky colours: Golden and light yellow.

Date of birth: 2nd of the month (independent number)

The number 2 is opposite in character to number 1. Number 2 is female in nature. Number 2 is gentle, imaginative, and full of thoughts, artistic in views, romantic, but of imaginative kind. Where as romance is concerned they are more inclined towards mental satisfaction, than physical pleasure.

They are highly inventive, but lack the ability to carry out their own plans and thoughts as they are more active mentally than physically. They are not strong physically.

Bad Aspects

They must guard against being restless. Being imaginative they are more inclined towards pessimism. As they lack the capacity to give a practical shape to plans and ideas, it only brings frustration to them with delay in achievements. Ultimately they lose self confidence, and become over-sensitive. They become highly depressed if they are not in happy surroundings.

Opinion and Suggestions

According to my opinion its a very delicate number and has to be dealt with most care and caution. The people with this number suffer if they don't have a logical approach to their behaviour and thinking. On the whole, they, being highly sensitive are the sufferers of mental torture. If the possessors of this number are not logical then they are the sufferers of worst problems like mental depression and nervous breakdown. They must live in a happy surrounding so that their views and thoughts do not take a pessimistic turn. According to my reading they must adopt artistic type of hobbies so that they keep their powerful mind and brain occupied and pass their time in comfortable manner, moreover the people born under this number have an artistic touch in their life,

and they need to develop this gift so that they may be able to save themselves from the downfalls.

Favourable days: Monday and Friday.

Lucky colours: Green and white.

Date of birth: 3rd of the month (independent number)

Number 3 like number 1 is a bold number. Possessors of this number are always highly ambitious and they are never satisfied on lower or subordinate position. They love to rise, and have control and authority over others. They are great commanders too. They love discipline in all matters. They are very forceful in carrying out their plans and objectives. They obey and make others obey them.

The people born under this number are mostly in service. If by chance their services are in armed forces, as the commanders, they fight the battle till the last drop of blood in them. Number 3 people never surrender at any stage. They have vigour, vitality and stamina to support, their character qualifies as a leader. As a good leader they carry out their duties in an extremely remarkable manner. If they are in civil services they believe in discipline of highest kind while performing their duties.

In business this number is an ideal number, provided alongwith discipline they have diplomatic qualities also.

Bad Aspects

The fault in number 3 is that they have dictatorial nature. They make their own law and enforce their own rules, plans and ideas to be executed. While doing so they create opposition and enemies. In spite of the fact that they are not quarrelsome they make lot of rivals who create problems in their way. They have short temperament and prudish nature. They do not accept any kind of obligations from others.

Opinion and Suggestions

According to my observation number 3 shows both good prospects and bad signs. It is a very good number if the possessor has got logical view, and deals in a most diplomatic way. By doing so the possessor of number 3 achieves high positions

and creates no problems for his or her objectives as the possessor has a fine quality of putting the best efforts and is most practical in his or her views. Since the Mars is a dominating planet which gives strength and stamina, it also makes them short tempered which creates problems in life.

The second biggest fault according to my opinion is that sometimes they are over ambitious for things which they cannot achieve in most cases. If they learn the lesson and control their ambitions they may achieve success. To be a dictator in life, is also not desirable, and for this reason they should be thoughtful and tactful.

Favourable days: Thursday is the most important and lucky day. Friday and Tuesday are also favourable days.

Lucky colour: Purple.

Date of birth: 4th of the month (independent number)

Dear readers, I have observed very closely the characteristics of this number during my life time devoted in this line, and found that this is not an ordinary number, but has a special significance because of its pessimistic nature. The possessor of this number quarrels rarely, even then they have many unknown enemies. Because of this they face problems in their lives. They become extremely pessimistic and sensitive. The possessor is one among intellectual kind and during childhood and student years, he is brilliant. He has remarkable observation and knowledge to pick up the things in most efficient manner. They seldom betray emotional attachments. Their love and affection is ever lasting. It is the most trustworthy number to depend upon. They are liberal in spending money, and at times are spendthrift.

Bad Aspects

In spite of the above mentioned good qualities the possessor of this number is mostly the sufferer because of his own nature. They are highly pessimistic and they view everything from the opposite side. As a result of this they lose good opportunities and good people in life as well. Because of pessimistic nature, they become jealous and short tempered, which affects their health and the subject mostly remains tense. Therefore, they

become victim of severe headache, mental tension, and if by chance they possess an imaginative type of hand, they are prone to get nervous breakdown as well.

Opinion and Suggestions

According to my opinion the possessor of this number is not meant for materialistic world, they are affectionate and in return they are betrayed. People in close contact with this number are highly benefited. It is sad to say that the experiences make a possessor of this number pessimistic, highly tense, and brings jealous instinct. Therefore, they suffer oddly and badly. By experiences and pessimistic thinking they live and lose opportunities in life. As a result they further suffer mentally, and live a life of frustration. You cannot change the nature of this number as they are mentally strong. The only way to lead a normal life is self realization by which they become normal from being abnormal.

Favourable days: Saturday and Sunday.

Lucky colours: Light blue and grey.

Date of birth: 5th of the month (independent number)

Number 5 stands for Mercury, which is the house of business. Number 5 people are most frank in nature, and they get along well with the people who are happy go-lucky type. The possessor of this number is quick in thoughts, and they are equally quick to take decisions and actions. This number gets easily excited. The possessor of this number has remarkable sense to make quick money. They are highly inventive, full of new ideas and schemes. As the temptation is for money, and that too making in a quick manner, they easily get into speculation, gambling, stock exchange, quick transaction etc. They are mostly ready to make money in quick manner. The possessor of this number is adaptable to any kind of society, and they adjust and accommodate themselves so well as if they are born for that society. Another quality is that they get easily cured from the heaviest blow of fate and misfortune. They are born extremists and nothing can stop them if they don't realise themselves.

Bad Aspects

Number 5 people have lot of bad signs, which play a vital role in their life, and if by chance they are under a spell of misfortune, they become the first people to live on the roadsides. As they get easily excited and tempted to make easy money, they put everything on the stake to become rich in one stroke. If the luck is against them, they lose even the last penny. In spite of the fact that their life is full of ups and downs they still don't earn and learn the lessons of the past, and keep on making blunders. Another biggest fault is that they become easily excited and they get nervous tensions and if by chance they are not the people of logic, they might get nervous breakdown of worst kind. They are temperamental.

Opinion and Suggestions

Number 5 is fatalistic, and luck plays a vital role in their life. They must deal and enter a life of logical aspects, so that they think and calculate and review before taking any action. If they add this quality to their nature they become the possessor of qualities that will prevent them entering a life of poverty. If by chance they have criminal tendency, they tend to become criminals of worst kind for the sake of money, and because of this reason they will spare none. Even the blood relations in that case should be scared and careful as chances of sparing them by number 5 people are not missed.

Favourable days: Wednesday and Friday.

Lucky colours: White and light grey.

Note

People born under number 5, should never wear gold ornaments, as the metal of gold and touch of this metal is highly injurious to the body. They can wear silver and platinum or any other kind of white metal. If they are interested to wear any stone then they must see that the fitting of the stone is done in white metal.

Date of birth: 6th of the month (independent number)

Number 6 stands for Venus, which is known as God of love. Number six people have magnetic power, they are loved

by others, rather worshipped by those working under them. They have a great attraction for opposite sex. In appearance they have a striking personality, and impressive way of talking, which makes the opposite sex to get attracted towards them. They are very determined in carrying out their plans, in other words they are ones amongst the most practical type. If once they take decisions, they will never fall back and are most faithful. They carry out their promises given to others. They become slaves to those whom they love. Their love is based more on idealism. They plant love and their love is more pure and sensible. They are very romantic and ideal love makers. They love most beautiful things like nature and natural surroundings and make very artistic home for living. They are fond of rich colours, beautiful paintings and love music of soft nature. If rich, they are most generous to spend on art and artistic values. They always feel proud and entertain their friends and make everyone happy around them. They are known as best hosts. The woman born under this number is most fit to become an ideal housewife, as she knows how to give love and entertain her husband best and to make ideal home where one feels proud to go and visit.

Bad Aspects

If the people born under this number are not understood properly then they adopt the most repulsive character to be dealt with. Their temperament is of worst kind and they continue to be repulsive till death. If once they are made enemies, their hate is also of extreme nature like love. They fail to realise the consequences which bring them misfortunes. It means they have no control to overpower their weakness of losing their temper.

Opinion and Suggestions

According to my observation I still stand in favour of this ideal number because they are extremely sincere and faithful in friendship, relationship and in their profession. Person dealing with them must observe and respect their feelings and sentiments. If they look after these two things then I do not find any other number better in dealing in all matters and relationship. My suggestion to the possessor of this number is, that they must utilise the will-power to control temperament. If they look after that aspect of nature, there is no reason why

they will look down and will not feel proud of the influence of their number.

Favourable days: Tuesday, Thursday and Friday.

Lucky colours: All shades of blue, rose and pink. But they should avoid black and purple colours in particular.

Date of birth: 7th of the month (independent number)

Number 7 is associated with Moon planet. It has got lot of resemblance with number 2. The possessor of this number is of independent nature, original in thoughts and has got an individual character. People born under the influence of number 7 have changes in their life and they mostly travel a lot. If rich, they constantly travel overseas. The influence of this number gives universal knowledge. They mostly become good writers, painters, poets and on top of that they have got great psychological outlook in their work. As a class, they care little about the material things of life. It is the richness of ideas that they possess. They always start their own business. If they are in this line, they will not share any responsibility in the business of their elders.

During the last years of their life, they devote their life and time for the nation and society, if they are rich. Otherwise they believe in doing social work. That shows that number 7 gives maximum spiritual instinct to the possessor. But still they are not religious. Their religion is serving humanity. The female possessor of this number generally marries late and is always successful. She is always anxious about future and needs security in life. They have remarkable intuitional power which eventually becomes a spiritual power. They can easily influence others.

Bad Aspects

As just mentioned, number 7 is full of qualities, but they always have two different lives. Their earlier part of life is never a steady one. As they need changes while doing so they never stick to one job and to a person. They are subject to changes in all the spheres of their life. Because of this habit they lead a most restless life and become very excited. The people born under this number mostly marry twice as because of the nature and circumstances their first marriage breaks.

Opinion and Suggestions

Number seven people are born under the influence of mostly rich. They are suggested to do export and import business, because their travelling pays good dividend in that case. As they have very remarkable intutional power they must get into the profession which suits their temperament, otherwise they have all chances to lose the initiative, which is the remarkable thing in their life. They should overcome the influence of changes as mentioned above through the will power and logical thinking, so that they can avoid the mis-happenings and ugly situation for which they have all tendencies in the later part of their life. On the whole I cannot deny that this is an ideal number to possess.

Favourable days : Sunday and Monday.

Lucky colours : Light green, yellowish green. You should avoid all dark colours as far as possible.

Date of birth : 8th of the month (independent number)

Number 8 stands for Saturn. The people born under this number are misunderstood in their life. They are not bad at heart, but if people misunderstand, then they become revolutionary because they have no patience to face cruelty of people's behaviour. Because of this they feel very lonely in life. They have deep and very intense type of nature. The people born under this number have great strength for individuality. They usually become the source of fortune for others. In other words the people connected with their life are highly benefited. They are of extremist kind which brings them bitter enemies and worst kind of opposition. They often appear very cold but in fact they have the warmest heart. They are introverts and leave it for others to guess their feelings and emotions.

Number 8 people achieve either great success or badly fail. They don't fall in between the two. If ambitious they generally hold high positions and do great sacrifice on their part. Number 8 people are very difficult to be understood as they represent material and spiritual class. In love, number 8 represents Venus, the God of love. Rich in thoughts and emotional, they are also the warmest kind. If by chance they fall in love they do the sacrifice up to a great extent and will

shoulder all the risk and responsibility of their lovers, and create a unique example of their love. While doing so they mostly face emotional betrayals which make them further desperate and frustrated in life.

Bad Aspects

In this world of materialistic values, number 8 is not an ideal number to be possessed as they will be mostly misunderstood in life. Because of this they become frustrated and desperate in life. Since they are sincere they have all the chances to become criminals of bold type like dacoits. While becoming so, it is the world which is responsible to make them like that. In love they must care and think properly for the person with whom they are falling in love. If they get betrayed there are all the chances of ending their life because they are extremists and betrayals would be unbearable.

Opinion and Suggestions

Influence of number 8 is different from hand to hand, i.e., this category will fall to different kind of people. My personal opinion regarding this number is that they make remarkable friends and are born for others. The people belonging to this number are always highly benefited. They are born to give. The blessings are showered on them and god is always kind on them. They have great instinct of spiritualism in them. The last part of their life is mostly spent in kind deeds. My best advice to this number is to have patience and will-power, to face the facts and upheavals of life and ultimately they will enter into the world of peace. If they overcome the habit of being extremist, they could avoid committing faults in life. They should be the statue of acceptance.

Favourable days : Saturday is the most propitious day.
Sunday and Monday are also favourable.

Lucky colours : Dark blue, maroon and black.

Date of birth : 9th of the month (independent number)

Number 9 stands for Mars and is highly influenced by the planet Mars. The possessor of this number is of a fighting nature and continues the battle till the last blood of life. They never know how to surrender in life. They have a remarkable

will-power if once they decide to do any kind of job, they never leave it undone and must complete their task in a most satisfactory way and manner. They are mostly ambitious and do not stay at one place if the job or business is not prospective. Because of their strong determination they mostly achieve success in their concerned field. They never would like to be under the force of any one because they themselves have a natural urge for leadership. If planet of Mars is very prominent and has a great influence on the possessor, then most of them are in the armed forces profession, and if by chance they happen to be in the battle field, then they fight so bravely that they bring fame for the country and nation and carry their name even after their death and are known for generations for their act of bravery. In private business their ways of handling matters is different with highly optimistic attitude and diplomatic manner and are great success in life. The only sad part of their life is that their early life is full of struggle and battles and they see lots of ups and downs during their early age. But they keep on learning from the experiences and the setbacks which ultimately become a good lesson in their life and they make a good use of that experience.

Bad Aspects

Number 9 people have a lot of opposition and enemies in life. As they make forced entries in all kinds of fields they are mostly successful. In such an act they leave lot of their colleagues behind, and these people turn out to be their hidden enemies, and are always bent upon to take revenge. So the people born under 9 number constnatly face enmity and struggle against such situations throughout life.

They are prone to meet an accident on road and from fire explosions. They rarely escape in life without an injury. They are also prone to undergo surgical operation whether of major or minor kind. The men of number 9 can be exploited and made biggest fool if a clever woman intends to do so.

Opinion and Suggestions

Number 9 is a very bold number, and the possessors are gifted with a great courage. My best suggestion to them is to remain cool headed and should not be easily excited so that they can have a smooth sailing in life. Because of their violent nature and temperament they get excited easily which makes

their life complicated and they spend their entire life solving such like problems and keep working because of their self creations.

It is a very lucky number to possess provided the possessor is of a peaceful nature. You are advised to drive with care and caution as during the excitement you may commit accident. Men are advised to remain careful from the undesirable kind of women. Because a clever woman sometimes is the reason of their downfall and misery.

Favourable days : Tuesday is the favourable day. Thursday and Friday are also good days.

Lucky colours : Red and pastel colours.

In the preceding pages I have explained the characteristics of independent numbers. In other simple words, they are single digit numbers. While doing so, I have evaluated their nature, temperament, behaviour and their influence on each of these numbers.

As already explained, the science of numerology is the study of numbers. We categorise numbers 1 to 9 as independent numbers, because they are single. From number 10 onwards they are double digital; so we call them as combined or compound numbers. In case somebody is born on the 12th day of the month, we will add $1+2$, and will get number 3 for our characterization and our predictions. But while analysing we will not forget that this number is not independent but a combined number which necessitates us to study the numbers 1 and 2 also, which combine to make number 3.

It is interesting to note that all the following numbers upto 19 are supported by number 1 and are sustained by its characteristics. Hence, the study of number 1 will be continuous, and cannot be ignored. All we have to analyse is which of the three—in the example given—number 1 or 2 or 3—has a greater influence on the subject?

COMBINED NUMBERS : 10-19

Date of birth : 10th of the month (combined number)

Our first number is 10. In numerology 0 is a silent figure and has got no individual character. So our main number is number 1 for forecasting $1+0=1$.

Number 1 stands for Sun, which means success in life. The possessor of this number is highly creative, with a most individual character. He is positive in views with definite understanding in mind, highly inventive and will take risk in life as they are mostly courageous and dashing in action. They being highly optimistic will care not of the results but believe in means. They being stubborn in nature carry out their plans in their own way and methods and while doing so if anybody interferes, they do not care and do not hesitate to resent badly and madly. Therefore, they face a lot of oppositions. They always like to be the leader of the show and work, because basically they are born to be a leader.

Bad Aspects

Number 10 people have a lot of enemies and opposition throughout their life. Though being carefree they rarely care, but they are mostly stabbed in their back and they are mostly born short tempered. This too affects their reputation. They being highly stubborn do not get along well with blood relations and their relation with them is always strenuous. I have observed closely that their family life is not happy and healthy.

Opinion and Suggestions

It is a fine number, because they mostly enjoy the highest position in their life. Still according to my opinion they should be patient. As a result of impatience they commit a lot of faults and blunders. If they have control on their ambitions, there is no reason why they should fail in their lives. Because of their bad temperament there are all the chances that they suffer from high blood pressure and become victim of heart trouble. Therefore, they must keep themselves medically checked regularly and take precautions. As they keep on working till the last day of their life, it adds to their mental strain. Therefore, they are advised to take care of their health. It is very essential to have good health.

Favourable days : Sunday and Monday

Lucky colours : Golden and light yellow.

Date of birth : 11th of the month (combined number)

Number 11, it was explained earlier, is a bold number full of initiative. It stands for individuality, courage and boldness. Number eleven is the combination of 1 and 1. So you can understand how this number 11 confirms the character of number one with a double force. The possessor of this number is full of incentive which represents number 1 on the whole. But ultimately it make number two— $1+1=2$, to become an independent number. This is a highly sensitive number in itself. In general it is a fortunate number and seldom faces failure. But if by chance a failure is there, then they survive to suffer mentally and become a serious case of mental depression.

Bad Aspects

As they carry the influence of Moon, they are highly imaginative and are pessimistic in nature. In romance they are ideal and sincere characters. But if by chance they fail to get sincere partner, then they are the ones who feel most desperate in life and lead a life of isolation. They are the most restless and unsettled persons, and lose self-confidence in face of failures. This leads to dejection.

Opinion and Suggestions

I have observed this number 11 as an ideal number to be possessed. Though as one digit it becomes number 2, still there are two ones to guard this sensitive and dejected number 2. Moreover, the possessor of number 11 is not weak and lean as number 2 would be. They have a strong built and if by chance they face physical tortures they can standby, provided mentally also they are ready to face the situation.

They should live in healthy surroundings. Because you cannot stay in unhealthy company, there is no use to adjust in a company of that kind. You might lose the balance of your mind while doing so and feel desperate. This will lead to fatalistic end of your life.

Favourable day : Friday.

Lucky colours : Pastel shades and light green.

Date of birth : 12th of the month (combined number)

We are in the open field now where you will see how two numbers' characteristics are relative to each other and which is more influential than the other. Number 12 is the combination of 1+2 which make one digit in number and that is number 3. As mentioned the characteristic of this number earlier, you know that this number represents drive, initiative, boldness and is a very courageous number, though represents characteristics of stubborn type and bad temperament.

Now on the other hand number 2 is a feminine number, most gentle in nature and imaginative in type, romantic in heritage and carries highly sensitive tendencies. They are usually restless and will feel unsettled in life and will lose faith and will develop tendencies of lack of self-confidence.

So this number 12 is the combination of these two natures and temperaments. But still it is a number which is known for its boldness, leadership, discipline, and high ambitions. This number has got dictatorial qualities and they rarely bend before force but yield before love.

To this number 12 (combined number 3) the support of number one is there which is one of the two numbers that makes number 3—one digit number. So now number 12 is known as highly ambitious, good commander, fond of disciplinary act and faithful in carrying out their duties.

Bad Aspects

Now 12 still carries certain qualities of number 2, and are therefore sensitive. They rarely heal their wounds, they have the touch of sensitiveness. And if stopped by certain people they never like to face such resentments. They often lose temperament. They face mental tensions. They cannot bear a life full of strain. They have revolutionary instinct. They love changes in life. They have two sides of their personality. By nature they lead a serious life.

Opinion and Suggestions

Number 12 is an ideal number. Its one digit is number 3.

But out of the combination of two digits number 1 is very close to number 3. The characteristics of number 1 and 3 are identical to each other. Even though number 3 is a stubborn number, it is a successful number in the long run. If they control their temperament and sensitiveness which can bring a desperation and frustration in life, it is one of the ideal numbers to be possessed of.

People born under the influence of number 12 are mostly successful in their life. But their latter half life is better than the first half.

Favourable day : Thursday.

Lucky colour : Light red.

Date of birth : 13th of the month (combined number)

The world considers number thirteen as unlucky number. But I consider it the other way.

Now thirteen combines $1+3$ and both the numbers are highly practical and full of vigour and vitality in the respective ways and both go shoulder to shoulder to each other. They are inventive, highly ambitious. They have discipline in all the matters. They never would like to be in the inferior jobs and subordinate positions. They are extremely faithful in carrying out their duties. They never take obligations and if ever some one obliges them, they would like to get rid of the obligations, by compensating back for the obligation done on them. They are creative and positive, and definite in their views.

Now let us calculate number 13 as $1+3=4$ and collectively number 4 as independent has to share with both numbers i.e. $1+3$. Now number four, though hardly quarrelsome has still got hidden enemies, those who will be always after taking a revenge. And the people related to and in contact with this number mostly feel jealous about their prosperity and progress in life. They seldom get friendly but with whomsoever they become friendly, they have all the chances to betray them. Number 13 mostly gets financial and emotional betrayals.

Bad Aspects

Number 13 is a highly temperamental number. They get

easily excited and are mostly short tempered. Their family life is not good. Though they are not bad at heart, still they are betrayed badly. Because of such circumstances they become highly pessimistic and because of this nature they mostly lose good opportunities and people in life. They are mostly of reflective nature.

Opinion and Suggestions

As I have mentioned earlier it is a very fortunate number as it is an ideal combination of two digits 1+3. Both the numbers are full of achievements of worldly and materialistic profits and gains. They always look thoughtful as their ambitions are very high. Even though they achieve good heights in life, they are never contented and will keep on struggling in their life till the last day. The mental contentment and peace they never get, as it is not a spiritual number. They are pessimistic which is another reason of their failure to achieve contentment in life.

Favourable days : Tuesday and Monday.

Lucky colours : Light yellow and purple.

Date of birth : 14th of the month (combined number)

Numbers 14 combines 1+4 and makes one digit number 5. Number 1 is the most bold number and represents planet of Sun which means success in life. It is a number which is highly creative, individual and positive, inventive and definite in thinking. They are obstinate and determinate in thoughts and in all their undertakings. This highly ambitious number has fallen in the partnership with number 4.

Number 4 is most pessimistic number and you know a pessimistic person is born to lose lots of good opportunities in life. Though they are not quarrelsome still they have lots of enemies in life. They are highly sensitive and get easily hurt emotionally. So this number 14 is negative as well as positive in life.

Now here in such a case we have to observe one important point, and that is, which is the dominating number in the possessor's life? For this I always take help of my knowledge

of palmistry and observe from the type of lines on palm. This I will be discussing in the latter part of my book.

Bad Aspects

For worldly ways it is the most difficult number to be explained. But even then you can avoid saying one thing and that is, their pessimistic way of thinking. They mostly get mental tensions, severe headaches and nervous breakdown of worst kinds.

Opinion and Suggestions

A person with this number tends to make huge profits and they do well in all kinds of business; their mind mostly works in making money in quick and fast ways. Still inspite of all such achievements they feel very isolated and lonely. Moreover, as money is the only motive in their life, they sometimes get into bad habits like gambling and other illegal type of ways to make money. They should guard themselves from the people of bad society as they can easily fall into their trap and are prone to be a tool in their hands. This will spoil their own career. It is a number which needs a lot of caution and pre-caution in life to lead a smooth life.

Favourable day : Wednesday.

Lucky colour : Light grey.

Date of birth : 15th of the month (combined number)

Number 15 would make a combination number $6-1+5$, a single digit.

I need not mention again and again the characteristics of number 1 as it will continue to cover and combine with all the numbers from 10 to 19. So this number 1 which stands as a bold number and represents Sun means success, which is rendering a highly creative characteristic. The individual is definite in views and vision, obstinate and determinate in thinking. He stands in relation to number 5 which represents Mercury—the planet of business. They are quick in thought, decision and action and they get easily excited. They have keen sense of making money quickly and that too

by new ideas and schemes. They never do government or semi-government jobs or professions that their elders have done. They make their own way in service, business and living. They have the desires to gamble and they enter and get tempted towards the field where they feel money could be easily achieved. If once they take a decision nothing can change them and they go ahead and achieve the end result whether by good or bad means.

Bad Aspects

Number 15 as mentioned earlier makes the combination $1+5=6$, which is an independent digit. Well they can be easily moulded and if they are in bad society and company they become the victims of worst kind. They mostly get tensions and nervous breakdown if they do not use their strong will-power. They should guard themselves from high blood pressure and should take care regarding the heart troubles.

Opinion and Suggestions

Well, it is worldly number to gain maximum where the wealth is concerned. Because possession of money is the motive of their life, without money they feel upset and rather frustrated. They must guard themselves from the people and surroundings and must do the things after giving a proper thought with patience.

They must take advantage of number 1 which is a bold number and can save them from lot of damages, because it is a house of Sun and success. Moreover, you must guard against your temperament which further saves you from committing mistakes and blunders as in such a situation you may enter the life of desperation and frustration.

Favourable day : Friday

Lucky colour : Navy blue.

Date of birth : 16th of the month (combined number)

Number 16 will combine $1+6$ and make number 7 as one digit.

Number 1 being a bold, independent, positive and inventive

number also is a highly ambitious number in relation to number 6.

Number 6 stands for Venus which is the planet of love. It has got a magnetic power to attract others towards themselves. They are most determined to carry out their plans and very positive in their views. They become slave for people whom they love. They are very romantic and are most ideal in love matters. They love beautiful and artistic homes. They need no training for interior decoration as they are full of imagination. They are most generous towards art and artists. They are known as great hosts and are very fast in making social contacts. Their contacts are dependable and everlasting. If they are in any kind of social work, they perform their duties to their greatest perfections and are most competent for such jobs.

Bad Aspects

The worst type of nature which they possess is that they never like to be opposed and for this reason they are known for their short temperament. As this is a world of jealous people, the people are found to oppose them and will feel jealous as this class makes rapid success and progress and leave many colleagues behind them. So while they go ahead they leave behind oppositions and enemies. This number does not have patience, so the possessors feel disturbed mentally because of their behaviour.

Opinion and Suggestions

Number 16 is a wonderful number because their coming-up in life is quick and fast. They mostly make headlines faster than others. Considering their talents and virtues, I recommend them to enter a business career, as they have an ideal mentality for a business line, interior decoration and planning or architecture. They can make full use of their fertile brain for writing, painting and sketching as well.

You must be patient in odd circumstances and unfavourable results as you can't stand opposition because your progress in life is natural.

Favourable days : Sunday and Monday.

Lucky colours : Rose and pink.

Date of birth : 17th of the month (combined number)

Number 17 will combine 1+7 and make number 8 as one digit number.

As number 1 is highly ambitious, creative and positive in views and decisions, all such qualities are to be added and this fine characterisation is to be made an important partner to number seven. Since number 7 is most independent, original and has a strong mark of individuality, number 1 and number 7 have so many things in common to think and to act in harmony as well. They love changes and usually do not stick to one job or profession. They travel a lot, and visit lots of countries, they have a great knowledge of every subject and they are highly of literary nature. They can become good writers, painters, and poets as they are very rich in imaginations and are highly logical. If they have a strong will-power then nothing is to match this number. Because strong will-power means success in their life.

Bad Aspects

The biggest fault in them is that they seldom stick to one job and that is why inspite of the fact that they have most brilliant brain and remarkable power of observation, they don't stick to one type of career, and they keep on changing from place to place, which creates bad impression and if they don't have any of their independent business then they suffer. They create bad impression as servicemen. The women born under this number 17 do not have a healthy family life and they become the victim of their changeable nature. They mostly get fed-up from a well settled life, as they are fond of changes.

Opinion and Suggestions

People born under the influence of number 17, should avoid service career and should adopt business career and that too business like export and import. This business will help them visit lots of countries and meet various types of people and that is what they are born for.

If by chance they want to join any service career, they should prefer to join travel job like sales executives. In that case they will have less chance to feel fed-up from jobs and services, and such jobs and services will bring lot of changes so far as the place and people are concerned.

Their last part of life will be full of spiritualism and they will have total peace in their last part of life than early age. During the early age they will have a rat-race type of life.

Favourable days : Sunday.

Lucky colour : Green.

Date of birth : 18th of the month combined number

Number 18 will combine $1 + 8$, and make number 9 as one digit number.

Number 1 being independent, inventive and positive in views, is highly ambitious. Number 1 makes a combination with number 8 which had a strange characteristic in relation to number 1.

Number 8 is influenced by Saturn planet, which is of course for money. While making a combination with number 1, number 8 turns out to be most definite in views and becomes very practical in decisions and actions. Moreover, number 8 being highly extremist leaves no stone unturned to complete the job they undertake while they are in combination with number 1, because number 1 is also most determined in views and actions.

While doing so either they are great success or great failures. But the chances of their becoming failures are very dim, and they are mostly successful in what they do and undertake.

They mostly attain high positions in job and attain high social standard. They carry great respect in whatever field they are. They are mostly liked by their subordinates and carry great respect in their hearts. Their subordinates can do any kind of sacrifice for them because they rule them with affection.

Bad Aspects

As they have very affectionate touch with the people working under them, the subordinates become jealous and will be always after harming them. So they have to be aware of the surroundings. Although they are not sincere in the initial stages, they do their level best to have all the reasonable and sincere approach to life, but if by chance they fail to attain their motive and goal then they get desperate and frustrated and eventually become revolutionary.

Opinion and Suggestions

Considering their ambition and courage I suggest that they should enter the field of business. Though their early part is full of struggle in life, ultimately they make their way and achieve the goal.

While selecting the job and profession they must not get tempted, but should consider all pros and cons, their talents and qualifications before jumping into the line. They must guard themselves from road and fire accidents.

Favourable day : Saturday.

Lucky colours : Black and dark red.

Date of birth : 19th of the month (combined number)

Number 19 will combine $1 + 9$, and make 10. As mentioned earlier 0 is a silent number in numerology. Ten, when added, $1 + 0$, will make 1 number.

Number 1 being very ambitious, bold, full of initiative and of a creative character in number 19. It has double importance as it is one of the digits in nineteen and also one of the digits in number 10. So the people born under this number 19 have a great vigour and vitality and are full of determination and action. They are mostly successful, as number 1 stands for planet of Sun which means success. They mostly rise to the highest positions and never would like to live a life of restraint and restrictions. Now the characteristic of number 9 also plays a big part in their life which gives them strong will-power and determination. They are hasty in temperament, impulsive in nature, and have independent desires. They usually face a lot of quarrels in personal affairs and domestic life.

Bad Aspects

They have a lot of enemies in life and face many problems because of them. The life outside the house is also full of struggles and they mostly keep on making efforts to solve the problems. The homely life is of the worst kind as they live mostly in disturbed family life. They should guard themselves against frustration otherwise there are all the chances

of taking some kind of drastic steps, because desperation in life shall be unbearable.

Opinion and Suggestions

Well, inspite of the fact that number 19 is full of success in life, they still face a lot of problems and seldom get contentment in life. They should remain clam and have maximum patience in life. That is the best remedy. Moreover they should control their temperament. Because of their bad and short temperament, they will create lot of problems and face the consequence of it.

The best profession and career for them is service in armed forces where their vitality and vigour can really bring results. Moreover that is the only profession in which they achieve high positions and get great rewards of distinction and are remembered for generations.

Favourable day : Tuesday.

Lucky colours : Dark red.

MAY I HAVE A WORD WITH YOU

Dear reader, from number ten to nineteen I gave my explanation for two digit numbers. This was the second part of my explanation. In this portion number 1 was the associate-number upto number 19. So I explained it throughout with its due importance and characteristics.

After number 19, we enter another part of numbers which begin with number 2. From number 20 onwards, it is this number that goes all along upto number 29. Hence, now its number 2 as an associate upto 29. In all these numbers, number 2 will support or co-relate, or dominate all the numbers upto 29.

COMBINED NUMBERS 20—29

Date of birth : 20th of the month (combined number)

From this chapter onwards number 2 becomes the leader and leads the numbers upto 29.

With reference to number 20, this number will have the maximum say, as 0 is a silent number in the calculation of numerology as mentioned earlier $2+0=2$.

The possessor of number 20, or the one born on 20th of a month is a highly sensitive character. It is the most feminine number, and gentle by nature, highly imaginative and mostly imaginations are of artistic kind. They are quite inventive.

The influence of this number is more towards mental side than physical. Being highly sensitive, they will not leave a good impression with most of the people and at certain places. And because of this nature they will be misunderstood mostly, though at heart the possessor is most ideal, kind and gentle.

Bad Aspects

The possessors of number 20 must take care of their health as they are mostly delicate in physique and are prone to a lot of physical troubles as they do not have the power of resistance. This generally leads to tragic ends. The possessor is found mostly to be a psychic patient, they face problems because of their sensitive nature. This can cause mental depression of the worst kind. Moreover, they have great tendencies of restless nature. Their physical and mental health are prone to be effected.

Opinion and Suggestions

Number 20 is a highly intelligent kind. They must think before they do something. If they live in contradiction to their desires, they feel upset, because it is the job satisfaction and not the money satisfaction they need in life. You should get into work related to artistic nature, like interior decoration, painting, and see where you can have the full use of your strong imaginations as your powerful thinking will play a vital role in life. You must guard your thoughts from taking a turn towards pessimism. Guard yourself against getting into a restless nature.

Try to be always in a healthy company where you can look after yourself and remain happy. If you will take all such precautions there are all the chances for you to lead healthy and happy life.

Favourable day : Monday.

Lucky colours : Cream and white.

Date of birth : 21st of the month (combined number)

Number 21 will combine 2+1, and make number 3 as one digit number.

As number 2 represents Moon planet, this is feminine number with highly imaginative characteristics. The possessor is a deep thinker, artist, inventive, emotional and highly romantic. Their main qualifications are mental capabilities and they mostly undertake jobs which require thinking and imagination.

While possessing the above mentioned qualifications, the subject gets support from number 1, which is the house of Sun and Sun is the planet of success. Though the possessors are highly ambitious, creative and definite in views, inventive with positive thinking, they never believe in the practical approach to the task. The possessor of this number always does the job according to their own pattern of thinking and have their own methods and ways of doing them.

Since imaginations are supported by Sun, they mostly achieve success in what all they do.

Bad Aspects

The possessor alongwith the good qualities also has certain bad signs in their character and nature, like they are highly sensitive and have bad temperament. They must guard themselves against nervous tensions which can make life worse. They are prone to have nervous breakdown. Because of their bad temperament, they are bound to make a lot of oppositions and enemies, since they have a dictatorial tendency and would like to get things done in their own way. So they make a lot of oppositions and lose good chances in life as they are seldom diplomatic. They must guard against heart troubles and must get their blood pressure checked up.

Opinion and Suggestions

The possessor of number 21 is mostly successful since independently the number is under the influence of Jupiter. So the people born under this number achieve name and fame. They mostly become great, successful and create a name for themselves and are mostly known because of their ideal jobs. Considering their talents and virtues, they must get into a profession related to art. They can be most successful as writers, painters and they become famous actors of stage and screen. They, therefore, must consider such professions where their rich imagination can be used as they can be of extreme success because of their creative nature and work.

Favourable days : Monday and Friday.

Lucky colours : Cream and light yellow.

Date of birth : 22nd of the month (combined number)

Number 22 will combine 2+2 and make number 4 as one digit number. The possessor of this number is highly imaginative and sensitive. It is a most feminine number and the possessor of this number is highly sensitive in nature. They never like any kind of opposition. Being highly creative they attempt a new kind of profession in life, but mostly they do not achieve success. Failures bring a lot of problems and they become desperate in life.

In fact they are highly sincere in nature and work. But even so they don't get a due reward and are mostly betrayed. Such sort of behaviour by others makes them most pessimistic in nature and because of this pessimism they suffer a lot.

Bad Aspects

This number 22 does not belong to this materialistic world. They are highly sensitive in nature and keep most of the feelings to themselves and suffer mentally. They have a weak physical constitution and have no power of resistance and thus, lead a most unhealthy life.

Opinion and Suggestions

I have experienced this number as a most unhealthy one and not as a fortunate number to possess. With a few exceptions,

mostly this number is a sufferer. They should overcome the habit of sensitiveness and avoid pessimistic thinking and should develop a strong will-power. If they do overcome the habit of sensitiveness and pessimism, then they can overcome a lot of evils and can lead an ideal life. They must develop patience and see the results. They should not get excited as it further can damage their health and life.

In most of the cases the females born under the influence of this number are sufferers, if they don't learn to be carefree.

Favourable days : Sunday and Monday.

Lucky colours : Light blue and grey.

Date of birth : 23rd of the month (combined number)

Number 23 will combine 2+3 and make a number 5 as one digit number. The number is the combination of two opposite characters which altogether are different in nature—thoughts and deeds. Now number twenty three is highly imaginative in nature. Gentle in ways, artistic in views and highly romantic type.

They along with these virtues and qualities use force to obtain and attain the motive and achieve aims in their life. With such a delicate nature and gentle ways they pose and act like dictators and use authority and want to get the things in a commanding manner. So while doing so they shadow a false pose and character, because basically they are not born to dictate the terms.

Bad Aspects

The people born under this number 23 are mostly delicate in health and don't possess a good and strong physique. They are sensitive. This results in mental tensions and they have mental problems and face depressions and get severe attacks of headache. They mostly get easily excited and while in such a temperament they are bound to commit many mistakes and blunders.

Opinion and Suggestions

As mentioned earlier this number represents two adverse numbers. So the possessor of this number mostly lives

a confused life as both the numbers—2 and 3 speak opposite to each other and work and act in a different directions. So it leads to a big clash in thinking and action.

Well, I do realize that basically you need the help of palmistry for analysing every number but whereas number 23 is concerned, the help of palmistry is most essential. You can easily make out from the lines of the palm, that towards which side number 23 has developed—whether practical or imaginative. Palm in the proper guidance in the case of this number even at later stage of this book. I will explain practically this number and will give palm illustration for proper explanation so that a better understanding will be there for my readers.

Favourable days : Friday and Thursday.

Lucky colours : Light green and purple.

Date of birth : 24th of the month (combined number)

Number 24 will combine $2+4$ and make number 6 as one digit.

Number 24 represents the imaginative and inventive nature, but this number is not forceful in carrying out the ideas and plans. They represent mere mental and not physical force. They are very sensitive in nature and they always appear to view everything from the opposite angle. Even while arguing they take an opposite side. Though they are hardly quarrelsome, they have many secret enemies. The influence of this number is mostly rebellious. They seldom get friendly, but if once they befriend to some one then they never withdraw but become slave to their friends and lovers.

Number 24 is most liberal in ways of spending their money. In financial matters they sometimes get worst kind of betrayals.

Bad Aspects

Number 24 is a number which is highly influenced by Mars and it is a planet which gives the possessor a bad and worst kind of temperament, they are very bad in temperament due to which they make many enemies and a lot of oppositions. They have a weak will-power due to which they have no control

over their temperament and sensitive nature. They have a weak physique and have no power of resistance and if they fall sick, recovery is not easy as they cannot recover mentally.

Opinion and Suggestions

This number is influenced by Venus planet. The possessor is most generous to art and artists. They are very ideal in matters of love and have a sincere touch of love. That is why they must guard themselves against the person having any selfish motive. In such cases they are mostly betrayed and have a worst kind of emotional setback.

They must adopt a profession like painters, commercial artist, interior decorations. If they are gifted with a good voice then they should learn music and mostly famous singers are born under the influence of this number. They can learn any instrumental music also because they have good taste for music. They have atleast great appreciation for art and artists, although they themselves may not be able to become the same.

They must be independent in profession or in any kind of job that they undertake. It is difficult for them to work for anyone, if they do not like the other party.

Favourable day : Thursday.

Lucky colours : Rose and pink.

Date of birth : 25th of the month (combined number)

Number 25 combines $2 + 5$ and makes number 7 as one digit. The number 2 is highly imaginative number, and also, is sensitive in nature. Gentle in many ways, number 2 has joined hands with number 5, which is highly influenced by a character who is quick in thoughts, decision and actions. They easily get excited. They have a keen sense of making money quickly. They are influenced by the planet of mercury which itself is the planet for business. But such are the people who are interested in quick returns of their investment. Therefore, they get into the habit of speculation—stock exchange transactions, gambling and racing where the exchange of money is quick and sudden. Now being gentle by nature, they hardly can feel good or bad about any kind of deal, deed and business they are entering into.

They have a most adaptable nature and any kind of temptation can attract them and thus they become the victim of the circumstances.

Bad Aspects

Number 25 represents number 2 and 5 which have got a very yielding characteristic to each other. Number 2 is highly gentle and sensitive and number 5 is very materialistic in character and is easily tempted to money and that too for easy kind of money. Number 2, being an innocent, follows the ideas and does not create any kind of problems and does become—a passive follower.

As they mostly get into the habit of gambling, they become the victims of ill fate and face the worst kind of results. Being sensitive they become highly tense, irritable and short-tempered. If they possess a weak will-power, which is so in most cases, they even get nervous breakdowns. They must take much care of their health.

Opinion and Suggestions

Since they have ideal imaginations, they must develop an interest in art, writing, painting and they can become eminent poets as well. As they like changes in profession and abode, an export business is ideal for them. This may keep them away from the evil practices like gambling and speculations.

You have to look after only the early part of your life as this period of life is full of excitement, changes and frustrations. But your life after 45 years of age will be smooth and steady and you will love to do a lot of deeds and will donate your money mostly for charities and good causes.

Favourable day : Monday.

Lucky colour : Light green.

Date of birth : 26th of the month (combined number)

Number 26 will combine 2+6 which makes number 8 as one digit number.

Number 2 which is gentle, creative and most sensitive in nature has joined hands with numbers 6 to make the future. Well, now you must have understood the deep characteristics of number 2. Whether you are reading this

book for a general study or with a deep interest in your date of birth, it is meant to keep the general interest of the subject alive.

In my professional career which is most practical in shape I have found number 2 most innocent and gentle, highly imaginative and sensitive. This number has got a remarkable combination with certain other numbers and gets the full support and strength from them, but with opposite numbers the influence of this number is adverse and the subject feels depressed and loses most of its qualities. As by its virtues, it is a very meek and weak number and has got no individual strength of its own.

Number 2 increases its strength as number 6 has got a lot of artistic tendencies which are based on imagination. They are highly romantic and are almost slave to all those who love them, their liking is of extreme kind and they sacrifice all what they have to their loved-ones. They have beautiful homes and artistic surroundings. They are also fond of rich colours.

They like to entertain their friends and are known as good hosts. They are generous in spending money. Both the numbers 2 and 6 get along well and have got a good balance of thoughts and actions.

Bad Aspects

The number 26 does not represent the subject with heart and they have an ideal and sincere approach to their aims and motives.

But the worst part in their life is that they are always misunderstood and thus become the victims of people's criticism and comments. They face bitter criticism which makes them frustrated and brings desperation in life. If they do not face this situation boldly, they feel fed up with wordly behaviour and can have any kind of change in their life. It would be in good direction i.e., they may turn out to be great spiritual characters or it makes them the worst kind of vindictive characters. They are the people who can either be the top occupiers or they are down to the drains.

Opinion and Suggestions

Considering the virtues and qualities I have found this number 26 as an ideal number to deal with, and all those who belong to this number are highly benefited. But it is sad to

note that they seldom have any reward and recognition of their good behaviour and gentle nature.

My only suggestion to this number is that they should have a great deal of patience and must face the world boldly and bravely. Otherwise they are prone to be slaves of circumstances.

Favourable day : Saturday.

Lucky colours : Navy blue and dark grey.

Date of birth : 27th of the month (combined number)

Number 27 will combine 2+7 and make number 9 as one digit number.

Here number 2 which is highly imaginative, artistic, romantic and most gentle in nature joins hands with number 7 which also is a Moon predominated like number 2. So they get along well with different types of characters. Even then they have no intention to oppose each other, but rather, are complementary to each other.

With very high imagination and artistic nature they are very independent, original and have strong marks of individuality. At heart they love changes, like travel. If rich they visit countries across the seas. They have a universal knowledge of world at large.

The instinct of imaginations makes them extremely good writers, painters and poets. They have investigative approach to their work. They seldom care about money and material things in life, though they often become rich by original ideas and matter of business.

The woman of this number always seeks security in life and her major desire is to have a life partner who can mentally comfort her as she herself belongs to an intelligent category.

Bad Aspects

Since this combination of number 2+7 is influenced by Moon it makes them highly imaginative and intellectual kind. As they belong to the world of intellectuals, they seek the company of their own class which in most cases they do not get and in such cases and circumstances they feel lonely and isolated.

Their family life is mostly unhappy if the life partner is not of equal calibre. The biggest fault in them is that they cannot adjust and the difference of opinions widens which brings clashes and cracks in their family and domestic life.

The people born under the influence of number 27 should be cautious as they have chances to meet road accidents. They also must take all precautions against fire explosions.

Opinion and Suggestions

Your number is highly influenced by the virtues of creativeness and imagination. You won't feel satisfied with the chair left by your elders and ancestors, because you always like either the new business or new ways of running business. This attitude will bring problems to you and to your career. I know fully well that you are right provided you realise the limits of your desire and feel well confident that your desires are justified. Then you must have patience to find ways to get your proposals materialised and executed.

You are not service minded and will always think of independent business. To work under force is against your nature. So you must have proper time and best conditions to work and act as it is very essential for you to have a peaceful life and comfortable living.

Favourable days : Sunday and Monday.

Lucky colours : Dark grey and dark blue.

Date of birth : 28th of the month (combined number)

Number 28 will combine $2 + 8$ and make number 10 which in turn will again be added up— $1 + 0$ and make number 1.

Number 2, which is highly imaginative, creative, sensitive and most gentle in nature has joined hands with number 8 to make the future of number 28.

This combination is not ideal in many ways, as the number 8 is a number which is badly misunderstood in life. They are not bad at heart, but it is not a very ideal number for this 20th century where the materialistic ways and means are more counted. As number 2 is a highly sensitive number, treatment meted out to number 8 by this world is highly injurious and can damage its work and mind as well. This treatment may also

make the subject and possessor highly pessimistic.

This is one side of the characteristics. The other side is that number 8 is bold to face the world and facts. In such circumstances there is no power on earth which can harm them, as the combination of these 2+8 is number 1 digit, which further is a bold number. They are highly inventive and creative and lend a great personal touch to their personality. They mostly rise to highest position in their profession and career.

Bad Aspects

As mentioned above number 8 plays a most important and vital role in their career. If number 8 is weak in character and patience, then number 28 becomes a highly desperate and frustrated character and while doing so they commit many faults and blunders and the after effects of these is that it is most difficult for them to repair the damages.

Under adverse circumstances, they mostly become highly pessimistic, which will make them lose good opportunities and people in life. They should keep away and rather control suicidal tendencies.

Opinion and Suggestions

Basically, I will not call this number a bad number though the combination is not desirable because number 1 is a very Bold number and gives great courage and vigour to fight against the odds.

The subjects of this number are advised to be patient. They should deeply study the time and prevailing conditions of their failures. They are advised that time is the best healer to the wounds. If you can manage to adopt this habit and make it a principle of your life, then there is no reason why you should not get satisfaction and become successful as you are born with high ambitions.

So watch whether you really deserve what you desire. In other words, you should make a judgement between your desires and principles. This will save you from becoming desperate and getting frustrated in life.

Favourable days : Saturday and Monday.

Lucky colours : Golden and bronze.

Date of birth : 29th of the month (combined number)

Number 29 will combine $2+9$ and will make 11. We again add $1+1$ and we get the number 2 as one digit.

Number 29 is not only an interesting number for explanation because of its three different characteristics, but is the most important number as far as the numerological aspects are concerned. This number carries interest for possessors as it belongs to them and great interest for readers as it is an asset and has a great numerological treasure in it.

I will not explain the good or bad points of the number myself. You yourself will realise the importance after my explanation. Number 2, which is an imaginative number with sensitive and gentle way of thinking and action has joined hands with number 9 which belongs to Mars and this planet has the highest influence on it. They belong to class of fighters and warriors. Number 2 belongs to Moon which injects and inspires the person for plans, imagination and creativity.

Well! the possessor is gifted to cultivate all planning to practical side and they are mostly successful because they have determination and strong will-power to support and then achieve them, though they are hasty in temperament, impulsive, in nature and have got most independent character.

Now when we join $2+9$ we get 11, which means two ones standing shoulder to shoulder. They represent great determination in the possessor's character. When a highly imaginative person with strong spirit of aggressiveness and determination joins hands to both the virtues and qualities it results to success mostly.

Bad Aspects

In their character they reflect hasty impulsive temperament. So if luck does not favour them, they make a total flop to their plans and will make a mess of their life. Mars is also a very dominating star. While it gives a remarkable strength to fight out the problems, it has got its bad signs as well, as far as opposition and enmity are concerned. The possessor of number 29 will have many oppositions to face and throughout their life they have to face the consequences. They must guard themselves against accidents from road and fire explosions. They rarely will get through in life without having in-

jury from such things. They are inclined to go under operation of any kind, atleast once in life.

Opinion and Suggestions

With remarkable character of planning and putting up all the plans with aggressiveness and determination, the possessor is suggested to have a career in the Armed Forces because the temperament—brave and bold, is ideal to be a fighter in the battle field. It is also well supported by planning and determination as well and they never yield without results and are mostly victorious.

In the private section also they possess a soldier's temperament and will do all the possible self-imposed discipline. They successfully complete the project they undertake provided they control their hasty steps and bad temperament due to which they suffer badly sometimes.

Favourable days : Thursday and Tuesday.

Lucky colours : Creamish and light pink.

LET ME TELL YOU SOMETHING IMPORTANT

So far we have covered three parts of numerology.

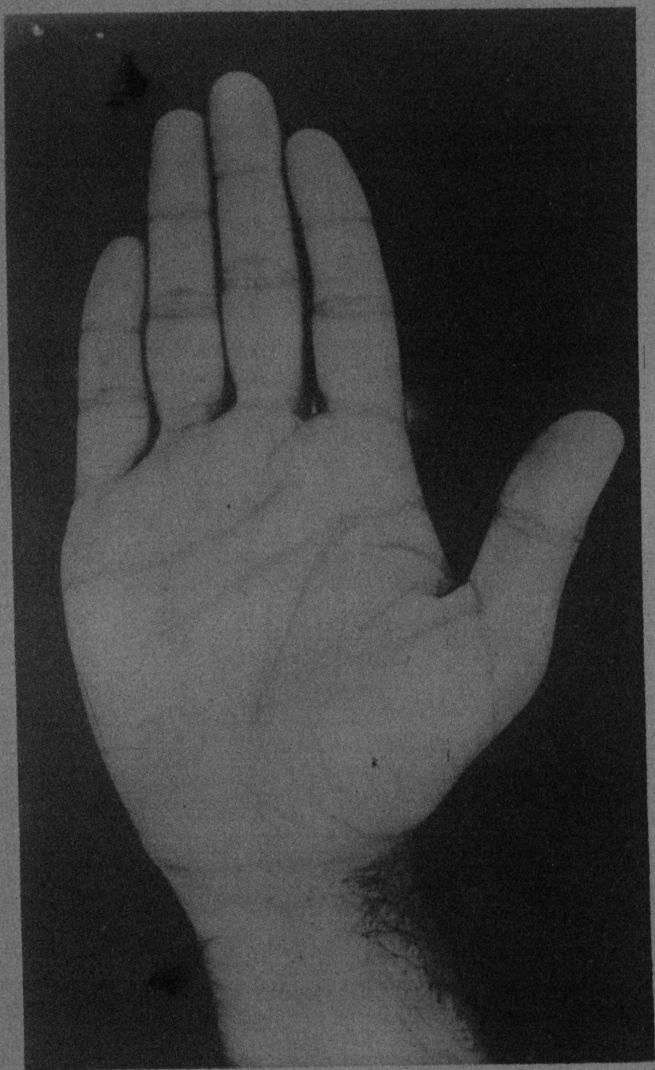

1. Numbers 1 to 9, which are known as independent numbers.

2. Numbers 10 to 19, which are combined with number 1 throughout. Number 1 was explained repeatedly as its importance in relation to other numbers upto 19 cannot be ignored.

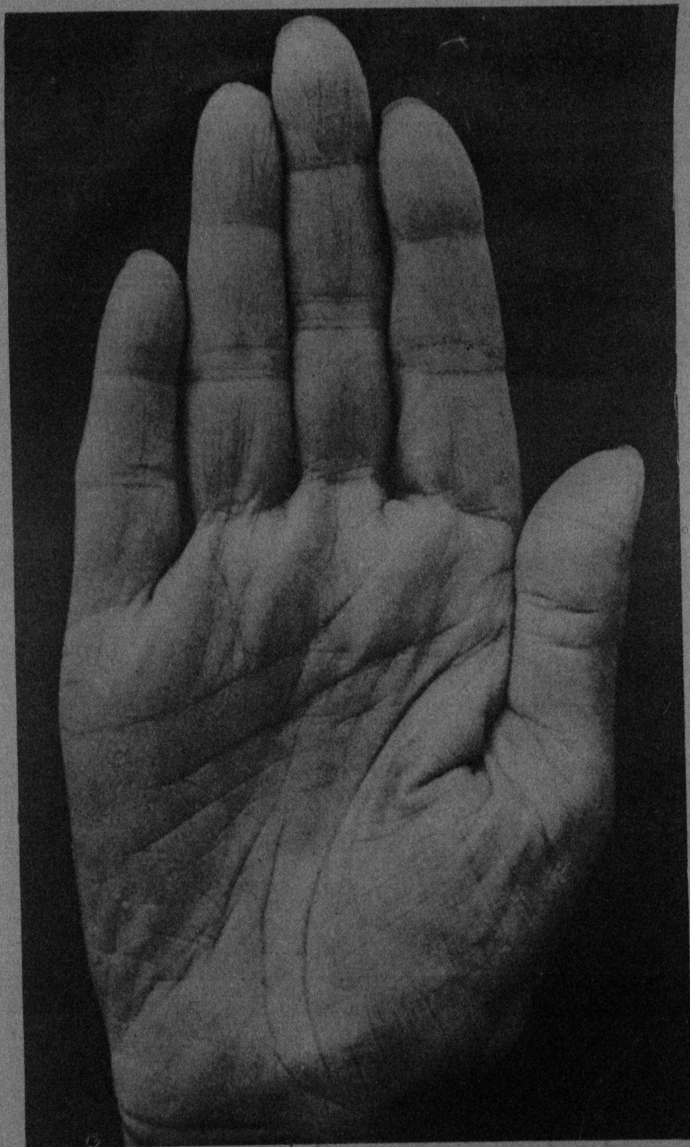

3. Numbers 20 to 29 is the third portion. In this part of explanation number 2 takes over from number 1 and supports the rest of the numbers till 29 and add self-characteristics to the related numbers.

4. Now in the fourth part we are left with only two numbers and they are numbers 30 and 31. Number 3 acts the same way as number 1 and 2 did in the previous portions of this part of this book.

Now number 30 and 31 have got characteristics of number 3 and 13 very much in common. But still they need explanation separately for which I would request you to note the facts relating to these two numbers that belong to the fourth part.

The subject born on 7th day of the month with Mixed type of hand.

The subject born on 26th day of the month with Imaginary type of hand.

Date of birth : 30th of the month (combined number)

Number 30 will combine 3+0 and in one digit it becomes number 3 as 0 is a silent number in numerology. So the characteristics of number 3 are mainly to be taken into consideration.

Number 3 is the number which stands for Jupiter. They are bold and the possessor of this number is highly ambitious and they are never satisfied on subordinate position in business and service. They love to rise, have control, and exercise authority over others. They become great commanders. They like discipline in all matters. They are very forceful in carrying out their plans and objectives. They obey and make others obey. The people born under the influence of number 3 are mostly in service and if they by chance are in Armed Forces, then they make an ideal match as this is the most suitable career they could enter in.

Number 3 people never know to surrender at any stage. They have vigour, vitality, and stamina to be supported with. They qualify as ideal commanders. If they are in civil service, they add discipline of highest kind while performing their duties.

In business, number 3 is an ideal number, provided along with discipline they have diplomatic qualities.

Bad Aspects

Number 3 has got a dictator like qualities. They lay down their own laws and force for their rules, plans and ideas to be executed and while doing so they make opposition and enemies. In spite of the fact that they are not quarrelsome, they make a lot of rivals who create problems in their way. They have short temperament and are proud. They dislike any kind of obligation from others.

Opinions and Suggestions

So far as my personal observation goes, number 30 is a number which is well balanced with bad and good characteristics.

Number 30 is a very good number if the possessor is logical and deals in a most diplomatic manner. While doing so, the possessor of number 30 achieves high positions and does not create any problems for their objectives. The subject has got

all the good and fine qualities and they put best efforts in a most practical way. Though Mars is a dominating planet which gives strength and stamina, it also reflects at the same time short temperament. They are advised to control it. They must weigh their ambitions and desires and clearly judge their ambitions. While doing so, success is sure in their life. It is not desirable to be a dictator in life, and for this reason they should be tactful and considerable in life.

Favourable days : Thursday and Friday.

Lucky colour : Purple.

Date of birth : 31st of the month (combined number)

The number 31 will combine $3+1$ which makes number 4 as a single and independent number.

Now 31 represents $3+1$ and both the numbers are highly practical, full of vigour and vitality in their respective ways and both go shoulder to shoulder with each other. They are inventive, highly ambitious. They observe discipline in all the matters. They never would like to be on the subordinate jobs and positions. They are extremely faithful in carrying out their duties. They never take obligations and if ever someone obliges, then they would like to compensate the obligations. They are creative and positive and definite in their views.

Number 31 collectively has to share with both numbers 3 and 1. Number 4—the total of $3+1$, though hardly quarrelsome, has still got hidden enemies who will always be vindictive. And the people related to this number are jealous about their prosperity and progress in life. They seldom get friendly, but friendly relations usually betray them. Number 31 mostly gets financial and emotional betrayals.

Bad Aspects

Number 31 is highly temperamental. They get easily excited and are mostly short tempered. Their family life is not good. Though they are not bad at heart, they are badly betrayed. Because of such treatment and circumstances they become highly pessimistic and because of this nature they mostly lost good opportunities and good people in life.

Opinions and Suggestlon

As I have mentioned earlier, it is a very fortunate number to possess. It is an ideal combination of two numbers 3+1. Both the numbers are full of achievement of worldly and materialistic profits and gains. They look thoughtful as their ambitions are very high. Even though they achieve good positions in life, they are never contented and will keep on struggling in their life till the last day. They never get mental contentment and peace as it is not a spiritual number. They are pessimistic which is another reason of their discontentment in life.

Favourable days : Monday and Tuesday.

Lucky colours : Light yellow and purple.

READING OF HUMAN PALM

What is Palmistry? It is the study and reading of the human palm. The word 'Palmistry' was probably derived from old Greek word *mastery*. Palmistry is the science of telling fortunes of a person, his character, aptitudes, tendencies, his past, present and future by reading the shape of hands, the lines, marks, and the individual features of the mounts, fingers and thumb which make up what we call the palm.

No other part of the human body arouses so much curiosity and interest as the palm does. No wonder that a whole science of prediction has grown around the palm. Thus, the study of the features and peculiarities of different kinds of palms becomes both necessary and purposeful.

For the purpose of this book, I would like to confine myself strictly to the palm as observed from the bracelet lines at the base to the ends of the digits, the thumb and the fingers. It thrills one's heart to know that all these characteristics of the palm were already there in the germ cell at the time of birth* in the embryonic form. How true and meaningful is the expression : "the destiny that shapes our life!"

As we begin this study, let me make it clear that the word *hand* is used for *palm*, for no other part of the hand is involved in our study here.

HAND

Types of hands : From my study of many well-known palmists all over the world, I find that usually hands are classified into seven different types on the basis of shapes, sizes, proportions, bearing, feel, touch etc. But, from my own study, research and experience involving thousands of hands for the past thirty years, I discovered that basically there are only three types of hands. My conclusion regarding these three categories naturally is the result of study of hands of persons that have come to consult me. The other categories belong to the majority of people whose life styles are set by a common course. In palmistry the effect of climate on the lines of the palm should not be ignored.

The three categories of hands are practical, imaginary and mixed type. These explanations will only be indicated by the

shape of hands. These may be contradicted, or supported by other factors of the hand, *i.e.*, lines, mounts or fingers.

The practical hand : The term *practical* here means being practical in life.

The imaginative hand : I am using the word *imaginative* to include both creative and destructive types of imagination.

The mixed hand : This category has the characteristics falling between the *practical* and the *imaginative* types. It is also a combination of some features of each type. The mixed types are those which reveal influences and counter influences of both the types in most cases.

THE THUMB

You must have heard the expression : 'he is under my thumb' The thumb indicates will-power, individuality and independence of action. It also stands for logic. Hence, it has acquired great importance in palm reading. Special attention is paid to the study of thumb in my present study.

THE FINGERS

The fingers take their names from the mounts on the palm to which they are diagonally related. Thus, they naturally acquire the characteristics of the respective mount they stand on. The first finger which is commonly known as the index finger is known as the finger of Jupiter. The next or the second finger is called the finger of Saturn. The third or the ring finger is called the finger of Sun. The fourth or the little finger is known as the finger of Mercury.

THE KNOTS

Lines formed at the joints of the phalanges of the digits, the fingers and the thumb up to their respective bases on the palm are called the *knots*.

THE MOUNTS

Around the central cup portion of the palm lie specific regions called the *Mounts*. Each mount represents significant influence on the life of the subject. I now describe the names of the eight mounts and what they stand for in terms of prediction nature and temperament. Later in this book, I am giving the actual reading from photographs of palm prints. The usual exercise is intended to make learning of palmistry much easier.

The Mount of Venus : The mount of Venus denotes love, lust, attraction to the opposite sex and sense of harmony in relations.

The Mount of Mars First : The mount of Mars first is significant for aggression, quarrelsome nature and physical stamina to fight.

The Mount of Jupiter : The mount of Jupiter, the most important mount, signifies zealous pursuits of ambition and determination in realising it.

The Mount of Saturn : If this mount is found depressed—not elevated, it is seen for judging the seriousness of the mind, for action and materialistic gains.

The Mount of Sun : The mount of sun pertains to success in life, is as important as the mount of Jupiter. It particularly denotes the extent of brilliancy.

The Mount of Mercury : The mount of Mercury represents practicality, and adaptability to business and profession, and thus, symbolises materialistic gains and success. It is given the same kind of importance as in the case of the mounts of Sun and Jupiter.

The Mount of Mars Second : The mount of Mars second stands on the same footing as the mount of Mars first. It is linked with aggression with full support of vigour, temper and courage to the subject.

The Mount of Moon : The mount of Moon represents imagination and enables us to discover different characteristics and effects on different hands.

The Lines of the Palm : We have two types of lines, namely, the principal lines and the supporting lines. I am giving here the names of the principal lines and indicating briefly what they stand for. This will enable you to get a complete picture of the palm for reading in detail. I will be giving detailed explanation for each line also, separately.

The Line of Heart : The line of heart, also called the Heart line, is concerned with one's ownself and naturally reveals the subject's emotional nature, generous behaviour and his affection. All our innate desires in life and the intensity and depth of our inner most feelings are related to this line.

The Line of Head : The line of head or otherwise called the Head Line stands for the nature of the mind of the subject, giving us an idea of his intelligence. It at once reveals his mentality and sense of judgement. At every point in our life we have to judge between different courses of action or, make a general assessment of the situation, between the good and the bad, between the useful and the useless and so on.

"Two in One" Line : We have rare instances of persons on whose palms the Heart Line and the Head Line are merged into one line. This interesting formation is found in a minority of cases. I call this line "Two-in-one" because it is actually two lines forming one single line. It must be pointed out here that it is impossible for a subject not to have the Heart Line or the Head Line. In rare cases, however, God in his wonderful creation merges both these lines in one. I am dealing with the importance and significance of the "Two-in-one" Line in details in the later pages separately with illustration.

The Line of Sun : The line of sun or Sun Line is the line indicating success in life. Brilliancy, particularly intelligence, taste, aptitude, and success in art, literature or pursuits of wealth are associated with this line. Possessor of this line can look forward to a life full of success.

The Line of Fate : The line of fate or Fate Line is what in popular language is called Fortune Line which influences the possessor by chance or fortune, either good or bad, particularly with regard to financial gains or losses.

The Line of Health : The line of health or Health Line has been given great prominence by other palmists, but personally, I feel from my experience that such undue importance to this line is not justified by the hands I have observed. With this conviction, I have been dealing with it as the line of Mercury and therefore, as a line of support to business or profession.

The Line of Life : The line of life or what is also called the Life Line, stands for a person's vigour and vitality and for his span or duration of life. Naturally, it should deal with health factors, which change from day to day in the subject's life.

The Marriage Line : The marriage line and the lines of romantic attachments and those indicating birth of children may be grouped and treated together. These lines relate to permanent or long lasting emotional ties. In later pages, with the help of illustration, I shall be assisting you in locating and interpreting each line in a special way. Once you know clearly what these lines stand for separately and in totality, it will be easier for you to identify similar lines on different hands.

Travel Lines : There are separate lines on the palm that indicate travel. During a person's life, he or she may have to travel to distant lands. Such journeys and the period of their occurrences can be easily read from these travel lines.

Good Signs and Bad Signs : There are certain special signs which indicate that they may bring either good luck or bad luck to the subject. With vast experience, I have found that chains, loose dropping of lines, islands, crosses and stars are indicative of bad luck, whereas rings, squares and certain other signs in significant positions foretell good luck.

THE RIGHT HAND AND THE LEFT HAND

From the photographs of palm prints given in the book, you will find that some show right hands and some left hands.

My advice to all students of palmistry is that they should always examine the hand which the subject uses normally with ease and only thereafter, they may supplement it by reading the other hand for staisfying curiosity.

TYPES OF HANDS

The Practical Hand

Plate No. 1 is an example of hand belonging to the practical hand. The characteristic features of such a hand are that it is proportionately well-balanced in the area of the palm and the span of the thumb and the fingers. This type of hand may be called square, as viewed from the base close to the wrist to the base of the fingers and width-wise between the lateral edges. In such a hand, the fingers also match well in their lengths and are in squarish formation, with parting distance between them being equal and the knots in proportional difference. It has a firmly held thumb which is placed well on it. There is an ideal balance between the upper portion or cap indicating will-power and the lower portion symbolising logic. The palm has very few, but useful and meaningful lines. When you go in for a detailed reading you may consider the practical hand as a square type with less lines and judge it along with the general characteristics which I have given.

If you are interested in a brief reading, I must say that persons with this type of hand are the most practical in life, or to use the common expression "down to earth". Such persons put in the right efforts to achieve their objectives. They conquer all the obstacles, without surrendering to the circumstances. You may go into other points of consideration by studying this type of hand and identify the successes and failures of the subject. The illustration I have given may well serve as a model for your future reference in respect to a practical hand. One can gain mastery only by looking at a variety of hands. You can become such an expert that by merely glancing at a hand you can say at once if its owner is of the practical type or not.

The Imaginative Hand

I must make it clear what an imaginative hand means. English words are peculiar and may mean different things under different contexts. Lest you misunderstand the sense in which it is used here, I want to give you its correct meaning. Please remember that this type of hand includes persons of both

constructive imagination and destructive imagination. The hand illustrated on plate No. 2 is a clearcut example of the imaginative type of hand, in contrast to the practical type of hand. This hand is typically long in respect to the palm portion and the fingers with pointed ends, taken together as well as separately. There is a natural flex in the thumb which bends backwards of its own accord. On the whole, the hand can easily be made out by its pleasing appearance.

Those who have such a hand can, briefly, be said to possess ideal imagination, artistic views and a special attraction to artistic surroundings. They are natural lovers of poetry, with a fondness for beautiful appearance and dress, good and soft music. Although they may not be good artists themselves, they are prone to live and move in their own imaginary world, with a capacity to appreciate art. You will find from experience that this type of hand, which corresponds to the broad and meaningful classification I have discussed here, belongs to a variety of artists, screen and stage actors and actresses, writers, poets, painters etc. The intrinsic quality of all such people is a rich imagination. They also include day dreamers of the most unpractical type, and also those who are victims of extreme fears, often irrational superstitions and the like. With this background the readers should study the case histories explained later so that he learns to have the knowledge, how in a particular situation the subject with an imaginative hand faces life in reality. Much of this art of foretelling depends on the intuitive grasp of the meaning of the lines born of experience.

The Mixed Hand

If you look at the hand given on Plate No. 3, you will find that the hand has mixed features with regard to the shape of the palm, the positions of the fingers and the thumb. I classify it as a type between the practical and the imaginative from my personal assessment of the mixed type, I have found that the owners of this type of hand are confused sort of people and often frustrated in life. They may be very practical in their worldly affairs, but one must point out they are not purposeful in their efforts. They lack the ability to think on their own and are easily guided by the advice of others in respect to any proposal or project that appears attractive, and take action without acquiring the requisite knowledge. They give up

half-way in their attempts and feel frustrated when they do not succeed. Later on, in the course of our study, I will be giving a number of cases with the mixed type of hand, with their successes and failures, conforming to the majority of this category.

THE THUMB

The most vital and significant part is played by the thumb in one's hand. You will notice that the thumb differs from the other fingers in some respect. In the first place, it has only two phalanges whereas the others have three. Secondly, you can move it freely and in such a manner that it can easily touch the other fingers. Since ancient times, the thumb has been accorded the greatest importance in the art of palmistry in primarily judging the strength of the character of a person. The thumb, thus, becomes the dominantly guiding factor in reading a hand and consolidates your findings after taking all the factors into consideration.

Now, we will consider the place of logic and will-power in reading palms. I must at once tell you that the lower part from the central knot to the base line of the thumb represents a person's logic, whereas the upper portion, that is above the knot of the two phalanges symbolises will-power. Every normal human being possesses a thumb in his hand, but only an experienced palmist can judge the extent of one's logic and will-power from the shape and position of the thumb. You will realise from the different pictures of hands given in the later pages of this book that logic and will-power stand with different meanings and different applications in practical and imaginative types.

At this stage, I am giving the description of the thumb for the readers wherein it primarily represents the subject's logic, will-power, individuality, and independence of action. But, for an understanding of the role of the thumb in the individual's character and life, I am giving here ample illustrations of three types of hands with reference to the thumb.

The Thumb on a Practical Type of hand

Turn to plate No. 4 for a reading of the thumb on a practical hand. Free will and independent action are indicated by the

wide gap between the fingers and the thumb. A person of this type strikes out his own independent career without following the ideas or ideals of his elders or fore-fathers. If in business, he takes to a profession of his own liking and chalks out his own way in all matters. The thumb as seen in the plate is that of a practical type. Rarely does a person of this type listen to the advice of others, as you will see from the wide gap between his logic and will-power which are divided by the knot. You will observe from the illustration how the logic portion is longer, with a fine line dividing the portion itself which thereby adds further strength to his logic and his own line of thinking. We may say that he is the master of his will by a means of his own logic.

The top portion of the thumb which I call the cap of the thumb, indicates the will-power of the subject. In this particular illustration, you will observe that the top portion is erect and straight without the slightest bend towards its back. A person with this type of thumb is not influenced by others' influences with respect to advice. He is never flexible and does not show any weakness to surrender himself to even well-meaning guidance from others. There can be no doubt that he possess a strong will-power. With a practical hand, he cannot help being self-assertive.

Now, to sum up the reading of this hand, the square palm and fingers in even display of square pattern indicate the practical type; the wide gap between fingers and thumb means that the subject exercises his free will and is not dominated by others; his logical capacity is seen in the major portion of the thumb, the dividing line points to correct discretion; and the top portion of the thumb—the cap is erect and straight, without any sign of flexibility or of bending back, implying that the person is endowed with a strong will-power. A person of this type fights his way to success, unmindful of obstacles. His firmness and stubbornness make him follow his own life-style, not caring what other say or think of him. You will observe from the illustration that the subject's thumb is comparatively long considering the square type of hand and the proportionate fingers.

I must here warn the reader, as I come to the end of this case, that this is only a general reading of the thumb. Later you will come across cases where I will present readings of the

thumb with reference to lines, mounts and other signs of the palm, whatever be the type.

The Thumb on an Imaginative type of hand

What role does the thumb play on an imaginative type of hand? I refer you to plate No. 5 in this book where this type of hand is illustrated. One look of this hand clearly tells the reader that its owner is a person with an enormous power of imagination. Naturally, the thumb is long in proportion to the fingers. It is medium in size, with the portion representing logic almost equal to the portion symbolising will-power, called the cap of the thumb, as mentioned earlier. Please note the contrast between the structure of the thumb in this picture and that in the illustration of the practical hand (Plate No. 4). You can at once recognise in the present picture how markedly flexible is the thumb and how it bends towards the back, showing that the owner of this hand is weak or highly flexible, not only in action but in ideas, attitude, thoughts etc.

If you are to make a general reading from the thumb of this type of hand, you have to pin-point the fact that the subject has the habit of imagining impractical things, or to use the popular expression, building castles in the air. People with this mental make-up are fascinated by big schemes, by mere stretch of imagination, without any realistic approach to the problems. They are easily influenced by others as shown by the flexibility of the thumb. They are fickle-minded and keep changing from one idea to another. Since they are not capable of taking independent action, they lose many opportunities of success in spite of fertile imagination. We call their schemes idealistic and impractical.

And yet, among these class of people, you will find many successful persons. Some are famous writers and renowned artists in different fields. Others have attained fame in science and technology, by their inventions and discoveries, born of their rich imagination and outstanding work. It will be dealing with these cases in relation to the lines, mounts and other sign of the palm.

The Thumb on a Mixed hand

The thumb on a mixed hand illustrated on plate No. 6

shows how different it is from the other types I have discussed earlier. You can see clearly that it is of the mixed type which is more prominently seen in respect of length and which is wider towards the base. The thumb being comparatively short, signifies a character which is timid and whose thinking is narrow in outlook, without any hint or sign of broad-mindedness. On a short thumb you will naturally find that the logic portion is also shorter, which means that the subject is not logical in his thinking. In a general reading of such hands, you can say that the persons belonging to this type are easily controlled by circumstances. For instance, if they happen to be in the company of gamblers, you can take it for certain that they will stake their last paisa to the point of utter financial loss. Such actions result from their inability to reason out what they are doing, for they fall an easy victim to circumstances over which they have no control. It is only when a man's will-power is based on the power of reasoning that it results in action dictated by will. When there is no such reasoning, how can you expect action directed by will? The word 'visionary', will suit persons who possess such a type of hand and thumb. They are merely guided by their instincts and temptations. To change the attitudes of such people and show them the right course is a difficult task.

As you know, every rule has an exception. Thus, person of this type have exceptions too. I have found in my experience some people in this category endowed with good fortune, but they are cases of inherited wealth which was slowly wasted in the course of their lives. Although there are exceptions, the general characteristics of this type remain the same indeed, the saying that "exceptions prove the rule" holds good in this case.

The Clumsy thumb

Plate No. 6 A shows a unique thumb of a rare kind. Many eminent palmists have held the views that if the thumb is clumsy and club-like it denotes criminality. I have not found this to be true. In my experience, I have come across hands in which the thumb is like a club, with the will-power portion or what I call 'the cap of the thumb' being clumsy in shape, thick and rounded, resembling a club, which is far more thicker than the lower logic portion. Other palmists might say that

these types have marked criminal tendencies, but I have personally found them leading respectable lives, both individually and socially. I have verified them against the hands of a number of criminals in jails, guilty of some of the worst crimes, and found that they bear no resemblance to them. I would advise readers to study this type of thumb carefully and try to find out the truth of my findings whenever they come across such thumbs.

Please note the illustration on plate 6 B which speaks for itself. It is, indeed, a good hand, with no criminal tendency. And yet, it has a clumsy thumb. Most palmists would give one look at the thumb, the top of which symbolises will-power, and seeing it clumsy in shape, thick and round, and much more thicker than the logic portion, at once jump to the conclusion that the owner of this thumb is a heartless criminal. On the other hand, I look at the palm as a whole and find that the possessor of this thumb is quite a respectable person leading the life of a good, law-abiding citizen. I have visited many jails and made a study of the hands of criminals. Surprisingly, they do not possess such thumbs known as the clumsy and criminal thumb. My earnest request to readers is that if they have a chance to study the hands of criminals they should keep in mind the guidelines I have given here and satisfy themselves. For it is not only my experience in our own country but also my experience abroad.

THE FINGERS

In palmistry, the fingers have an importance of their own. Forming part of the palm, their significance is brought out in the specific cases for reading in relation to the mounts with which they are connected. Considering the fingers lengthwise, they are normally in proper proportion to the type and shape of hand. The first finger is also called the index finger because we point that finger to show some thing. It is related to the significance of the mount of Jupiter to which it is attached and is therefore called the finger of Jupiter. Similarly, the second finger which is related to the mount of Saturn is known as the finger of Saturn. The third finger or the ring finger is the finger of Sun and should be examined as possible support to the mount of the Sun. The fourth finger or the little finger is the finger of Mercury joined to the mount of Mercury which represents

Plate 11. Mount of Mars I (Near the Thumb)

a practical nature and adaptability in business matters. As you see, the mounts are at the base of the fingers. So the respective mount gains strength from the type of finger attached to it. To illustrate the important role played by the fingers, I have given here the photograph of a hand (Plate 7) wherein you will find that the finger of the Sun is longer than the finger of Jupiter; for normally, the two are of the same size and length. Here, the exceptionally longer finger of Sun excites your curiosity and you find the meaning of this in the strong support if given to the mount of Sun to result in some extra-ordinary success gained by hook or crook. In this connection, I would advise you to examine the photograph on plate 7-A, where the Jupiter finger is bent towards the Saturn finger and the Mercury finger is bent towards the finger of Sun and draw your own conclusions.

THE MOUNTS

The palm of the hand has always aroused curiosity of man since ancient times. The wise men of the past saw some connection between the lines of the palm and the events in life of the owner of that palm. Thus, began the study of the fascinating subject of palmistry. What the mounts indicated gave a true picture of the qualities and characteristics inherent in the subjects and their impact and reaction on their lives for good or bad. One has only to chart the eight mounts on the palm to find out what kind of a person the subject is.

Each mount has a specific relationship with some particular aspect or aspects of the subject's character and qualities. In the earlier pages, I have already given the different names by which the different mounts are called, with brief descriptions of what each stands for. I should make it clear in this connection that in palmistry these mounts, although take names after the different planets, have nothing to do with planetary influences which you hear talked of in astrology. The eight mounts cover in their entirety the fleshy regions of the palm. Each mount has to be examined for its degree of prominence, and to find out if it is developed or underdeveloped. You also look for specific lines and signs, if any, with which it is to be read. Now I am going to take up the description and interpretation of each mount for its prominence on the palm with appropriate illustrations to guide the reader in a scientific way. For convenience, I have started with the mount of Venus and have completed the study of all the mounts in an anti-clockwise sequence of their positions in the palm. It does not matter in what order you take up the study of the Mounts; what is important is your thorough grasp of all that pertains to each mount in its totality.

The Mount of Venus

The Mount of Venus is the specific area under the thumb, based from above the wrist, bordered by the line of Life and extending up to the next mount, the Mount of Mars first. I have given plate No. 8 in this book as an illustration. You will notice that the area occupied by this mount is comparatively larger in the palm.

The degree of prominence of the Mount of Venus is examined when you have to judge the qualities of affection, warm or cold temperament, love for the opposite sex, and such other characteristics that draw a person to everyday pleasures of life.

Mount of Venus on Practical Type of Hand

Please turn to plate 9 where you have an illustration of a highly developed Mount of Venus on a practical type of hand. Such a mount denotes that the subject is highly sexy and has the tendency to give himself up freely to this urge. If this excessive development of the mount on practical type is not restrained by the existence of fine lines of Head and Heart, the result is that the subject will become possessed of uncontrollable violent lust, almost bordering on sex madness. The subject, in such cases, may even attempt at rape. This will depend upon the will-power of the person to act or not to act, for which the indication has to be found in the examination of the thumb. In such a case, the excessively prominent mount does not necessarily indicate the truly warm and sincere love towards the opposite sex. In a word, it denotes animal passion.

The Mount of Venus on Imaginative Type of Hand

You will notice that usually a prominent Mount of Venus goes together with a well developed Mount of Moon which lies side by side in the palm. The owner of such a palm is a good lover with an aptitude for idealizing his love. He is easily recognised as a very romantic and highly emotional type of person and you can take it for granted that what he professes is true love and not something made-up or artificial in nature. In all such persons, the good is the satisfaction of their mental and emotional pleasure and not mere sexual pleasure. If these individuals have companions with similar prominent mounts, they make ideal mates. If suppose a person with this prominent mount combination of Venus and Moon falls in love with a person selfish by nature, such a person will be a victim of betrayal. That is to say, the person will not get true friendship and love in return. If, however, the person has a thumb indicating good logic and will-power, it is possible that a victimisation of betrayal can be averted

and the shock and consequences can be overcome. But if, on the other hand, the subject has a weak thumb indicating very little logic and will-power, there is only frustration, pessimism and loneliness for such a person. In some cases, the tragedy strikes the person of imaginative type with such force that suicidal tendencies are let loose. When you deal with person of this type, you are advised to study both the good and bad signs in the thumb and also the lines of the palm.

The Mount of Venus on a Mixed Type of Hand

Please turn to Plate No. 10 of this book. It is a photograph of a mixed type of hand with a prominent Mount of Venus which represents intensity of love and an over-possessing nature. The mixed type, as I have already explained earlier, lies somewhere between the practical type and the imaginative type. Subjects with this type of hand are prone to become creatures of circumstances with respect to emotional or purely materialistic attachments. You can be certain that a subject with a prominent Mount of Venus and without the supporting lines of development towards success, will be a regular failure in love affairs. Add to this the sign of imaginative character, and you will find that the failures lead to a sense of utter loneliness and deep frustration. A careful examination can show whether the failure is indicated as an established fact or if mere flirtation has led to frustration. There can be indications whether the subject has succeeded in love, from the flirtatious stage to the final expression of love.

The Mount of First Mars

What is the Mount of first Mars? It is the area covered from the upper fringe of the Mount of Jupiter lying above under the base of the first or index finger, the finger of Jupiter as shown in Plate No. 11. I have known other palmists calling this mount as Lower Mars. But there is a reason for my calling this Mount the first Mars. I will explain. In my calculations, this Mount comes first and in lateral line with the Mount of the second Mars, which comes into reckoning later as supporting the first in quality and character. The Mount may be found to be separated from the Mount of Jupiter either by the line of Head or only by the line of Life which starts

from the gap between Mars first and Jupiter Mount and takes its course towards the wrist.

Depending on the degree of prominence, the Mount of first Mars represents fighting spirit, perseverance to attain the objective of life or adherence to faith. Please note that this Mount is remarkable for professional soldiers especially those with an aggressive character. If you find this prominence in a civilian hand, you can be certain that the subject has stamina, courage and strength of character to overcome obstacles in life or to reach the chosen goal of life. Plate No. 11 gives you the illustration of hand with highly developed mounts of Mars first and Mars second.

I would advise the reader to keep in mind the type of hand, the thumb and to observe how prominent the mount is for their assessment. If good lines and favourable mounts support this development, it is meaningful and relevant for a unique assessment of the subject. Otherwise, the Mount should be taken to indicate a perverse, impatient and intolerent nature and a bad temper, in leading a life of tension. Such individuals make enemies easily through their vicious attitude and bad temperament.

When you see a prominent Mount of first Mars, it is an ideal compliment to a developed Mount of Jupiter, the Mounts leaning on each other. If this development is further supported by the Mount of Sun you may easily foretell extraordinary success and fame of the subject, especially through stamina and courage.

When the reading is adverse on the basis of the subject's bad temperament, one should examine the thumb to see that the exercise of logic and will-power may properly control the negative trait. The prominence of the Mount of first Mars becomes an asset when it is supported by indication of good logic and strong will-power and other good lines and mounts at the same time.

The Mount of Jupiter

The Mount of Jupiter illustrated on Plate No. 12 of this book is important from all points of view for every type of hand. Can you identify it? It is just below the base of the first finger or what is called the index finger, occupying the space on the palm from the edge and side upto the adjacent fringe of

the next Mount of Saturn on the other side and from the base of the first finger at the top of the Head Line below and upto the start of the Life Line.

When the Mount of Jupiter is predominant, it indicates achievement, name and fame, depending on the degree of prominence. If the Mount of Sun is also prominently developed in the palm, it can be taken as certain that the subject is assured of success in life, along with name and fame. This characteristic feature of the two predominant Mounts of Jupiter and Sun on the palm belongs to all famous political leaders, great social workers, prominent writers and artists, etc. Such persons do not need any introduction as their names are well-known, having distinguished themselves in their individual fields of endeavour. They are very respectable persons and by virtue of their greatness and nobility live in the hearts of the people.

When, however, you find a ring or a square or both on a well developed Mount of Jupiter, these are deemed as good signs, bringing added merit. I will be discussing such cases later. Let me take this opportunity of mentioning also the inauspicious or bad signs on a developed Mount of Jupiter, marrying the effect. The bad signs are a black mole, cross or a star. I do not agree with these palmists who consider that a star is a good sign. My experience of reading countless palms has shown me that the cross and the star are bad signs in any portion on the palm.

You can be certain in all cases that when a palm displays a developed mount of Jupiter, its owner is a highly ambitious individual. So, whenever ambition has to be spotted the only significant Mount to look for is the Mount of Jupiter. But remember, if real achievement is to be predicted, this mount requires the support of the other mounts.

The Mount of Saturn

The Mount of Saturn, as seen in the photograph (Plate No. 13), in the small fleshy region under the second finger which is the longest finger and named the finger of Saturn as it stands over this mount. The peculiarity of this mount is that it is the only mount in the palm found mostly as a depressed one in the fleshy area and relatively small for the size and length of the connected finger, that is, the finger of Saturn. It lies adjacent to the Mount of Jupiter on one side and the Mount of Sun on

the other. Its lower boundary is the relative portion of the line of Heart.

I have come across very few hands wherein the Mount of Saturn is a raised fleshy pad comparable to the other mounts on its sides and rising above them. The mount indicates materialistic gains in purely worldly pursuits. The depression seen in most hands on the Mount of Saturn speaks of the spending away of gains. The examination of this Mount should reveal the degree of our zeal or seriousness and the comparable results of our actions.

In the photographic illustration (plate 13) which I have chosen, the Mount of Saturn is seen somewhat well-developed. Even this much of development is found in a minority. People possessing such a mount are generally quiet by nature but are mentally extremely active. They are steady in persevering their plans for making gains.

It is to be noted that a predominant Mount of Saturn indicates that the subject is greedy. It shows to what extent he will go for the sake of making money, without any consideration as to what means he is employing or the kind of people he is employing or the kind of people he is exploiting.

In my vast experience of study of innumerable hands with very highly developed Mount of Saturn I have never found such people satisfied with the profits they have made. They are not content even when all wants for material security have been realised. When a predominant Mount of Saturn is found on a practical type of hand, without the lines of Head and Heart making for moderation, the subject will be cruel, often extracting and extorting money for material benefits. In such cases, the palmist can look for signs of ruin or reverses for factually advising the subject of the dangerous consequences of his ruthless actions.

The Mount of Sun

You will remember the importance I gave to the Mount of Sun when I was dealing with the Mount of Jupiter. There is the common expression "Sunny side of things", meaning the bright side of things in our life. It is opposed to the gloomy aspects that make life miserable. The Sun symbolises cheer and happiness. Thus, the Mount of Sun spells all-embracing success.

Looking at the photograph (Plate No. 14) of the hand, you will see that the Mount of sun occupies the space in the palm under the third finger, commonly known as the ring finger, or what in palmistry is called the finger of Sun. The lower edge of the mount is up to the relative portion of the line of Heart and the adjacent margins are with the Mount of Saturn on one side and the Mount of Mercury on the other. One has to note its spread, its rise and its leaning towards any of the two adjacent mounts in my assessment. Its development should be viewed in comparison to the Mounts of Jupiter and Mercury.

An individual Sun Line on a well-developed Mount of the Sun is a sure indication of unqualified success in life, at any rate in some point of one's career without fail. Besides success, the mount indicates other specific characteristics attributed to it. If the mount has many lines on it, as is commonly seen on Imaginative type of hand, it means that the subject is inclined towards artistic values in life. Such individuals love to live in artistic surroundings. They are lovers of music, of fashionable and beautiful clothes and tastefully decorated homes and environment. Although they may not be great artists themselves, they have an eye for art, and their taste can be seen in the great sense of appreciation for the fine arts and, indeed, art of any kind.

But when the Mount of Sun is not developed, it should be read in conjunction with certain important lines on the mount itself which reveal many facts of life of the subject.

In some cases, the Sun Line is fairly deep, so much so that it divides the mount into two portions. I personally find that this is not a damaging position, but it strongly indicates brilliancy and success at home and fame in consonance with the mounts of Jupiter and Mercury, the latter associated with business.

The Mount of Mercury

As shown in plate No. 15, the Mount of Mercury is the last mount in the top row of mounts of the palm. It occupies the space under the fourth or little finger, called the finger of Mercury from the base knot to the line of Heart and from the edge on one side to the adjacent Mount of the Sun on the other.

The significance of the Mount of Mercury is realised when the subject's probable success in business, trade or industry or in profession where profit is the main aim, are assessed. Thus, this mount is related to world by success and prosperity.

If the Mount of Mercury is predominant in the palm and is aided by favourable lines of Fate and Sun, and in addition, its own line (to which I shall be coming to later), the subject should be a successful businessman. This can be confirmed with certainty if you find a reasonably wide gap between the finger of Mercury and the finger of Sun as compared to the gaps between the other finger. You can predict independence of action if the subject has a good thumb. Besides, with a predominant mount—Mount of Sun, you can be quite certain that the subject will be a highly successful businessman, particularly fond of travelling for promoting business.

I am never tired of emphasising the importance of the Mount of Mercury to my readers because it will always draw their attention when in most cases the subjects show their hands, much worried about the future of their careers, investments and other problems related to these matters.

The Mount of Second Mars

What is called by many palmists as the Mount of Upper Mars (See plate No. 16) is named by me the Mount of second Mars. Why is it so, you may ask. It is precisely because of its position in line with the Mount of first Mars laterally and more so for lending support to the characteristic quality of the first. Lying on the vertical plane of the palm between the Mount of Mercury at the top and the Mount of Moon below, this mount is not particularly prominent to look at in most cases. But you will see it projects in specific cases for lending support to the courage, bravery and aggressive spirit shown by the subject in view of a predominant Mount of first Mars.

Can you locate the Mount of second Mars? Clearly it is under the line of Heart and whether crossed by the line of Head or not, it lies contiguous with the mount below, that is, the Mount of Moon. Please note the fact where you see practically no division of the Mount of Moon. You should allocate half the area of the continuous high land to the mount of second Mars.

This mount gives you the characteristic reading relating to stability and stamina with reference to the aggressive qualities of the subject supported by the Mount of first Mars, particularly when the principal line, rarely, the line of Head enters the territory of this mount conspicuously without bending down. If the subject has a practical hand, practical ways are employed by the person to fight the issues to the very end, without bending or accepting defeat.

The Mount of Moon

The Mount of Moon (Plate No. 17) is a large mount on the palm, second only to the Mount of Venus, lying next to it, but clearly divided by the line of Life and by the natural depression in the palm between the two mounts.

This mount is very important in reading palms. It indicates the imaginative faculties of the subject. In a large number of cases, it has much to do with some principal lines. For instance, there is the Fate Line which may take the position of being the dividing line from the Mount of Venus or which may take a start on this mount itself; the line of Head may bend and run a course on this mount; and additionally, a line which I attribute as the line of Mercury bearing on business is found running a course from this mount to the Mount of Mercury.

Planning wisely is the result of creative imagination. Therefore, the Mount of Moon should be examined for its prominence and influence on the course of life of the subject, his planning of activities and realising the objectives of life.

The Mount of Moon is also read for the perversity of imagination the subject displays in his behaviour. In such cases, the subject has an outlook which sees only the dark side of things in life. Such pessimism leans towards the destructive aspects of imagination, like suicide, melancholia, neurosis and hysteria. You may get other revelation in connection with the Mount of Moon from the Head Line, the thumb and other good or bad signs.

THE LINES OF THE PALM

We live in a society based on material welfare. Ultimately, all wealth is reduced to property and is subject to property laws. Earlier I have emphasised the factors that go to the making of the individual. Everyone acquires personality as the individual grows. The aim of life becomes the enjoyment of material life. Riches, prosperity, comforts and pleasures are sought as a personal goal. The state today takes upon itself many aspects of social welfare. Individuals engage themselves in various activities for creating and procuring more and more wealth for all-round prosperity.

Human society has evolved into the present state through tens of thousands of years. Man is the outcome of both heredity and environment. Some of his traits are inherited and some are acquired. Palmistry has established that the individual has in his palm the story of his life—past, present and future—written in the sign language of this art. The lines on the palm tell the story and it requires an efficient palmist to read these lines. Lines may get changed in the course of life according to what is already determined and what is to be acquired in life. There is no such thing as absolute freedom of will or absolute determinism in palmistry.

The Heart Line

The line of heart is dealt with by me as the first principal line, because the heart, as the life-giving organ, is most important part of our body. We often use the expression “qualities of the head and heart” of human beings. Unlike other faculties which are cultivated in a lifetime or in a limited period during the living experience, the heart faculty is determined, even pre-determined at the level of a person’s being and therefore of his consciousness from which his heart qualities arise. It is precisely this determined line that I call the Heart Line. In the hand of every individual the Heart line signifies the qualities that condition his life in a big way. Very rarely are the consequences of these qualities in a subject’s life overcome, if, indeed, they can be overcome at all. In exceptional cases, where the persons have realised their faults these consequences have been overcome to some degree.

The normal spread of the Heart Line is from its start at about the edge of the palm or at a position under the Mount of Mercury and terminating or tapering off at a place under the finger of Saturn or the finger of Jupiter at the bottom edge or on either of the mounts, Saturn and Jupiter. The termination may be at any point in the region of these two Mounts on a place higher, middle or lower. The reader will have an opportunity of studying the various ways in which the Heart Line manifests itself in the examples of thirty six case readings furnished in this book with photographs.

At this stage, let me give you the description and interpretation, however brief, with the aid of two photographs (Plates 18 and 18A). The heart, as you know, is the seat of your feeling, desire and ambition and the Heart Line is like a shorthand description of all these qualities manifested in your being. It must be emphasised here that in palmistry no term is used in a frivolous manner and no result is claimed which is not based on experience in real life. This makes the art of reading palms more scientific, admitting of no vague generalisation or "hit-and-miss" methods.

The Heart Line represents ambition, if any, of the subject. From this line you desire for assessment other associate qualities or characteristics that are linked with ambition of particular kind. Thus, the Heart Line is read for finding out whether the subject is ambitious or not and with what kind of ambition; how the ambitions are rooted, whether as a mere ideal or a thing ruled by the heart and with what degree of predominance; or for practical, imaginative or for other quality of action from his head, that is, how the ambition is realised with the support of factors related to other lines and features of the hand, particularly the Head Line and the thumb. In any assessment, the Heart Line is always read along with the Head Line. As you will find from the illustrations, the two are on planes side by side on the palm, each starting from opposite edge of the palm laterally.

You know what it is to be ruled by the heart, to be a slave of desires and ambitions springing from emotions and what makes us desired, to be guided by the head from which action should proceed. So we look for a middle path, a kind of combination of the head and the heart, represented by the respective lines and signs.

We will now take up the examination of the Heart Line

and arrive at a broad generalisation of its interpretations:

(1) If you see the Heart Line close to the upper mounts, it indicates that the possessor is a person of common ambition of a routine life, who can be classified as a dreamy type. You will find generally this confirmed in an Imaginative type of hand. What kind of ambition it is, can be determined by noting the termination of the line on a particular mount whose characteristics are known to us. For example, if it is the Mount of Sun, the ambition is for success, of any kind; if it is the Mount of Saturn and Saturn finger, it is for wealth and material success; and if it is the Mount of Jupiter it is for gaining name and fame or some leadership in the selected line of ambition.

(2) If you find the Heart Line on a plane lower than the upper mounts it indicates a more practical nature of the marked desires and ambitions in life. The nearness of the Head Line will tend to make the subject imaginative and his actions will be ruled by thought for achieving his goal. In the assessment, the disposition of the thumb is an added factor. If a link line from the Head Line is observed, it is something significant.

(3) When the Heart Line terminates under the Mount of Saturn and points to the finger of Saturn it indicates that the subject is cautious in respect of worldly pursuits, based on the fear of failure. Such a subject is very much self-centred and his action is limited to self-interest and gain of selfish ends. Extra carefulness because of fear of failure will reflect a sense of nervousness and frustration.

(4) The termination of the Heart Line at the gap of Saturn and Jupiter fingers will indicate specific ambition for money, showing carefulness in the pursuit of worldly success, with consideration for good name in society. Correct assessment is obtained by the reading of the Head Line and thumb, besides examining type and other signs of palm reading.

(5) When the Heart Line stops at the Mount of Jupiter it shown the common case of a person hankering for a name and social position in society. Such an ambition is quite reasonable but the question is whether this ambition is within or beyond the ability or destiny of the subject on the uncertain course of life. You will find that such persons do not hold small positions, but have the foundation for their ambition for they

cannot rest contented unless they have unqualified success. The hand with such a Heart Line is normally aided by a good Head Line, thumb, a predominant Mount of Jupiter, a good Mount of Sun with Sun Line, and if in business, by a prominent Mount of Mercury. It is certain that without the support from any, or some of these, no success in relation to ambition is ever possible. With all this, ambition, but no good signs for achievement would mean a life of utter misery, a kind of living death. Such a palm should be read carefully and the subject should study ambitions not only from his Heart Line but also from the supporting signs.

(6) A subject with a Heart Line with chains formed by criss-cross particularly with a lifted Mount of Venus needs to be advised to be careful. This has reference to emotional alliances and attachments, with the emphasis on sex relations, in love or in matrimonial affairs, living together etc. The criss-cross chain formation indicates suffering from unfaithfulness and betrayals and sad love life. The reader, in such cases, should examine what type of a hand it is, give importance to the thumb and other factors because the subject can overcome a possible shock by the presence of those factors which give him the necessary strength. A chained Heart Line on an Imaginative hand, bony in structure, with weak will-power and with bad Head Line dropping much towards the Mount of Moon indicates that things are going from bad to worse, because these signs are seen on the palms of persons with suicidal tendencies. It is in such cases that the wisdom and care of the palmist is called for, particularly in giving advice and consolation to the subject and turning him away from thoughts of self-destruction.

(7) There is a peculiar formation of a Heart Line blurred by fibre like little lines dropping off the main trunk, which shows that the subject is prone to financial setbacks through betrayals in partnership or other associations arising out of subject's trust or mistrust. When the Heart Line ends at or under the finger of Saturn, you have a case that should interest you. Here, although the subject is cautious, he is extremely greedy, being an out-and-out materialistic, and he embarks on huge projects for making easy gains. Only a crook with knowledge of palmistry could, without difficulty, drag such a man into his

net! Here, again, the palmist should read the line with the thumb, Head Line and other signs for the redeeming features.

(8) There is another type of Heart Line which points to or stops at the Mount of Jupiter, but with fibre-like small lines dropping off the main trunk. A person with this type of hand, it must be pointed out, is a victim of betrayals and unfair treatment by others on account of his trusting nature and integrity of character, characteristics typical of a Jupiterian. Such a person if he is in business, meets with financial losses through breach of trust by the other party. A palmist knowing the weak point of such a person should caution him against reposing complete trust in matters of business relationship. When one reads hands with this type of Heart Lines it is necessary to look for other factors which may give protection to the subject, in spite of the bad signs on the Heart Line. But the overall result in cases like this cannot be bad. Besides, being a Jupiterian, the subject cannot be robbed of his assets, namely, the grace of his own personality and his name and fame. Nobody can take from him his sterling character.

(9) In dealing with the Heart Line, I must not fail to refer to a link line that you find in one case or another from the Head Line to join it, or from it to join the Head Line. In a manner of saying, it is a case of head consulting the heart or heart conversing with the head! Naturally, it means that it takes away some independence of action, resulting in delay and loss of opportunity.

The Head Line

Now we come to the Head Line or Line of head. Appropriately, it is taken as the principal line next to the Heart Line. Please see the illustration of the Head Line on plate No. 19. The line represents the head, standing for the mind, brain power, mentality, attitudes and aptitudes, the faculty to derive imagination and relate its functions with wide power and logic, reason, unreason, and so on. As discussed earlier in the introduction to the interpretation of the various lines of the palm, the head is the essence of individuality, clearly linked to the consciousness which is from the heart. Heredity plays a vital role in the case of the head and after a person is born he adds

to his hereditary characteristics, the faculties and trends derived from environments, experiments etc.

It is normal for the Head Line to start from the Life Line, and where it is not so, it is much closer to the Life Line. When the Head Line starts separately it indicates that the subject is self-reliant so far as his brain power and mentality are concerned, and this may be either good or bad. The normal course is on an ideal plane middle line of the palm, starting from the Life Line, from a well-developed Mount of first Mars and running across as a well balanced fine deep line to and on the Mount of second Mars. The logical content of the Head Line in this case may be got by approximating it to the logic area of the thumb by closing up the thumb to the side of the edge of the palm. Such a Head Line can easily be read by relating it to the logic of the thumb, the aggressive spirit of the first Mars Mount and the mental stamina of the second Mars Mount for fighting life's battles and for realising heart's desires.

When you assess the Head Line in each hand, it should be borne in mind that the palmist is not a kind of all-knowing super judge to pronounce the exact quantity of intelligence the subject has, like a psychologist who arrives at the "intelligent quotient" of a person by psychological tests on intelligence. We are dealing with thinking people who act in normal situations by virtue of their intellectual level. We are required to discover how this faculty is applied to his ambitions subject to factors like his will-power, logic, imagination and so on and to conditions beyond his control, namely, the strength and weakness endowed by God's will. In our experience we will come across various kinds of ways in which the Head Line starts and proceeds in different hands. Let me place before you a few of these cases, telling you how to view them.

(1) When the Head Line runs towards the upper region of the palm, closer to the mounts and nearer to the Heart Line, it indicates that the subject is dominated by his ambitions and emotions and is therefore weak-willed and lacking in independent thinking.

(2) If the Head Line starts from the Mount of Jupiter or if it is close to that mount, with the Heart Line also stopping at that Mount, the subject's ambitions dominate his head faulty.

(3) With a forked Head Line, one arm of the fork going to the Mount of second Mars, the subject gains mental stamina; and with the other arm of the fork bending and going towards or on the Mount of Moon, the person possesses richness of imagination. The good and the bad in the struggle or in imagination are decided by other good or bad signs of the palm as a whole with reference to type of hands, thumb and so on.

(4) Sometimes you will notice a link line from the Head Line to the Heart Line and *visé versa* as a supplement to Head Line. It is a tie-up of the head and its subjection to heart for ambition and desires. This may indicate a conflict and must be examined and read with other factors.

(5) Self-reliance is shown when you see a separated start from the Life Line, leaving a fine gap for Head line. If the gap is very wide, it means that the subject is extremely bold and foolhardy. If, in this case, the Mount of first Mars is also predominant, the fighting spirit will lead to adverse results, making the subject stubborn even when he faces utter defeat. The results would be different if this were to be on a practical type of hand.

(6) A good Heart Line on an Imaginative hand with weak and flexible will-power having a bad support is like a good house built on a foundation of sand.

(7) It is deemed as a good Head Line if it takes a start from a prominent Mount of Jupiter, runs a well-balanced course from the middle gap of the finger of Jupiter and the thumb as a fine deep impression and enters into the Mount and Mars second also in prominence or makes a slight bend with a fine curve towards the well developed Mount of Moon. If the bend is under the finger of Sun, it is more favourable meaning that all plans of the subject are assured of success.

(8) Bright success is indicated if such a good Head Line is found on a practical type of hand with a thumb indicating high logic and strong will-power and supported by a prominent Mount of Sun and a fine Sun Line.

(9) If the subject has a mixed type of hand, even such a good Head Line supported by other good signs of the thumb

and the mounts becomes vitiated by other not so good features of the type, so much so that the subject, in spite of his success, is mentally dissatisfied and sullen.

(10) What are the characteristics of a bad Head Line? (a) such a line starts with a chain; (b) is very broad, smudgy, with light superficial impression, like existing barely on the surface of the palm, not going deep; (c) ends with a sudden drop to the Mount of Moon from under the Mount of Saturn from the middle of the palm; (d) climbs up to the Heart Line or with a pull or bends towards it and disturbs it.

(11) The existence of the bad type of Head Line is not good on any hand. As it relates to planning and the use of mental faculties, the reading in such a case is that the subject is confused in his mental activity. His advice cannot be sound because his action results in failure.

(12) In an Imaginative type of hand, the existence of bad Head Line, combined to form a single line in some hands, results in weak will-power and bad logic so that the subject is moved to suicidal tendencies. If, on the other hand, there is a sudden drop and bend towards the Mount of Moon, as indicated in point (10-C) the subject's life, short of suicide, is one of utter misery. If the person has a practical type of hand, he would not accept defeat, even after a good fight; in a number of cases in my experiences, there have been suicides also. On a mixed type of hand, there are comparatively more cases of bad Head Line. Such persons display a mixture of qualities in planning and action. They make several attempts, but after continued failures, get confused, lose confidence in their abilities and become chronic blunderers in life. In all cases of bad Head Line, the only saving grace is the predominant Mounts of Jupiter and Sun, and the Sun Line, coupled with a good thumb indicating sound logic and strong will-power.

Let me point out here that in the thirty-six general palm reading charts of selected cases with rare signs, I have given you the readings of the lines in each case. From these readings, you will get a sound knowledge and a practical guidance as to how to interpret the Head Line of different formations and kinds.

The "Two-in-One" Line or the Combined Heart and Head Line

You will recall that while giving brief interpretations of words, terms and language used in palmistry I had referred to the line, Two-in-One, a term I invented to state for the Heart and Head Lines combined to form a single line in some hands. Of course a subject cannot be denied of the Head or the Heart faculty, but the person on whose palm there is only one line to represent both the Head and Heart Line is indeed, unique in characteristic and faculty attributed to each. Whenever such a line occurs, it is usually in the normal position of the Head Line or in a compromise to the usual Heart Line position, slightly lifted. You will see it generally rushing as a straight, deep fine line, varying in length, its position of beginning, its end and features. (Please see Chart No. 14).

If the Two-in-One is found in the upper plane of the palm close to the mounts in the normal position of the Heart Line, it will indicate that the Heart qualities would predominate, with the head faculties surrendering to emotions, feelings, desires and ambitions. Discrimination will not form part of thinking. The subject's palm will be superficial and impractical. On an Imaginative hand, a line of this kind would be a contradiction, imagination working for ineffective result. However, on a practical type of hand, such a line is not so bad, because it would be matched by some practical thinking and action for productive results.

If, on the other hand, the Two-in-One Line is lower down on the palm in the normal position of Head Line, the above reading is reversed considerably. In that case, the subject would be a master of his life, deserving the title of "self-made man". I proved this conception of mine in a large number of cases. Such people have been very active and have worked till the last day of their life.

A well balanced Two-in-One Line on a practical hand in the normal position of Head Line indicates that the subject is an out-and-out materialistic, even to the extent of exploiting his own blood relations to satisfy his urge to great material benefits. Such people are considered disgusting by their own associates, even by life partners, for they have no other interest except selfish, wordly gains. Since even their own children are used by them for exploitation, they cannot make good parents.

As in other cases, the thumb, the mounts, the Fate Line and

Sun Line should be examined for a correct reading. Weak will-power will reduce actions to less harmful ones. It will restrain the subjects tending to commit suicide, however, much the head desires self-destruction.

The Sun Line

It is fate that shapes our success in life, whether we will it or not. The Sun Line is differentiated from the Fate Line in the sense that the line of Sun endows the subject with success of quality on the basis of his ambition or life's goal, generally noble. There is perversity when the Mount of the Sun and Sun Line give unqualified success to a confirmed cut-throat. It is possible that we misjudge the cut-throat, for haven't you heard stories of dacoits and robbers spoken as heroes? Therefore, it is difficult to disprove what palmistry has confirmed that the Sun Line is a Success Line.

The Sun Line (Plate 20) is the principal line to be read in a palm. Whether it is on a subject's hand or on your own, it always is a line of perennial interest. It is located under the Sun Finger pointing to the finger itself from any of the conceived direction from the palm and running on to the Mount of Sun itself. A good Sun Line should run deep into and on the Mount. The Mount of Sun is the only mount credited with its own line, giving its owner the exceptional quality of the Mount for success of any kind. The Fate Line, on the other hand, is related to material prosperity alone. It is also called the Line of Saturn and its benefits are limited to material welfare and career.

The Sun Line may begin its course from the Fate Line, and may run parallel to it, but the direction is towards the Mount of Sun and Sun finger. It may also start from second Mars, or Mount of Moon or even from First Mars. The direction towards the Mount and the finger is our criterion and the extra impact is when it runs on the Mount itself prominently, fine clear and deep, without bad signs.

The Sun Line takes on the qualities of the place it starts from. For instance, if it starts from the mount of Moon we may attribute the success to imagination of high recognition; if it starts from the Mount of Second Mars, there is success from tenacity of purpose or from heroism in the case of war, etc. Sun line from imagination is generally seen in the

hands of writers, artists, painters, designers etc. In all our assessment, we should not be influenced by publicity impacts but by the real qualities of the subjects.

Sun Line taking its start from the Mount of Second Mars has great significance on palms belonging to real heroes who have distinguished themselves in war or even fought the battles of life against odds with courage and valour. If aided by a predominant Mount of Jupiter and a clear ring of Jupiter, the subject will have name and fame.

You might have observed after seeing many hands that in most cases the Sun Line starts from the Heart Line and runs its course on the Mount of Sun. Palmistry has proved the contention that success of most of us comes in the later part of our lives when our cumulative experiences make us mature persons and the pursuits of our early years being to show results. Of course, life is not one complete round of accomplishment. It is a mixture of success and failures, as shown by the interferences of other lines on the Mount of Sun. A forked line going to the Mount of Mercury would indicate success in business or chosen profession and to the Mount of Saturn would mean substantial money.

When the line of the Sun starts abruptly from the Head Line, in the chosen palm the subject will meet with success related to the intellectual faculty. It is possible that in spite of a good Sun Line there may be overall failures; in such a case you look for the bad signs that spoil the career.

The Fate Line

Plate No. 21 gives you the photograph of a palm with the Fate Line or the Fortune Line. In modern English usage, the word 'fortune' is used to mean the good things that fall to the lot of people by chance. But the sense in which it is used here is its common meaning, namely 'personal wealth'. The desire for personal wealth and prosperity in man seems to be legitimate trait. But the Fate Line cannot but represent riches and all that we have amassed in life. In most cases, a person's career is linked with wealth, which is the base for material success. I believe that this does not admit of any exception particularly in a self-centred society such as ours.

Money rules our life at every point and we measure success in terms of financial security. It is a question of adding more

and more to our bank balance. Indeed, there are other lines of the palm which are found in man of goodwill who use all their wealth and money power for the service of humanity. If such individuals did not exist, society would have ended in barbarism long ago.

Palmistry has always recognised the role of the individual in life and society as something vital and significant. As I pointed out earlier, man is the product of both heredity and environment. Here heredity is our inherited qualities and the environment is what we, by personal effort, acquire in life. In all our relationships in the family and in society and in all our activities, our personal goals are always before us. We have to wade through an almost determined course of events and play our cards well. Fate and free-will go hand-in-hand. Endowed as we are with the faculties of Head and Heart, the thumb and the qualities of the Mounts of prominence, each individual goes through life with more or less success. The Fate Line in Palmistry exposes this life-course of every person with greatest perception, clearness and correctness. It tells you in no uncertain terms how well you are in inheritance and how you fare in your worldly goals. Each individual's story of success in life is summed up in achievements of material welfare.

Most of the thousands of my clients whose hands I have read, have one anxious question to ask me: "What does my Fate Line say?" Practically all of them are endowed with wealth and prosperity professionally. Of course, they get the benefit of my readings in the multifarious problems of the moment or of the future, all classified under the lines of the palm and the various signs. There are individual variations and special combinations that make palmistry such a fascinating subject. I love it so much that if I have to live over my life again I would not choose any other career than that of a palmist.

When I have said all this, I presume that the reader will pay great attention to the Fate Line. The Fate Line is associated with the Saturn finger and Mount of Saturn and is found directed towards the finger and mount. It may end up at the bottom knot of the Saturn finger and travel on the mount. Normally, it starts from the Mount of Moon or from the Life Line or in between from the wrist or from the edge or foot of the Mount of Moon. It may, in some cases, start from

the middle of the palm, notably from the Head Line. Parallel fate lines are also in existence. Or the line may be formed by two lines joining as one single line, as from the Mount of Moon and Life Line. It may run zig-zag and break in its course.

The Fate Line may not reach the base of the Saturn finger or the Mount of Saturn, but its direction will precise. Sometimes it may abruptly terminate on the way, stopping at the Head Line or on touching or before touching the Heart Line. It may in rare cases, start from other places like the Mount of Venus or the Mount of first Mars, which is extremely rare indeed. I have also seen cases in which the Fate Line has taken a curve towards the Mount of Jupiter after it runs towards Mount of Saturn.

Here below, I am giving indications and interpretations of the different manifestations of the Fate Line, proved for its correctness by the test of time:

1. When a person's Fate Line starts from the Life Line as a fine, deep line and runs its course, it means that the subject is a self-made person, well-to-do in life and doing extremely well.

2. If the Fate Line starts from the Mount of Moon it indicates inheritance, financial backing from friends and relations, earnings from the public, marriage in a rich family.

3. When the Fate Line is markedly developed from the line of Head and running as fine and deep through the course, supported by other factors of the hand, the subject will have great financial success in a plan originating from his own head.

4. If the subject has on his hand a joint line of two lines, one from the Mount of Moon and the other from the line of Life, he will, by his own efforts, attract financial resources from family friends, relations associates and in some cases from marriage alliances. It is a good line to possess.

5. When the Fate line inclines towards the Mount of Jupiter from the Saturn Mount, it speaks for earning wealth with name and fame. Such a line is seen on the hands of great philanthropists. They are very charitable, being endowed with humanitarian impulses. They use their wealth for human welfare and support temples, shrines and charitable institutions, thereby winning eternal gratitude of people.

6. If the Fate Line is broken, it certainly indicates that the owner of it has setbacks in life, which can be assessed by considering other signs of the palm.

7. An important feature in palm reading is a forked Fate Line. The assessment will be based on the place of forking and how the forked lines take the turn. A turn towards the Mount of Sun and Sun Line will add success and the other turning to Saturn Mount will mean great success in materialistic pursuits.

There are cases where the Fate Line is not found on the palm. Its absence should be considered with other factors of the palm, for proper assessment and prediction should be made on the basis of the overall picture. Even in the case of broken lines and faded lines, we should not rush to conclusion without judging all the relevant factors that have their impact on the subject.

Let me again remind my readers that they should study the thirty-six hands in the General Palm Reading charts with the respective photographs and see how the Fate Line is dealt with in each case. By constantly reviewing these charts you can fix in your memory the readings for various positions in the palm. It is only practice that makes one perfect.

The Line of Mercury

There is an old saying: "Health is wealth". When a rich man has lost his wealth through illness or indulgence in some chronic disease, all his money may not be able to buy him perfect health. Our ancestors emphasised the importance of 'A sound mind in a sound body'. Physical fitness and health had the priority over everything else for without health you cannot accomplish anything.

I refuse to think that the art and science of palmistry, in all common sense, should look to God for the provision of a separate line on the palm for reading one's health (Plate No. 22). Of course, palmistry has to indicate serious illness or disability caused by chronic disease in the lines of the palm, otherwise palmistry will be completely silent on a vital aspect of human life. I firmly assert that the Life Line is both the line of health as well as the line of longevity, for health is an integral part of life. So a separate line of Health is not necessary. People's lives are governed by their head and heart in a long way. In

reading their palms we become inevitably concerned with the dangers to health and serious illness, the causes for which can be discovered in the Head and Heart lines, the thumb and other signs. Thus, the life line is also a line for reading health. I am dealing with this line separately. Only exceptional cases came to consult me about their health and longevity problems. But I must say the reading of the Life Line is tied up with the reading of the entire palm.

A thin, fine line of Mercury, necessarily limited in depth, running on the cushion of the Mount of Moon, second Mars, and towards or on the Mount of Mercury is not a line that appears on every hand. But I have found it on quite a large number of hands in varying degrees of prominence, short or long or broken, faint or marked. It inspires me when other eminent palmists call it the Health Line. With my vast experience of reading thousands of hands, both in India and abroad, I can categorically say that this is the Line of Mercury which relates to the characteristics of that Mount, namely, success in business and professional competence of its possessor.

I have seen innumerable cases wherein the line of Mercury appears, then fades and again reappears. I have also observed broken lines getting united prominently and running a steady course to the Mount of Mercury and in other ways. The readings are always related to the subject's business and professional success for which the Sun Line and Fate Line give most of the answers.

Besides physical sickness there is also mental sickness. Palmistry is often concerned with mentally sick persons. The palmist gives attention to the line of Life in such cases. The Life Line of very mature persons gives indications of the shattering consequences to health and to life itself due to causes mirrored in their Heart and Head Line. This problem does not arise in children or the very young whose emotional faculties are not mature enough. Once again, I remind my readers to exercise their minds by carefully examining the practical reading plates given in this book.

The Life Line

Plate 23 represents a palm with the Life Line, which depicts the longevity of life. In some way or other this line bears marks and evidence of threats to life in the shape of serious

accidents, shocks, diseases, chronic diseases, mental sickness and acute nervous breakdowns. All those with head and heart faculties and other good and bad signs depicted on the palm have their reading of this line tied up with the Heart and Head Lines and other signs.

In every palm, the Life Line is the only line which retains its typical position whatever the difference in outlook and special features of the line from palm to palm may be. It rises from the gap between the thumb and the Jupiter finger, generally from a site at the edge above the Mount of first Mars under the Mount of Jupiter, that is, between these two mounts. It travels in an arch or curve, skirting the foot of the Mount of Venus, towards the base of the palm above the wrist, either joining the first bracelet or stopping a little or at a long distance before the bracelet. In the realm of palmistry on the whole the full length of a person's life is three score and ten years, with added margin of another ten years in all satisfactory period of seventy to eighty years.

You will observe that in most cases the Life Line combines or runs from the start along with Head Line and together for some distance before separating to take their respective courses. The Life Line may terminate at any place on the way, and after a break may have a fresh start. It may be supported by a parallel Life Line travelling in the inside to a long or short distance, fairly deep and fine or well-marked along the lower region of the Mount of Venus. This parallel line of life—indeed an additional Life Line—is definitely a support to the subject's longevity. It saves the person from premature death.

How is age calculated on the palm? A person's youth is measured up to the point under the right edge of the Saturn finger's bottom knot (left edge in the case of Left hand); manhood up to 55 in the run up through the palm cup or through to the point of rise; and another 20 years or more for the rest of the line.

What are the adverse signs that disturb the course of healthy life? They are: (a) chains, mostly found in the beginning of the line (b) island, (c) broad hazy line or blurred line on the surface, that is, not deep enough (d) small fibre-like lines dropping down from the main trunk line (e) broken line or lines (f) abrupt and short ending. Chains speak of serious mental depressions and nervous breakdowns. When you assess health from the Life Line, you should also examine the thumb for

possible indication of will-power, which is very necessary for a sickness to recover early.

Although we know that death is a certainty for all persons at the destined time, we should not, as palmists, foretell a person's death. Let it come when it will; why think about it if you can live a clean healthy life, with legitimate desires and a humanitarian outlook?

The Marriage Line

In our civilisation, the institution of marriage has a vital role to play. It is the most significant expression of emotional attachment of an individual to the opposite sex with the base of living nevertheless in wealth and social activities. Love of the spouse is extended to children, whose welfare becomes part and parcel of life. God has provided a separate line of marriage, in keeping with other manifestations in the lines of the palm. Inevitably this line is also in the region of the palm where lines to indicate children also exist. The marriage line is found as a short horizontal line in the region of the Mount of Mercury, and close to the Heart Line at the edge of palm. The site is precisely between the Head Line and the bottom knot of the finger of Mercury. You can predict the number of children by the vertical thin fibre-like lines on the same edge of the Mount of Jupiter.

I am of the firm view that the so-called Marriage Line need not indicate a marriage contracted under man made law. What is of more vital significance is the emotional attachment that is signified. It rules out consideration of momentary sex relationship although children may be begotten and orphaned. The child will be there in subject's emotional attachment if it is allowed to remain with him (or her). The palm should be examined to see if more than one emotional attachment is indicated in the subject.

The Line for Travelling

Travelling, for certain people, plays a very vital role in bringing about great results in their life in the matter of acquiring wealth or of change of profession etc. Travel in this context is not any kind of travel. The most important travel indicated is travel overseas to foreign countries. Deep long line or lines

should be looked for from the edge of the palm running on the cushions of the Mount of second Mars, for an assessment of such travel or travels likely to take place or has already taken place in the life of the subject. it remains for the palmist, then to connect these findings with the nature of the subject's business or occupation, for example, business in imports and exports or other professions or service assignments.

In palmistry, one has to look for meaningful relationship. Whenever you are satisfied that all factors in the matter of lines and other signs have been considered in their totality you can put forward boldly and firmly the probabilities that destiny has in store for the subject. If you are intuitive or have hunches, it is an excellent prediction.

YOUR HAND AND YOUR DATE OF BIRTH

Subject born on 1st day of the month with Imaginative type of hand

The subject born on the 1st day of the month is influenced by the planet Sun which indicates success, and represents creativeness, individuality, positiveness, inventive nature and is most definite for the views. More or less they are very obstinate and most determined characters and as individuals, indicate that they hesitate not to lose time. Their main motive is to finish the job as early as possible.

Number 1 people are most ambitious, they dislike restraints and they mostly rise to the top position in the business or service or whatsoever the occupation they are in. It is because of Sun's influence. They are mostly liked by their subordinates as they are soft at heart although they look rough and talk fast.

Being highly creative and ambitious, they mostly desire high and if they cannot achieve the desires then they fall flat and are most miserable and live most miserable lives. So they must consider their capabilities according to the virtues and talents for what they deserve. That is the major reason of their downfall because of their high ambitions which they do not deserve.

Description of Hand and Lines

For your better understanding I am producing an imaginary hand who is born on the 1st day of month and characteristics of the date has been mentioned above. Now let us see the palm and lines whether they correspond with the date of birth. The hand is more towards the length and is bony in shape with long fingers having the finger of Sun longer than the finger of Jupiter. The thumb is medium in size with the logic portion longer than the will-power portion which is flexible also. The subject is having brief lines on the palm which are very meaningful. Line of the Heart lies very low, stops under the Mount of Saturn facing towards the Mount of Jupiter means the subject

is highly ambitious. Now coming down to the line of Head which is very peculiar in shape as it is deep and fine but makes a sudden curve, travels through and lands on the Mount of Moon covering its major portion. This indicates that the subject is highly imaginative and is a great planner. The subject has got a Fate Line which is only appearing near the Head line and receiving importance from the Line of Head indicates that the subject is going to be successful in planning and action after the age of 35. The Sun Line of the hand also appears at the very same age of 35. I draw your attention towards the mount and you will find that the Mounts of Jupiter and Sun are comparatively important and significant than other mounts.

My Opinion and Suggestions

Well readers, when we combine the date of birth with the lines of the palm and the type of hand, you will find no other difficulties to find out the facts relating to the subject's future. The subject has taken birth under the influence of Sun means success and by birth his inclination towards creativeness, ambitions, inventions and positiveness in views. The hand also reveals the facts of the subject's high ambitions which are clear from the line of Heart and develops from the Mount of Jupiter.

If we look at the line of Head, it starts, from the Mount of Jupiter, which is very rare. This further confirms that the subject not only desires high but he also plans to become complete. Being a very highly imaginative character it is clear from the line of Head which bends on the Mount of Moon and travels on the major portion of the concerned mount giving deep thinking and learning to the subject. Now considering the type of the hand and lines on it I safely can say that the possessor is a highly positive character towards the mottos of life, the subject is highly logical having weak will-power and flexible nature which indicates that the subject will face a lot of problems for getting his plans and actions done.

The lines of Fate and Sun as shown in the photograph of those born on the 1st of the month show that the subject will have success fully after the age of 35 and the earlier part of the age is full of struggles. According to my opinion though the subject is born under the very good date, the hand does not

give its all help to the possessor and he will fail because of not having a strong will-power and will live in a dream life and will keep on making castles in the air and will not put his best efforts for maturity. I will consider this number of an average type which is made of failures and successes. Before I close, my best advice to such like hands, those which are born under the influence of 1st day at the month, is that they should have a strong will-power and desire according to their capability so that you avoid an unhealthy and unstable life.

Subject born on the 2nd day of the month with a practical type of hand

The people born under the influence of No. 2 means that they are influenced by the planet Moon which indicates that they are highly imaginative, artistic, romantic and have most gentle ways so far as their nature is concerned, they are mostly inventive kind. But they lack badly the ability to carry their ideas in a practical manner. Their quality is more mental and less physical. In general they are not strong physically.

They must guard themselves against being restless, fickle-minded, lack of continuity in their plans, ideas and on top of all, they lack self-confidence in a bad way. They are very sensitive and they get despondent and dejected if not in a happy surroundings. They are advised to live in a happy company so that a pessimistic thought may not become the cause of disturbance in their life which in their case is most common.

Description of Hand and Lines

The subject has got a square type of hand which is most practical in ways, got medium size of fingers which are also square in shape and a thumb of medium size. The logical portion of the thumb is extremely impressive and the will-power portion of the thumb is strong, which means that the subject is blessed with a highly logical power with a strong will power spot. Heart line which is deep and fine and stops on the Mount of Jupiter is well developed. This indicates subjects' high ambitions. The line lies at an ideal place. The Head line, which too, is deep and fine runs across the palm gives the subject an ideal thinking and the fine co-ordination with the line

means that his ambitions and learning are well co-ordinated.

Please note this that the Life Line though short, but which is well spotted with another spotting life line removes the danger of short life and one can say safely that the subject is going to live a long healthy life. Coming to the mounts the hand is well-developed whereas the mounts are concerned. The Mount of first Mars has special significance as being prominent which shows that the subject possesses good vigour and vitality for achieving all the aims and mottos in life and will not surrender when making efforts for achievements. The main aspect of this mount is that the subject will have a short temperament and will flare up which will cause oppositions and enmities which one can clearly see from the lines starting from Mars. One travelling right from the palm upto the Heart Line disturbing all the lines coming in between will cause anxiety and mental disturbance in the subject's career. The subject has got fine Fate Line which is on square type of hand which is of great significance. The subject will have two professions in his life, service and independent business.

My Opinion and Suggestions

The date of birth is influenced by planet Moon, which makes the subject highly imaginative, creative, inventive and most gentle in nature. He has got sensitive tendencies, possesses a square type of hand which is most practical in ways. Whatsoever imaginations are cultivated in the subject, they will be of practical kind as all the signs are a guidelines towards my this explanation and statement which I have already mentioned while describing the characteristics of the hand.

The people with such like hand are born under the influence of No. 2 and are very inventive. They always believe in achievements and make new fields where they expedite their talents virtues and qualities easily. Though the subject is born under Moon, which means imaginations, the type of hand makes the subject not a day dreamer to make castles in air but drags him into practical ways of life and makes them believe in—actions which are based on well planned imaginations.

My advice to such like characters is that to be good writers, painters, artists or anything which concerned with the art will prove an ideal line in their life through which they not only will achieve success but will make themselves known

for generations by their good deeds and virtues. They are advised to control their temperament and have patience to face the oppositions which by nature is there in life.

Subject born on the 3rd day of the month with Mixed type of hand

The people born on the third day of the month are influenced by the Jupiter planet which is known for its ambitions and stands for name and fame. The subject born under the influence of Jupiter is highly ambitious and are never satisfied on subordinate positions. Their main desire is to rise and to have the control and authority over others. They have great tendencies as commanders. They love discipline in all matters and all walks of life. They obey and make others obey. They usually rise to the highest position, whether in service or in business they are extremely faithful in carrying their duties.

The biggest fault that lies in them is that they are inclined to become dictators and lay down their laws. They insist on their own plans and ideals. Because of this reason they have oppositions and make enemies although they are not quarrelsome. The subjects belonging to this number never like obligations of others, they loose temper very fast.

Description of Hand and Lines

The shape of the hand is slightly towards the longer side. The subject possesses a square type of fingers which are medium in length and has got a long thumb which stands in a most bold manner indicating highly logical tendencies as there are two unique lines of rare kind on the logical portion of the palm. The will-portion of the thumb though small is very stiff and indicates that the subject is of a very stubborn type. The subject's line of Heart is very deep and fine and ends under the Mounts of Saturn in a forked shape which lies low and has a very co-ordinating relationship with the Line of Head which too is deep and fine keeping an ideal gap from the line of Life, which takes off from the Mount of Jupiter and lands in an ideal manner on the Mount of Mars second facing towards Mount of Moon. The relationship between the line of heart and the Head Line is ideal and there are no chances that the heart of the

subject will rely on head. The subject has got the control over heart because of Ideal Head Line and good logic.

Dear readers! please do notice a line travelling from the Mount of Mars disturbing the lines in between while it stops on the line of Heart. It shows that the subject will have a lot of oppositions and enemies throughout the life, but they all will be hidden ones as the subject is brave enough to face them. Line of Fate that starts them the centre of the palm and runs towards the Mount of Saturn indicates that the earlier portion of the subject's life will be full of struggles and financial worries and he will settle comfortably only after the age of 35.

Opinions and Suggestions

In describing the characteristics of birth-date and the type of hands I definitely will place this hand a unique example for explanation. The hand carries a lot of virtues given by the birth influence such as dictatorial tendencies which is very clear from the thumb itself and the subject will put his foot down for any kind of job. The withdrawing or leaving of the job will become impossible. The only hope arises of the possessor realises by itself. The line of Brain stands well in co-ordination with high ambitions which are the qualities of birth number.

The people born under the influence of 3, means 3rd of a month, mostly carry enemies or oppositions because of their bad temperament. This is also very clearly indicated by the hand because of the line travelling towards Mars while approaching and disturbing lines of Head and Heart means that the subject will get frustration because of the back biters, oppositions and enemies of hidden type.

The earlier part of the subject's life is full of struggles. The subject will face boldly and will make compatible and desirable life after 35 years of his life. The date of birth and the hand both speak together that the subject will lead a successful life throughout. He has got a very long life and can face any kind of physical sickness with the strong will-power. According to my opinion the above hand is of above average class which is gifted with a lot of virtues and qualities. My best suggestion to such like hands is to control their temperament because of which they may have a lot of harassment and will have problems in life. If you will give heed to my this suggestion you will lead a life of idealism and in a most pleasing way and manner.

Subject born on the 4th day of the month with Imaginative type of hand

People born on the 4th day of the month are influenced by two planets, the Moon and Saturn. They always view the things from the opposite angle, means they are highly pessimistic in their thought. On the point of argument also they have taken an opposite side. In spite of the fact that they are not quarrelsome, still they carry many secret enemies and keep on facing oppositions till the last day of life. The major fault in them is that they always think of the opposite direction and see only the dark side of the picture. They are bound to lose good opportunities and people in life. This bad aspect can be over-ruled only if they are born lucky. Otherwise they face problems and become the victim of self-created circumstances. They are mostly rebellious and revolting without thinking about the consequences which makes their life miserable and worst kind. They are highly sensitive and get easily wounded and inclined to feel lonely and isolated. If they do not get success they become desperate. They have few friends to whom they are most faithful and that is the best quality they possess.

Description of Hand and Lines

The hand is more towards longer side which makes the hand imaginative in type. The hand possess medium size of fingers which are pointed and they give further strength to imaginations. The thumb is of medium size with highly logical tendencies and flexible will-power.

Dear readers! This hand is a unique example of chained lines. In this connection I would like to draw your kind attention towards the line of the upper portion of the palm that lies only on the surface. The line stops at the Mount of Jupiter. It is not desirable to have such kind of lines as the subject will have worst kind of emotional and financial betrayals. The indication of the line is that the subject is very highly ambitious and such kind of line on an imaginative type of hand is not constructive but is rather damaging. Coming down to the line of Head, that too is chained but not as badly as the line of Heart. I fail to give any kind of healthy relationships to both these lines which in the subject of palmistry are not

only essential but rather a must. On an imaginative kind of hand such like Heart and Head Lines are the sign of unhealthy tendencies of mind. The possessor will have not only mental depressions but may have nervous breakdowns also. The line of Fate is extremely fine and the subject will never face the financial problems throughout the life. On the entire palm it is the only line which is deep and fine. Considering the Mounts, Mars first plays a vital role and give good strength to the subject to face the ugly life situations.

Opinions and Suggestions

I have mentioned the characteristics of people born on the 4th of the month and along with that explanations I may call this case one of the best for the readers to have a great part of knowledge from the point of palmistry. Basically the influence of the date is undesirable because of independent (number 4.). They are born pessimists. If once betrayed they loose confidence not only in people and opportunities but mainly in their own selves. They become the victim of lack of self-confidence which is the most essential part in one's life because without self confidence a man can never progress and do a job independently. Along with the lines the possessor's hand has made no changes with the characteristic influence of birth-date. They make the possessor of the hand further pessimist because of circumstances, I hope, which they do not expect. On the top of that the Brain Line, which plays a vital role alongwith the thumb is highly logical, but is supported by weak will-power and the subject weak in actions. The only good sign of the hand is the Fate Line from which one can safely say that the subject is born with a silver spoon in the mouth so far as money is concerned. But whereas peace and prosperity are concerned, this hand is considered to be unlucky and I will place this hand as one below the average if money is not to be taken into consideration.

Subject born on the 5th day of the month with Imaginative type of hand

The subject born on the 5th day of the month is influenced by the planet of Mercury which influences in business and finan-

cial matters. The subjects are of extremely friendly kind but mostly they get along well only with the people born under the influence of their own number. They are quick in thought, fast in making decisions and take positive actions. They also get easily excited.

They have a keen sense of making money quickly by the ways of new inventions and ideas. They are born as speculators and get into business, like stock exchange transactions and are mostly ready to take maximum risks in money matters. They have very moulding type of characters. They are of extremist types. They make fortunes of unexpected kind by the virtues of their brain and schemes which are highly materialistic in nature. If by chance they are bad, nothing in the world can change them and such are the people who waste everything they have. They are mostly down to the drain because they cannot control their habits like gambling, racing, speculations, stock exchange and quick transactions. They mostly get nervous breakdowns which are of worst kind. Besides they are short-tempered.

Descriptions of Hand and Lines

The hand is more towards the longer side which makes it imaginative in type with long fingers which are pointed. The subject has got the finger of Sun especially longer almost equal to the finger of Saturn. In common cases the finger of Sun is equivalent in size to the finger of Jupiter. The subject has got a small thumb with no logic and with very weak will-power. It is clearly indicated that the subject has got timid character and is of narrow thinking who does not have broad outlook in life. Subject's Heart Line lies low which is deep and fine but stops abruptly under the Mount of Saturn. This confirms subject's nature of cautious like and it ends in a fork with one line dropping down on the Heart Line. The subject's Heart Line is very fine and deep. It is impressive though small. The Head Line is very significant and meaningful on this hand. It is of imaginative type and the line further confirms that the subject is a great planner by nature and because of the virtue of good Head Line, the heart will never rule the head.

The subject's Fate Line is of unique kind. It is very deep and fine with a break in the centre of the palm. It makes a

fresh start which is more impressive and runs into the Mount of Saturn. The subject will never have scarcity of money but, contentment and the peace will be a big question and problem in the subject's life. Subject has got the Mounts of Mercury and Saturn very high and impressive on palm. This indicates that in business he will leave no stone unturned to make the success for which I can say that it is an ideal combination.

My Opinion and Suggestion

Considering the influence of birth-date it is of high materialistic nature. Subject will make every possible efforts to make money and that too with the ways of easiest kind. Alongwith the tendencies of date of birth the type of hand also co-ordinates with the nature as the finger of Sun openly speaks of subject's success in all the ventures he undertakes. My this statement is further confirmed by the fine Head Line which is the very deep and fine form. It lies at an ideal place providing all opportunities of achievements in subjects career.

The only weak point and which is not of desirable kind is the thumb. It will hamper the achievements of desire. It will also obstruct in actions and availing of the opportunities as the logic of the thumb is not convincing. At the same time will-power is weak which will make the subject to be over cautious in certain matters. In spite of these facts, the date of birth and hand make the subject extremely lucky as the Fate Line speaks the results and is the spot witness to my this statement because of its deep and fine form in which it appears on the hand. So the subject is going to have all the best opportunities because of his fine Fate Line and the long finger of Sun. They are of materialistic gains which will lack mental satisfactions. I will call it an above average hand whereas the money matters are concerned but below average whereas the mental satisfaction and peace are concerned.

Subject born on the 6th day of the month with Imaginative type of hand

The persons born on the 6th day of the month are influenced by Venus planet which is the God of Love. They have a magnetic power, possess a striking and attractive personality

and are loved by others, rather worshipped by others who are working under them. They are very determined in nature and while carrying out their duties they spare no efforts. They are very romantic and ideal in the matter of love and their love is based on more mental satisfactions than physical pleasures. They love beautiful sceneries and are fond of artistic home, like rich colours, artistic paintings and are fond of music which is soft, rhythmic, but that which makes them emotional.

They are very highly generous to the art and artists. They like to entertain their friends and make other ones happy around them. The woman born under the influence of this number becomes an ideal housewife as she loves to entertain her husband and friends. She is bound to carry a social life. The persons born under the influence of this number cannot stand discord and jealous nature from anyone as they themselves have nothing like that. They are rarely short tempered but, then they rouse in anger they cannot stand oppositions and will fight to death. They have remarkable sense of beauty.

Description of Hand and Lines

The shape of hand is more towards longer side which makes the hand most imaginative in type. The subject is having medium size of fingers of mixed nature. The possessor of the hand has got a long thumb which has an ideal logic and strong will-power as well. The hand has got a beautiful Heart Line which lies at an ideal place in a deep and fine form stopping at the Mount of Mars which give the subject a remarkably high ambitions. Coming towards the line of Heart are two very fine and deep lines. One of them runs across the hand and stops at the Mount of Mars first and is in shape of an ideal curve. It is an ideal combination of head and heart and they support well each other. Coming down to the Fate Line, it is very deep and fine in form and takes its start from the Mount of Moon runs to the line of Head where it stops and from the very same place another line takes its start which means the subject will change profession in the age of 35. The subject has got a deep fine Life Line indicating a long and healthy life. Mounts of hand is silent altogether.

My Opinion and Suggestion

According to the influence of date, hand and the lines of the palm are so well consistent with that I fail to point any juncture

where they differ from each other. Heart and Head lines give imaginative and romantic instinct to the possessor. The possessor has an ideal imagination of most romantic kind and is sensitive in nature and is of a very hospitable kind. The subject is full of logic and strong will-power and materialises much of what he plans. Fate Line is so rich that I only will comment that with such like Fate Line possessor is born with a silver spoon in his mouth. They are liked by one and all. It is one of the fine hands with which the possessor is well contented and is of highly optimistic type. Lucky are the people those who have such hands. From the line of Life one can safely say that the possessors make life happy not only for themselves but also carry happiness wherever they stay and stand. Subject will live a life of very long and healthy nature. The Mount of Mars first travelling towards the line of Heart will create oppositions and might bring to the subject irritation where the subject must bear patience as he has a very strong logic. If he is patient nothing can bring disturbance in life.

Subject born on the 7th day of the month with the Mixed type of hand

The person born under the influence of number 7 i.e. on the 7th day of the month, is influenced by Moon planet, like number 2. It carries close association with this number like imaginative power etc.

They are very independent, original and have strong mark of individuality. They love changes and are fond of travelling. They are mostly restless in nature. If rich they visit countries across the sea and become interested in far lands. They have a general knowledge of world.

Being the king of imaginations they often become good writers, painters, poets, actors of stage or screen. They have a psychological outlook in their work. As a classical type they care little about money and material kind of things in life, but still they become rich by original ideas and methods of business. They give their wealth in charities and donate for the goodwill of human cause. They have a religion of their own kind which is known as serving humanity. They have remarkable power of dreaming and are gifted with intuitions. They get influenced easily and because of this nature they are

mostly betrayed and have setbacks of worst kind. They become the victims of financial and emotional kind of betrayals.

Description of Hand and Lines

The shape of the hand is little towards longer side which makes it mixed in character.

Subject has got medium size of fingers, with Sun fingers longer than the finger of Jupiter which has got a bent towards the finger of Saturn. Finger of Mercury is also bent towards the Sun finger. It indicates success in business and the tilt of finger of Jupiter towards the finger of Saturn is the clear indication of name and fame in business.

The subject has got a medium size of thumb with good logic and quite a strong will-power, though not remarkable. Heart Line of the subject lies close to the upper portion of the hand and stops under the Mount of Saturn. It is quite deep and fine. It makes the subject ambitious and desirous. Now coming down to the Head Line, subject possess a fine and deep line which runs parallel on the palm and is in fine coordination with the Heart Line. This mean they adjust well where desires and planning are concerned.

Subject has got two Fate Lines, one from the Life Line and the other from the centre of the palm. They are quite deep and fine. Subject is a self-made character and after making a humble start in life changes to another profession which is business and is successful as the Sun line is deep and fine. Finger of Mercury is bent towards the finger of Sun. This confirms my statement that Sun finger is fairly longer.

Subject got a long Life Line which is free from any kind of physical problems. Whereas the Mounts are concerned, Mounts of Jupiter and Venus are quite prominent and Mount of Mercury gives a good support to them.

My Opinion and Suggestions

The description of birth-date and description of hand must have given you an impression that it is a fine combination and the possessor enjoys all the good qualities and virtues with an influence of birth-date. Well it is a hand of self-made career. Though the subject is over-ambitious the plannings control well the ambitions and save the subject from becoming

an unbalanced character. For this reason subject's will-power plays a major role.

Alongwith all the above mentioned good points the subject will face certain problems because of Mount of Venus which is well developed. The subject by birth is innocent and sincere. Because of Moon influence he will be highly imaginative and developed Mount of Venus will make imaginations of highly emotional kind which will make the subject weak for the opposite sex. Developed Mount of Venus and many lines on it will give the possessor lot of emotional betrayals and setbacks. Subject will have many affairs in life and will get emotional and financial betrayals from the opposite sex.

My best suggestion to the subject is to have a control over this lust for which I have my doubts. But after all, advice is an advice and wise people have a value for it. Considering you from that class I am giving you this advice with all my wishes for best of luck.

Subject born on the 8th day of the month with Mixed type of hand

Subjects born on the 8th day of the month are influenced by the Planet of Saturn which rules the worldly comforts and materialistic gains, but whereas my experience is concerned they are either highly materialistic or highly spiritual characters. They have never got a mixed type of character. They belong to either one of the two sides.

The people born under the influenced of this date are always misunderstood in their life. Though they are never bad at heart, the misunderstandings and the constant happening of such kind of events make them feel very isolated and lonely. If by chance they are revengeful by nature and got a revolutionary character then they turn out to be the most dangerous and are open in the field for revenge. Sometimes, I find that the dacoits and criminals with bold act are born under the influence of this date, for whom mostly the people around them are responsible of their becoming such notorious characters.

They are extremists and that is why they make bitter and worst type of enemies. They appear often cold but they are the warmest kind. Infact they are mostly influenced by the Venus planet also, which makes them extremely sexy. They

have a most pleasing and striking personality and are one among the tall class of people. They have magnetic touch of personality which is impressive and is attractive for the opposite sex. Either they are great success or worst kind of failures in life. They never fall in between. The greatest spiritualists are also born under the influence of this date.

Description of Hand and Lines

The shape of the hand is more towards length, makes it mixed in type. The thumb of the subject is long and possess highly logical portion with strong will-power.

The Heart Line is deep and fine which travels in a most majestic way and lands in the centre of Mount of Jupiter. This gives the subject high ambitions. The Head Line is also deep and fine and makes its start from the close of Jupiter Mount and after travelling in a most fine way splits and makes a fork under the Mount of Sun. The line has got a fine relation with Heart Line and subject's ambition and planning is well balanced which is further confirmed by the forked Head Line which starts from under the Mount of Sun and indicates that the subject will give practical shape to all plans and ambitions. Fine thumb, good logic and strong will-power further confirms those fine qualities.

Fate Line starts from Life Line. This means that the subject is a self-made character. Line of Fate is supported by Sun Line. The person has got well-developed Mounts of Venus, Mercury, and Sun which means that he will achieve great heights in the concerned profession. He will make a lot of rivals and co-professionals will be highly jealous because of the subject's achievements. But the possessor of this hand is bold enough to face the facts of life. Subject has got a long life though not healthy after 50 years and the last period of life will not be pleasant.

My Opinion and Suggestions

Generally the people born on the 8th day of the month are either successful or failures, but the hand which I have presented is of a subject who is highly successful. He is a self-made character who after making a humble start in life will come up in life because of high ambitions which is the gift of this

numbered born people. His planning and logic have given good support to the character and he will not leave a stone unturned to achieve heights in life.

The possessor is broad minded and believes in heavy expenses and will spend a lot. Mount of Mars is well developed where it has given the subject a strength to fight in a successful way. Because of this short temperament he will develop a lot of enemies. This will in turn cause mental disturbance. That will affect his health and after the age of 50 years, the subject must take care of his health to avoid blood pressure. My best suggestion to the subject is to use his logic and will-power for better health also, as it is not money that buys health, but it is health that makes money.

Subject born on the 9th day of the month with a Square type of hand

The subject born on the 9th day of the month is influenced by the Planet Mars, which gives strength to fight. The possessor has power to overcome the enemies and fight well with the oppositions. The earlier part of the life of subject is full of difficulties and struggles and he faces hardship before achieving success in life. They are short tempered, impulsive in nature and most independent in character. They are the masters of their own will. They have great courage and become excellent soldiers and leaders. They face struggles both in battlefield and in private life and they fight well before they surrender or achieve success.

They must be careful of the road accidents and must guard themselves from fire explosions. They rarely get through in life without getting an injury of such kind. They have all the chances to undergo an operation of surgical kind at least once in life. They are resourceful and excellent organisers. Only if they become leader of any kind, they can show their ability, otherwise they become a great flop.

The subjects of this number can be made greatest fools if by chance they get into the clutches of clever woman. In the ordinary and normal life it denotes energy, ambition, leadership, domination and courage. It represents iron will-power.

Description of Hand and Lines

The square shape makes the hand practical in character. Sun finger is longer than finger of Jupiter. Subject has got a medium size of thumb with highly developed logic portion and flexible will-power as you can see the thumb bent towards back side. But such bend is only because of circumstances. The Heart Line is fine and deep and stops under the Mount of Saturn facing to the Mount of Jupiter. This course indicates high ambitions of the subject. Line of Head makes its start close from the Jupiter Mount which further confirms high desires. It runs across palm and lands on the Mount of Mars second. Lines of Head and Heart have got a gap in between which will create conflicts in subject's mind while making a decision.

Subject's Fate Line is dub. Main line starts from the base of wrist and is deep and fine. It shows that the subject's family background is very good and comes from a family of status. Subject will not be happy with parental profession and will make a fresh start around the age of 28 and will be prosperous.

Subject's life is short and will meet a sudden death in the form of accident. Though there is supporting line of life, it is meaningless. A crossed Mount of Saturn confirms accident. The Mount of Venus is well developed which indicates weakness for opposite sex.

My Opinion and Suggestions

The subject's hand is an ideal example which is in consonance with the date of birth.

It is a highly ambitious hand of practical type. The subject is very independent and cannot stand any kind of interference and interruption. It may cause a revolution in subject's life, inspite of the fact that the subject is born with silver spoon in his mouth and comes from a family of status. But, the nature and circumstance will not get along well which will result in a split in the family. After that the subject enters into an independent life—business, where the subject will be successful because of remarkable initiative and drive which is clear from the type of hand. Success is there as you see that the finger of Sun is longer than it's usual size.

Well developed Mount of Mars gives the subject bad temperament and because of this nature he will remain perturbed

and disturbed. This habit can be controlled if the subject takes advantage of the logic portion. Subject's life is short because of accident—mainly danger from road accidents—as, along with the influence of the number the subject has got a short Life Line and got a cross on the Mount of Saturn which further confirms accident.

It is the lack of concentration that invites accidents on the road. I suggest to them to be cautious and concentrated where there are chances of such accidents.

Subject born on the 10th day of the month with a Practical type of hand

When we begin with number 10, as mentioned earlier, we enter two digital or compound numbers numerologically. But inspite of the fact that number 10 carries two digits, I will just take the influence of 1 as 0 is silent in numerological language— $1 + 0 = 1$. Number 10 stands for Sun, which denotes success. It is the founding number and plays a vital role as it represents creativeness, individuality, positiveness, inventive and most assertive in views.

They are more or less, highly ambitious, determined in all what they undertake as individuals. They dislike restraint and mostly rise to the top positions whether in service or in business. They are highly respected by the subordinates. Number 10 people are requested that where their ambitions are concerned, they should give a proper thought to their plans and intelligence, whether they are justified to desire or they have ambitions which are just over ambitions. In such cases if they desire beyond reasoning they become desperate and enter into a life of frustration. They are mostly born impatient types and they expect the results favourable and immediately which in most cases are not according to their expectations. Being highly practical they loose the plans of their interest if it does not match accordingly. So patience is a must in their life for better achievements. Number 10 people are requested to look after their health as they mostly become the victims of high blood pressure and lose temper shortly though they never mean this as they are clear at heart.

Description of Hand and Lines

The square shape makes the hand most practical and intact.

The subject has got medium and square fingers which further confirm the practical tendencies of the possessor. The subject has got a long thumb with highly logical tendencies and extremely strong will-power. The logical portion of the thumb is having a special significance as there is a ring on the logical portion which increases the tendency of the subject's logic power. Subject has got deep and fine Heart Line which lies at an ideal place and stops in between the fingers of Jupiter and Saturn which is very meaningful whereas cautions and precautions are concerned. This Heart Line makes the subject highly ambitious. The subject's Head Line starts from the base of Mount of Jupiter and travels in a most ideal manner and lands on the Mount of Moon, means that subject has got a well balanced brain full of ideas and plans. The relationship between the lines of Heart and Head is very cordial and got good grip over each other. There is no Fate Line and in such hands the absence of Fate Line is meaningless as Sun Line is fairly prominent. The possessor has got a long Life Line full of vigour and vitality and is fairly a healthy line.

My Opinion and Suggestions

After the characteristics of the date of birth and description of hand, readers must have realised that the numbers and palm reading are co-related to each other well. There are difficulties which are mentioned while describing the date of birth and the influence of that date on the subject has enhanced by the virtue of having good type of hand. The unique significance is the thumb which is having a remarkable logical portion and strong will-power which is of course very common with the people born under the influence of number 10—people born on the 10th of the month—but such a logic portion is rarely found in hands. The line of Head which is very deep and fine attributes good qualities whereas planning is concerned. Planning is well spotted by the logical portion. The Heart Line of the subject is ambitious but carries cautions as well, which is a sound indication that the subject is not going to be put into any kind of ventures where he is not definite and does not gain confidence.

The hand reveals no great success where qualities and virtues are concerned. So the subject will remain uncontented throughout his life, inspite of the fact that the achievements will be there.

My best advice to the possessor of this hand is that to get certain satisfaction from all what is achieved as their ambitions in life never last till the last day they live but it is they alone who have to be contented with achievements. As it is not of very rich kind, I will hesitate to say if this is an average or above average hand.

Subject born on the 11th day of the month with Imaginative type of hand

Now we have entered the second phase of practical ways of numerological discussion alongwith the hand description. The description starts with the two digit numbers. If we add 1 and 1 it becomes 2, which is influenced by Moon. This represents imaginations, and is feminine, gentle by nature, creative, artistic and romantic but we have to ignore that number 2 is the combination of two number ones which stands shoulder to shoulder and has a remarkable form of characters which is influenced by the Sun. Influence of Sun means success, which represents creativeness, individuality, positiveness and definite for views and actions. Alongwith the high and rich imaginations they are ambitious too. In the case of number 11, the qualities pertain to be more mental and less physical. They are rarely strong physically but have powerful brain control which overcome any kind of problem and worries provided it does not turn towards pessimistic thinking. If it adopts a pessimistic thinking, such are the characters who would become most restless, feel most unsettled and lack of continuity in their plans and ideas and become the victim of losing self-confidence which makes them oversensitive and despondent. So they should live in happy surroundings and guard themselves against such misfortunes.

Description of Hand and Lines

The subject has got a hand which is more towards longer side and is very narrow in width which makes it an extremely imaginative type of hand. He has got long fingers with finger of Sun exceptionally longer than the finger of Jupiter which in most cases are equal in size. It is a sign of success. The possessor has got small thumb with logic but weak will-power

on imaginative type of hand. Such like thumb is not desirable. The possessor has got deep and fine Heart Line which ends on the Mount of Saturn making a fork giving the subject high ambitions. Coming down to the Head Line it appears independently travelling up to some distance with the Life Line. While becoming independent it slopes abruptly on the Mount of Moon and lands in a deep and fine form giving the subject further tendencies of imaginative kind. The relationship between Heart and Head Lines is cordial but not progressive. They will have conflict of worst kind. Sometimes the subject will fail to decide the ends and will become confused in mind. The subject has got a Fate Line appearing only from the line of Head, means, the earlier part of the subject's life is full of struggles and he will keep the experience which will be useful only after the age of 35. The subject has got a long Life line which might not be of healthy kind as the life line has only appeared and lies on the surface and is not deep and fine.

My Opinion and Suggestions

After the description of date of birth and characteristics of the hand I definitely will say that the hand has no sound relationship with the date of birth. The subject has developed highly imaginative kind of plannings and will waste time in thinking and planning process. As the achievements are not possible, the subject may enter into a life of desperation and frustration. The earlier part of his life is full of efforts and he will be matured before the age. The subject will start thinking in a most serious way and manner where the achievements are not desirable. The subject will have to face nervous tensions throughout the life as the lines of the hand clearly show that. The Fate Line appears from the line of Head, means success after the age of 35 which of course is certain because of Sun Finger which speaks the truth of my statement. In spite of all these the subject will remain uncontented and will still strive for achievements.

My best advice to this subject is to develop a strong will-power and not leave the plans in between and undone which is the biggest fault in the subject's life. If the subject develops a strong will-power and control over mind there are also chances of leading a contented and happy life.

Subject born on the 12th of the month with a Mixed type of hand

People born on the 12th day of the month are influenced by the planet of Jupiter which is known for its name and fame. Like number 1, number 12 is also ambitious. Now before I go ahead I would like to make it clear to the readers that No. 12 is the combination of numbers 1 and 2 which means 3 as one digit number. The hand I am taking for description will reveal the fact that out of two numbers—1 and 2—one of them is the more powerful and has got greater influence on the subject's life.

People born under the influence of this number are never satisfied with small jobs for they love to rise to have authority and control over others. They are born to become leaders and commanders. They love discipline in all matters. They obey and make others obey. They often rise to the highest position in business or in service if they are destined for. They are extremely faithful in carrying out their duties. They are sensitive. Although they are not quarrelsome, they still have enemies and oppositions. Their biggest fault is that they have dictator like nature and they would like to enforce their own will and insist on implementing their own plans and ideas. For this reason they will face many problems in life. They are mostly prudish and they do not want to be under the obligation of others. They won't accept help from others thus, losing many good opportunities in life. They are very bad where the temperament is concerned. They must look after tension which may create complications where health is concerned.

Description of Hand and Lines

The subject is having a hand which is more towards length side and fairly broad. This makes the hand mixed in type. The fingers are fairly long with the finger of Jupiter longer in size than the Sun Finger which indicates prominence and name. The thumb is of medium size with the logical portion. The clumsy type of cap indicates that the subject is highly logical with control over will. I would like to say few words regarding this clumsy thumb to which a lot of prominent writers in the line of palmistry attaches criminal tendencies. According to my

personal research in this profession I have found people with high social status and top positions possessing a thumb of this kind and at the same time having no criminal tendencies. The Heart Line of the subject is fine and deep and lies at an ideal place. Its direction up to the Mount of Jupiter shows high ambitions of the subject. There are two more lines travelling to the Mount of Jupiter coming towards the Finger of Saturn. This indicates and confirms that the subject is ambitious. Coming to the Head Line, this too, lies at an ideal place making a fine arch, lands in the Mount of Moon and has a very fine relationship with the line of Heart. Both the lines lie close to each other and speak in support to each other and is a unique kind of sign which the subject possesses. The subject has got the long Life Line which indicates that the life is very long. The Fate Line lying in a fine manner, denotes that the subject is born with a silver spoon in his mouth. He never bows before anybody and is quite lavish in spending money. He belongs to a family of rich background.

My Opinion and Suggestions

After describing the hand and characteristics of date of birth I do not hesitate to say that it is a fine collaboration of hand and date of birth. Subject will achieve name and fame because of a well developed Mount of Jupiter. The Heart Line travels and covers the entire Mount. Though he will not be quarrelsome, the progress and prosperity he will be making will create a lot of enemies and as a result of which he will be facing mental tensions. My best advice to this subject is that he should take full advantage of his will power and logic which he is blessed with on the hand and to keep patience which will bring fruitful results in the long term. As the subject is very sincere in his manners, he will have to face financial betrayals. Subject is advised to be careful whereas the temperament is concerned because he is bound to lose his temperament but at the same time he is not bad at heart. He must be very patient and must control his temperament.

Subject born on the 13th day of the month with Square type of hand

People born on the 13th day of the month are influenced by Sun which is known for its success and prosperity. Dear

readers, number 13 is considered to be the most unlucky number, but I have my different opinion about the characteristics of this number. Number 13 will combine 1 and 3, which make 4 as one digit. Numbers 1 and 3 according to the numerological analysis have identical characters and they have similar type of virtues and qualities. They are ambitious, creative, inventive and have got remarkable individual characters. They are definite in views and positive in thoughts. But all such good qualities number 3 has, extend its best support where achievements are concerned. It gives a strength to cultivate practical shape to all their ambitions. While doing so, they become dictator-like and lay down their own plans and insist on materialising it. Although they have strength and stamina to do everything still they become pessimistic if their plans do not materialise as they desire.

Such materialism if once enters their thought process then all their hopes are shattered, ambitions are destroyed and they feel scared to take any kind of ventures for success though such things are very rare in their life. But even when the person is destined for such like mishappenings, they do not come back to the routine life if they do not have the sense of self-realisation. They are extremely faithful in carrying out their duties. They make an impression that they are proud and they lose temper quickly.

Description of Hand and Lines

The subject has got a square shape of hand which is practical in nature. It has long fingers which are of mixed type. The thumb is long with highly developed logical portion and strong will-power. The subject will keep on changing his ideas and plans. The way they think will not materialise which will cause frustration and desperation in life. The subject has got a broad Heart Line travelling to the Mount of Jupiter and which ends with a fine fork. According to my opinion it is not a fine line because it shows tendencies of having over-ambitions which the subject does not deserve in fact. Taking up the issue of Head Line, it starts from Mount of Jupiter, travelling over the palm in a deep and fine manner and ends on the Mount of Mars Second. This provides a remarkable sense of planning and a strength and stamina to cultivate the plans. While detailing the relationship between Heart and Head lines, I am positively

not in favour of the relationship of these two lines as the subject will do utmost to meet the desires but, his ambitions will not be materialised which further adds frustration in subject's life. The Life Line is long and starts with a chain and runs all the way in a fine and deep manner. This indicates that though the life is long it will be full of tensions. The Fate Line takes its start from the Life Line which is very prominent. It shows that the subject will have a self-made career though there is another line of Fate which starts from the Mount of Moon. This reveals that the subject basically belongs to a rich family and will not continue the traditional profession.

My Opinion and Suggestions

The characteristics of date of birth and description of hand differ at lot of points. The possessor according to date of birth is ambitious, creative, and has a unique kind of strength and stamina to contribute to make his plans successful. These are qualities which are blessed by the date of birth but the hand reveals different explanation. In spite of the fact that the hand corresponds well with date of birth, the thumb of the subject is not supporting. Although the thumb has highly logical tendencies it has a weak and flexible will-power. It will give him frustration to his life. As a result he will enter into a life of pessimistic thinking which will prevent from making use of a lot of opportunities and at the same time his bad temperament, will create enemies which further damage the career of the subject.

If the subject controls the temperament and frustration in life which can lead into unhealthy life, he can make a life of peace and success. He must be careful where the opposite sex is concerned as he has all the chances to get bitter kind of betrayal. He must control himself with the good logic which is blessed on him, if he is to get success in life.

Subject born on the 14th day of the month with Mixed type of hand

People born on the 14th day of the month are influenced by the planet of Mercury which indicates business. The possessor of this date of birth is friendly by nature, and mostly gets along well with the people they come across. They are quick in

thought, decision, actions but the worst part is that they got easily excited. They have a very keen sense of making money and that too in a quick manner. They are born as speculators. They love business like stock exchange, transactions and generally are ready to invest money and take maximum risk in the matters which concern money. If they have weak will-power they will get themselves involved in gambling, racing, cards etc. They are most moulding type of characters. Being extremists they become victim of surroundings and they become the sufferers of worst kind of nervous tensions and breakdowns. They are short-tempered also.

The influence of number one also contributes to this character. They are ambitious, creative, individuals and most liberal where the thinking is concerned.

Description of Hand and Lines

The subject has got a hand which is slightly towards lengthy side and is broad as well. The person has got a medium size of fingers with finger of Sun longer than the finger of Jupiter which in most cases are equal in size. The subject has got a long thumb with highly logical tendencies and strong will-power. The possessor of this hand has got a fine and deep line of Heart which is too short in length and abruptly stops under the Finger of Saturn. This gives highly cautious tendencies to the possessor and the Mars makes the subject face many kinds of problems which the date of birth carries like gambling, of all kind because the line of Heart does not give high ambitions to the subject. The Head Line of the subject is deep and fine and also is short. It travels, and lands facing the Mount of Moon in the centre of palm. This reveals that the subject is not of very intellectual kind and plans with cautions and cares. Subject's Fate Line is missing altogether and the faint line of Sun indicates that the subject will lead a life of average kind and will not get success of any distinguished quality. The Life Line is deep and fine and long which indicates that life will be long and healthy. Coming to the Mounts, the Mount of Mars is well developed.

My Opinion and Suggestions

From the characteristics of date of birth and description of hand-lines, the readers must have realised that, the subject

has got a very prominent will-power with highly logical tendencies, it fails to get a support from Heart Line which provides ambitions and proper thinking. The subject is not having proper guidance from these two lines which plays vital role in one's life. I simply form an opinion regarding this subject that even from simple living he will be contented. He will not be having high ambitions and desires for which his mind would not work. The Life Line shows that he will lead life of contentment and satisfaction which will make his life smooth and free from frustration and desperation. My best suggestion to this subject is that it is not only money that makes life because money cannot buy anything like peace and contentment, with which he is blessed. He must control his temperament with the help of his logic and will-power.

Subject born on the 15th day of the month with Practical type of hand

People born on the 15th of the month are influenced by the planet of Venus, which is known as God of Love. Number 15 will combine of 1 and 5, which makes 6 as one digit. These people have a magnetic power to attract others. They are loved by others, rather worshipped by others who work under them. They are very determined in carrying out their duties. They are the slaves of whom they love. They are highly romantic and ideal masters of love. They love beautiful homes and would like to live in artistic surroundings. They are fond of rich colours and painting, and love music of soft kind. If rich, they are most generous to art and artists. They love to entertain friends and they are known as best hosts. They make everyone around them happy and they cannot stand any kind of jealousy, hatred and they discard such like people.

If by chance they lose their temper they find it difficult to suppress it. These persons have a greater sense of responsibility towards their duties. They are influenced by number 1 also which is known for its determination and they are definite in their views.

Description of Hand and Lines

The subject of this date of birth is having a practical type of hand which is square in shape with long fingers. This gives

imaginative touch. Subject has got a very small thumb which shows timid character with no high will-power and has got a flexible will-power. The subject has got broad Heart Line which lies on the upper portion of the thumb which is not deep and lies on the surface only and stops on the Mount of Jupiter. It shows that the subject has got high ambitions for which he hardly fits. He makes castles in the air. Coming down to the Head it is deep and fine making a fine curve under the Mount of Jupiter. It travels across the palm and lands gently on the Mount of Moon covering the major portion of the Mount. The best quality of this Head Line is that the Head Line will control and regulate a lot of planning and desires of the subject. The hand has got a fine Fate Line which turns and travels from the Mount of Moon and lands into Mount of Saturn, which is fine and deep in form. It shows that the subject will be successful in profession like writers, lawyers, actors where the public liking is the cause of bright future. The subject's Sun Line indicates success in life which appears only from the line of Heart and the success in life is late in life. Mount of Venus is well developed which indicates subject's inclination towards opposite sex.

My Opinion and Suggestions

After the description of hand and date of birth, I form a firm opinion that the hand is under the influence of date of birth. The Heart Line with high ambitions is well supported by the line of Head where the subject controls all the emotional feelings and saves the life from the miserable end. The Mount of Venus gives the instinct of romance and desire for opposite sex, but in an ideal manner. The subject's love and emotional feelings will be only for mental satisfaction and not for physical pleasure. My best suggestion to my readers in such a case is that he must control his ambitions which he does not deserve and such mis-happening will make him little frustrated when the proper success is not achieved. They must concentrate on their profession on artistic lines which they are destined for and their body and mind is made to suit such like environments.

Subject born on the 16th day of the month with a Mixed type of hand

The people born on the 16th day of the month are under the

influence of Moon which gives high imagination and is a planet for independence, originality and having a strong mark of individuality.

Number 16 will combine 1 and 6 which makes 7 as one digit. They are born restless in nature. They love changes and travel a lot. If rich they visit countries and become interested in far lands. They have a general knowledge of world at large. They often become extremely good writers, painters, poets. They have a psychological outlook in their work. As a class they care little about materialistic things of life and they become rich by original ideas. They become masters of business and in the last stage they donate their wealth for charities and they love to make shrines and temples as they have very great spiritual outlook in their life. The woman of this number is generally happily married because they mostly seek the security of future. They have very peculiar ideas where religion is concerned which is mainly based on their imagination and their religion is more of spiritual kind.

They have a remarkable gift with highly intuitional power and which are of spiritual kind. They get easily influenced by others.

Description of Hand and Lines

The subject is having a hand which is more towards lengthy side than the width. This makes the hand mixed in type, with long fingers which are also mixed in nature. Subject's thumb is fairly long with high logical tendencies and strong will-power. The subject has got a fine and deep heart line which lies on the upper portion of the palm and stops under the finger of Saturn. It indicates the subject is fairly cautious, though ambitious. Coming down to the Head Line it is very deep and fine starting from the base of the Mount of Jupiter running across the palm and lands on the Mount of Mars First. About the combination of Head and Heart Lines I definitely will say that it is a fine combination. The brain line controls the Heart Line which provides caution also. The subject is not dominated by the ambitions and desires which are well controlled by Head Line. The Fate Line is faint in appearance which has a remarkable impact on the subject and denotes that the subject belongs to a good family. Though the line is not prominent I will call it an average type of hand. The Sun

Line is absent altogether from the hand. Coming to the line of Life, it is deep and fine, indicating that the subject's life will be long and healthy. Then about the Mounts, all the Mounts are silent excepting the Mount of Venus which stands for love. This indicates that the subject is emotional in nature, but controls well emotions and feelings with strong logic and will-power.

My Opinion and Suggestions

Characteristics of date of birth and hand description co-ordinate well and I will call it a fine combination. According to the date of birth's influence the subject will get into the line which basically is more towards imaginative side. Mount of Moon indicates lot of travelling which the date of birth confirms well. The subject indeed being very highly logical will feel more happy only if people and places are according to the way they desire. The subject is sensitive in nature where the will-power might assist for betterment. According to my suggestion the subject will lead a very contented life but will have temperament which is not permanent. The subject will keep things to himself which will affect health. Considering this point of view my best suggestion to the subject is to take proper assistance from logic and will-power where he will be benefited, otherwise the hand is of an average kind, steady and fine.

Subject born on the 17th day of the month with Imaginative type of hand

The people born on the 17th day of the month are influenced by the planet of Saturn which is an important Mount under the finger of Saturn. This is the longest finger of the hand. These people are extremists in any kind of profession, business or service they take up. They would always like to do things in the best way and manner. They always appear cold, but infact they are the warmest kind. This date of birth has peculiar kind of characteristics and the people under the influence of this planet often hide their feelings and make others guess what they think and like. Because of this reason these people are much misunderstood in their life. They become very lonely and feel

isolated at heart. They have deep and steady nature and their strong individuality makes them either great success or a worst kind of failure. They never fall in between. They usually become the instrument of fate of others. If ambitious they hold high positions in government and they offer the greatest sense of sacrifice from their part. Number 17 people are either greatest successful materialistic characters or they turn out to be highly spiritual soles. And it is the world which makes them to be any one of the above mentioned.

Description of Hand and Lines

The hand appears longer and less broader, makes the hand imaginary in type. The subject is having long fingers of mixed type with finger of Sun longer than the Finger of Jupiter which in most cases are equal in size. Subject is having medium size of thumb with highly developed logical portion and stiff and strong will-power. The Line of Heart lies close to the upper Mount of Palm, travels in a deep and fine form, splits under the Mount of Saturn in the shape of fork and the trunk line travels into the Mount of Jupiter, indicating that the subject is highly ambitious. There are a couple of lines dropping from the line of Heart which indicates that the subject will have betrays of certain kind about which I will talk at the later stage.

The line of Head is in a most ideal form which runs in a deep and fine manner making a fine arc, lands on the Mount of Moon further gives highest imaginary character to the subject. The relationship in between the line of Head and Heart is ideal while so co-ordinating, I will not hesitate to say that the Line of Head controls the Heart which gives ambitions and desires. Line of Fate is fine and deep and covers the entire respective place of the palm and is well spotted by the Line of Sun and both run parallel to each other, indicates that the subject's success is not steady, but it will be beyond expectations. The line of Life is deep and fine and gives the subject a long and healthy life. The subject is having well developed Mount of Sun well spotted by the Sun finger and its trend is towards the Mount of Mercury, assuring success in business. The well developed Mount of Venus shows the affection and sincerity of subject's heart.

My Opinion and Suggestions

While describing the palm and explaining the date of birth

I will admit that the subject has good collaboration of hand which gives desirable health to the influence of date of birth. In spite of the fact that the subject has his own ways and means to carry out his plans he will not damage anyone but certain innocent part played in business will create damages to the subject's financial aspect. As the date of birth is having good spot in No. 17 so is the co-operation given by the logic and will power. Being an imaginary type of hand the tendencies is further developed by the line of Head which drops from the Mount of Moon, makes the subject further imaginary in type. But it gives remarkable intellectual tendencies too. As the subject is overambitious than achievements, I would like to advice the subject on two major points, i.e., to keep balance between ambitions and life and while in business see the companions are sincere or not, otherwise he should be bold enough to face the ugly situation and facts of life.

Subject born on the 18th day of the month with Mixed type of hand

The people born on this date are influenced by the planet of Mars which is known for its aggressiveness and is the indication of fighting nature. These people are fighters and whatsoever the career or service they enter in, they will do their utmost to exercise their ability for the success of the cause and for this reason they put up their best attempts to achieve the goal. Their earlier part of life is full of difficulties but in the end they will mostly be successful because of their strong will-power and individual character. They are very hasty in temperament, highly impulsive, having great desire of independence and they desire to be the master of their own will and ways. While dominating in life which is their great desire they make enemies and opponents. They are very courageous, excellent leaders, high officers and are great commanders. They are best suited for positions which need great courage. They fight till the last drop of their blood and if fate favours them such are the ones who get highest awards and rewards. They are inclined towards accidents from fire explosions and they rarely get through in life without such an injury. Their domestic life is not peaceful and they never get along well with their relations and they lead tensed family life.

Description of Hand and Lines

The hand is more towards length side and less towards the width. This makes it mixed in type. The subject is having medium size of fingers and a long thumb with high logical tendencies and stiff and strong will-power. The thumb indicates that he is stubborn in nature and because of this the subject is bound to lose a lot of opportunities if miscalculation is done. The hand has fine and deep Heart Line which runs into the Mount of Jupiter provides high ambitions to his life. Coming down to the line of Head, it travels in a most majestic manner keeping a fine gap from the line of Life and then enters into the Mount of Mars Second. The start of the Head Line also from the Mount of Jupiter, further confirms that the subject not only desires high but plans also accordingly. The relationship between Head Line and Heart Line is good and provides the best efforts to fight out the issue as the subject has got a well developed Mount of Mars First which gives vigour and vitality alongwith stamina to the subject's life.

Coming down to the Fate Line which is also very deep and fine, makes its start from the Mount of Moon and travels at its respective place. It has got a fine support of the Sun Line though late in life, i.e. after 35 years. The possessor has got a very fine Life Line which indicates the long life. Mount of Mars First is well developed and Mount of Venus is also developed.

My Opinion and Suggestions

According to the description of palm and date of birth I must admit that both of them correspond well to each other. The subject is very aggressive in actions and the Mount of Mars' influence on the date of birth and palm is most prominent. The subject's short temperament will create many problems and enemies and he will have to face them. While the hand is blessed with success, his short temperament will invite him failures. The strong and stiff nature will be a cause of all his success. He once undertakes the job, will not leave it unfinished. Before I close, my best suggestion to the subject is to control his short temperament and stubborn nature with the help of his strong logic and will-power. Then he will be able to lead a steady and peaceful life.

Subject born on the 19th day of the month with a Mixed type of hand

The people born on the 19th day of the month are influenced by Saturn and Mars. Number 19 will combine 1 and 9 which makes number ten. We again add 1+0 and get 1 as single digit as 0 is silent here. This hand which I am presenting is more influenced by number one. They are highly creative, have great individuality, positive view points and are inventive and definite for actions. Moreover they are obstinate and determined in all they as individuals undertake. The people born under the influence of this number do not like restraint and they mostly are supported with highly logical tendencies and strong will-power which help them carry out their views and plans in a most definite way. This number is very fortunate provided they control their temperament and violence which is also represented well in their life. In ordinary life they donate energy, ambitions, leadership which represents iron will-power as they are influenced by Mars. If once any kind of thing is started by them they always would like to accomplish and complete it and believe not in leaving things in between. The influence of this number is considered to be a lucky one provided he does not desire a life of busy type. They should control their temperament and nature which makes enemies and opponents.

Description of Hand and Lines

The person is having a hand which is slightly towards length side than width which makes the hand mixed in type. The subject is having a medium size of fingers and they are also of mixed nature. The thumb is fairly long with well developed logical portion and strong will-power portion. The line of Heart is deep and fine and lies at an ideal place and stops on the Mount of Jupiter making the subject highly ambitious. Coming down to the line of Head that too is a very fine and deep line covering the major portion of the palm and then lands majestically in between the Mount of Mars Second and Moon. It is very ideal line which gives perfect planning which are well controlled by actions and thoughts. Considering the relationship between Heart Line and Head Line I positively

will say that it is a real kind of relationship which seldom a palmist comes across. Both the lines are so well related to each other that the subject's ambitions are ideal, supported well by their other fine logic.

The Life Line starts from Life Line and covers the entire respective portion travelling in a most deep and fine manner. It runs in between the finger of Jupiter and Saturn. It indicates that the subject is a self-made person and will achieve success steadily in life. He becomes very successful after gaining a lot of experience which my readers can make out from the fine Sun Line that covers its respective portion in a fine and deep manner. The Life Line is long and gives a healthy life to the possessor. Concerning Mounts, Mounts of Jupiter, Mercury and Mars are well developed. The presence of Mars First on such a hand contributes strength to fight for the purposes.

My Opinion and Suggestions

Dear readers, after reading the description of palm and characteristics of date of birth you yourselves must have understood that the combination of date of birth and palm is so ideal that I would only like to say that such like combinations are rare in life and those who are born under the influence of this date in that fine manner are one of the rare kinds whom one seldom comes across and they need no suggestion for any changes.

Subject born on the 20th day of the month with Imaginative type of hand

The people born on the 20th day of the month are influenced by Moon which gives highest imaginations to the possessor. He is of feminine nature, means most innocent in thought and action. These people are gentle by nature. They are artistic and they admire art of any kind right from photography, painting, sketching, writing, acting where they can use their rich imaginations and they are most inventive. They lack the ability to carry out their ideas because their qualities lie more mentally and less physically. In very rare cases they are strong physically also. They are highly sensitive and they must guard themselves against restlessness. They feel most unsettled and they lack continuity in their plans and ideas and they also lack self-confidence. They become despondent, dejected and they are requested to be in healthy surroundings and companies because

their mind mostly seeks mental pleasures than physical pleasures.

Description of Hand and Lines

The subject's hand is more towards length side which makes it imaginative in type. The hand possesses long fingers of mixed type with the finger of Mercury tilting towards the finger of Sun which shows subject's success in life. The possessor has got a thumb of medium size with high logical tendencies and on the thumb there is a ring which speaks out the truth of my statement that the subject possesses great logic and will-power. It has got very brief lines which are very rare on imaginative type of hands. The Heart Line of the subject is broad in shape, runs in between the fingers of Jupiter and Saturn making the subject ambitious but with cautions. There is a small line dropping under the finger of Saturn which compels me to say that the subject will be betrayed in life emotionally. Under the finger of Mercury you can see a number of lines attached to on marriage and emotional lines. Coming down to the line of Head, it also travels at its own respective place and while making start it is chained and broad but after the middle part it runs in a fine and deep manner and lands ideally on the Mount of Moon which shows that till middle age subject was ignorant regarding the aims and mottos of life but, after middle age subject realised his responsibility and planned well and achieved in life. Where the relationship of the Head and Heart Lines are concerned, I will only say that till middle age subject was overpowered by heart. It means that he was over-ambitious and achievements was not there as there was no proper planning and the subject lived a life of confusion. The line of Life shows that the subject had two professions in life. The Sun Line indicates the subject's success in life from the age of 35 onwards and he becomes fairly successful in service or in business. Mounts are well developed but Mounts of Mercury and Jupiter are exceptionally marked.

My Opinion and Suggestions

Considering the date of birth and characteristics of palm I firmly say that the subject will make revolutionary changes only after the middle age. The early part of his life is under the

influence of date of birth and is full of struggles because of over-ambitious nature, lack of proper planning, lack of continuity etc. Since the subject is having a very fine logic and will-power he will become extremely successful after middle age. Even then he remains very sensitive and short tempered which is clear from the Mount of Mars First. It will not make the subject enter into a life of contention inspite of the fact that the subject might make remarkable progress in life. I close with my suggestion that the subject can lead a life, healthy and happy only kind by controlling his temperament and sensitiveness and by taking full advantage of his strong logic and will-power.

Subject born on the 21st day of the month with Imaginative type of hand

The people born on the 21st day of the month are influenced by Moon and Sun, means they are Imaginative. Because of their rich imagination, if born fortunate, they make big success. Number 21 will combine 2 and 1 which makes number 3 as a single digit. Number 3 is Influenced by the Jupiter planet. We should not ignore the Mount of Jupiter also. They are highly ambitious and they love to rise. They are interested to have control and authority over others. Their basic Inclination is to become the head of organisations and lead the team as great commanders. They have discipline in all matters and they obey and make others obey. They are faithful in carrying out their duties.

Their biggest fault lies in the fact that they have dictatorial tendencies and like to lay down their laws. They always insist in their plans and ideas. Because of this nature they make opponents and enemies. Being serious in nature they are quiet and because of their high imagination they often become absentminded and look proud whereas at heart they are not proud. They always are interested to oblige others and avoid taking any kind of obligation from anyone.

Description of Hand and Lines

The hand is more towards length side and comparatively narrow towards width side and hence imaginative in nature. The subject has got medium kind of fingers of mixed nature

and is fairly proportionate to each other. Coming down to the thumb it is an ideal portion of the palm because of its high logical tendencies and, the strong will-power, at times becomes flexible because of adverse circumstances. On the logical portion of the thumb the subject has got an extra line which gives further strength to subject's will-power. The line of Heart which is broad in shape lies at an ideal place and runs majestically and stops at the Mount of Jupiter, giving the person highly ambitious nature. The Head Line makes its gentle start from the close of Jupiter Mount, travelling in a broad manner, lands at the Mounts of Mars First giving the subject proper planning and smooth thinking. The relationship between Heart and Head Lines is ideal and I will say that the Heart is overruled by the Head compelling the subject to avoid complications that can be formed by the improper use of brain.

There are a number of Fate Lines appearing from the centre of palm which are well supported by the Sun line. This indicates that the possessor will never look down and feel scarcity of finances or any kind of reasonable work. Coming down to the Line of Life, it is fairly long. It shows that the subject will live a long life, but with delicate kind of health. About Mounts, the Mount of Moon and Venus are well supported by the Mount of Sun. The possessor is imaginative because of Moon's influence and must avoid lonely life because there are chances of turning into a pessimist.

Opinion and Suggestions

After the description of hand and characteristics of date of birth I will say that these two are opposite whereas certain matters and manner are concerned. While considering the date of birth I am sure that the people born under the influence, the 21st day are mostly restless and face the matters in a bold manner. They fight out the issue till the last moment. The subject has got high imaginations. He is mentally rich. But for self-purpose subject has pessimistic nature and I will definitely suggest that because of these fine qualities he will confuse intelligence for self-purpose and try to maintain health and avoid pessimistic ways of thought. With this habit, the subject will remain happy and healthy.

Subject born on the 22nd day of the month with Imaginative type of hand

The people born on the 22nd day of the month are influenced by Moon which gives high imaginative kind of tendencies to the subject. Number 22 will combine—2 and 2 and makes 4 as one digit. Dear readers! it is a very peculiar number for explanation where the characterisation is concerned. As you know that the person influenced by Moon is highly imaginative in nature, artistic, romantic, gentle and is not forceful in carrying out his plans, because qualities are more mental than physical. They are seldom strong physically. They are mostly restless and feel unsettled and lack continuity in their plans and ideas and are over-sensitive in nature. Because of such habits the possessor mostly loses self-confidence also.

Now in the case of number 22 there is a double 2 and when we add these, it becomes number 4. In my opinion it is not an ideal combination because they turn out to be highly pessimistic in type and nature which brings a lot of desperation and frustration into their life. In spite of the fact that they are gentle by nature, they have lot of secret enemies. Because of this worldly attitude towards them they sometimes become rebellious. They are easily wounded and are inclined to feel lonely and isolated and they become desperate if they do not get success.

Description of Hand and Lines

The hand is more towards length side and less towards width side. It is also bony in appearance which makes it imaginative in nature. The possessor is having long fingers of which Sun finger is comparatively longer. It means that the subject will get success, but late in life as Sun Line appears late in life. The thumb is very long with logical and will portions comparatively equal. Such a sign is very peculiar in such like bony thumb. It makes the subject confused in action and proper logical attitude. Coming down to the lines in the palm they are brief but important. The line of Heart lies low and is broad and runs in between the finger of Saturn. Chain-like formation shows the tendencies of financial and emotional betrayals to the subject in spite of the fact that the person is cautious always.

The line of Head travels in a gentle way on the Mount of Mars and is also chained, though deep in form. The line is not in collaboration to the line of Heart because both the lines are chained which make the subject a confused like character in this materialistic world. Both the chained lines confirm the gentleness and innocent attitude toward world but in one turn he gets betrayals as rewards. There is a fine Fate Line which is a clear sign of his earnings from family background. From the line of Head there starts another line that is a clear indication that subject will change profession after 35 years of age. The Mount of Venus is well-developed on the palm and lies as a cliff on the palm and shows that he is a passionate type where the opposite sex is concerned.

Opinion and Suggestions

After the description of date of birth and hand, the readers must have realised that it is not a healthy combination. The will-power is weak but I have seen a number of cases where the persons have strong will-power. The subject has got no self-control to repair the damages, but will create further problems in life because of flexible will-power. Where the money matters are concerned the subject being ambitious may feel shortage of money. Otherwise there is no problem as he belongs to a good family background. The person will spend money lavishly which is clear from the Mount of Venus. They are very weak where the opposite sex is concerned. I would not like to give any suggestion to them as they are not obedient and good listeners. The only thing I can do is to pray for their happy and peaceful life.

Subject born on the 23rd day of a month with a Mixed type of hand

Subjects born on the 23rd day of the month are influenced by the Mercury planet which stands for materialistic gains and business. The people born in this day are friendly in nature. They are quick in thoughts, action and decisions, but they get easily excited. It combines 2 and 3 which makes 5 as one digit. Before I proceed further I would like to make it clear to my readers that number 2 gives high imaginations, creativeness, inventiveness and are most gentle by nature. The characteri-

sation of number 3 which is under Jupiter planet is known for high ambitions and is of aggressive nature. Such are the people who would like to rise high and who would like to have authority over others. They have great tendencies to become commanders and are extremely faithful in carrying out their duties. They often rise to high positions in any profession or service they are in, provided they are destined for.

Their only fault is that they have dictatorial instincts and are always interested in getting things done the way they want and if any kind of resentment is there they always become quarrelsome and make enemies. They have a keen sense of making money quickly and because of their strong imaginative power they take their own course and take any kind of risks in money matters. There are chances of their getting into stock exchange transaction and if they have weak will-power they even pass to the extreme of gambling.

Description of Hand and Lines

The hand is slightly towards length side and less towards width side. It is narrow on top of the palm and broader on the base of the palm, making it mixed in type. The subject is having fingers of medium size with finger of Sun longer. The subject is having long thumb with extremely good logical tendencies as I would like to draw attention of my readers towards this particular portion where you will find many fine lines. Whereas will-power of the thumb is concerned it is flexible in nature, but only at times and mainly because of circumstances. The possessor of the hand is having many lines in the palm out of which certain lines play vital and important role, like Heart and Head Lines. The Heart Line is deep and fine and runs at an ideal place and stops at the Mount of Jupiter, giving high ambitions and desires to the subject. Under the line of Heart, the line of Head is well connected with a line joining the both lines. The line of Head is fine and deep and makes its start from the Mount of Jupiter and runs on the palm, covers and lands at the Mount of Moon in an ideal manner. The relationship in between these lines is cordial though at times there would be conflict between desires and planning. There are chances for the subject to lose time while making plans. The Fate Line is ideal and starts from the Mount of Moon and runs of its respective place. This indicates

that the subject will never have to look down for money matters. The Life Line is long and double and is a fine example of double life Line, means the subject will have long and healthy life. Mounts of Jupiter and Mercury are well developed.

Opinion and Suggestions

From the explanation of date of birth and hand it can be said that the co-ordination between them is well balanced and ideal. Because of fine logic, and initiative, drive and aggressiveness the subject is going to make success in life which will bring a good name which my readers can understand from the ring of Jupiter which is in the Mount of Jupiter. The only drawback of the hand is the flexibility in action and temperamental attitude which will create problems. The line in between the Head and Heart Lines will make the subject take time in taking decisions. My best suggestion to the subject is to make full advantage from the great logic power which will guide him to live a happy and carefree kind of life.

Subject born on the 24th day of the month with Imaginative type of hand

The people born on the 24th day of the month are influenced by the planet of Venus which is the God of Love. Number 24 will combine 2 and 4 which makes 6 as one digit. They are blessed with power to attract others. These people have striking personalities and have great attraction for opposite sex. They are loved by others, rather worshipped by others who work under them. They are gentle in nature and are determined in carrying out their duties. They are romantic and are ideal in the matters of love. They love beautiful things, artistic homes and are fond of rich colours. If rich they are generous to art and artists and they are known as best hosts as they believe in entertaining their friends and make everyone happy around them. The one thing they cannot stand is jealousy and hatred instincts in nature. When aroused by anger they cannot stand any opposition and will fight to death for whatever person or cause they are standing for. They have very keen sense of their duty. They are very fast in making friends. Because of their rich imagination they can get into the profes-

sion like writing, painting, acting or that which concerns their rich imaginatious or artistic instinct.

Description of Hand and Lines

The possessor is having a hand more towards length side and narrow towards width side making the hand imaginative in kind. The subject is having fingers of medium size which are square in shape. The thumb is mdeium in size with highly logical tendencies, but weak will-power which is flexible also.

Considering the lines of palm there are too many lines which are confusing and still certain lines cannot be ignored. Starting from line of Heart, it is deep and fine, lies on the lower part of the palm and stops at the Mount of Saturn. This makes the subject careful and cautious. The line of Head is starting from Mount of Jupiter, runs in a fine and deep form, stops at the Mount of Mars with a very significant break under the Mount of Saturn which gives caution and precaution to the subject for certain mental tensions and I ask him to remain careful because of this break which indicates danger. The line of Life is quite long and is well supported by supporting Life Line. The line of Fate is running with a downward course which means that the subject will have very wealthy life whereas money matters are concerned. The possessor will never feel shortage of money. The line which starts from the Mount of Moon is extremely important as the subject may get into the profession of public choice like good writer or good actors. Considering the Mounts, the hand has well-developed Mercury and Jupiter Mounts, means that the subject will have remarkable success in life.

Opinion and Suggestions

Considering the description of hand and palm I will definitely say that it is an ideal combination of date of birth and type of palm. The type is a clear cut picture of emotional and romantic feelings of magnetic and ideal love matters. The possessor will have great logical instinct which will bring name and fame in the subject's career. My readers can spot this from the well-developed Mounts of Mercury and Jupiter which show the subject's success in it because of powerful thinking

and materialistic gains from the fine Fate Line. Considering the Mount of Mars it is very clear that subject will have irritating nature and will develop short temperament and in turn, will make a lot of opposition and enemies. Subject is cautioned from going near to water which is a big danger to life which altogether overrules the possibility of long life. My best suggestion to subject is to develop a strong will-power from his nature so that whatsoever the subject undertakes will be a great success.

Subject born on the 25th day of the month with Square type of hand

The people born on the 25th day of the month are influenced by Moon. It will combine 2 and 5 which makes number 7 as one single digit. These people are very independent in thoughts, Original in Ideas and have strong mark of individuality. They are highly imaginative and creative as well. At heart they love changes and have restless kind of nature. If rich they visit countries across sea because of their changing nature. They become interested in far lands and they have a general knowledge of world at large.

They often become good writers, painters and poets. They have a psychological outlook in their work. As a class they care very little about materialistic things of life, still they often become rich by their original ideas and methods of business. They are more inclined to give their wealth as charities in their last days. The woman of this class is generally happily married after giving the proper thought. They are very careful regarding the future because they need the greatest security in life. While doing so they often lose time and sometimes marry very late in life. They have good ideas about business concerning shipping, like cargo transportation, as their views and ideas are confined to seas and far lands. Hence, they get inclined to such like business. They have peculiar idea of business and religion and mostly they have their own kind of religion. They are remarkably gifted with intuitive guessing.

Description of Hand and Lines

The subject is having a Square type of hand which is pr in nature having medium sized fingers which are also

tipped. The subject is having a thumb which is very impressive and has the greatest logical tendencies and strong will-power. The subject is having brief lines on the hand which are very important as they are the main lines on the palm. The line of Heart lies low in a deep and fine manner and stops under the Mount of Saturn. This gives remarkable precaution to the subject. Since the trend of the line is towards the Mount of Jupiter I will not hesitate to say that the subject is gifted with high ambitions. Coming down to the line of Head which makes its start close from the Mount of Jupiter runs in a most deep and fine form, lands on the Mount of Mars Second and has a very fine co-ordination with the line of Heart. The relationship between both lines is very impressive and it is an exemplary kind of co-ordination as all the desires and ambitions are well controlled by planning and thoughts. About the line of Fate, it is very fine but it is not continuous but has a break at the line of Head from where it immediately makes its start towards Mount of Saturn in an impressive way with line of Sun which is well supported. The line of Fate is starting from the Mount of Moon. This is an indication that the subject is from a family of good reputation and rich background. The presence of fresh lines from the line of Head is an indication that the subject is going to enter into a fresh business which will be of personal choice after the age of 35. The line of Life is well developed and indicates that he will have a long and healthy life.

Opinion and Suggestions

After the description of lines and date of birth I will not hesitate to say that it is fine co-ordination and combination of both the lines and date of birth. Because of this virtue and other qualities he is going to make fantastic success in life. The person is creative and imaginative and also is practical.

My readers are requested to see the imaginative sign on the palm and the finger of Mercury which is longer than usual size. It further confirms that the person will be a success in business. In spite of all the virtues and good nature, the presence of Mount of Mars gives the subject exciting type of nature which at times will bring frustration and desperation in life. But this is of minor importance because the subject is not only intellectual but is also intelligent enough

to control his nature. According to my opinion this is a hand of above average kind suited to live successfully in this 20th century.

Subject born on the 26th day of the month with Imaginative type of hand

The persons born on the 26th day of the month are influenced by Saturn planet which stands for materialistic gains. As far as my experience is concerned, I have my own different opinion regarding this special date. Number 26 will combine 2 and 6 which makes number 8 as single digit. People born on this day are extremists. They either attempt for success and go to the top or they never consider the option. They believe in actions. They often appear cool but they are the warmest kind. If once they are intimated they really show that in colours. The defect lies in the fact that they hide their feelings and make people guess what they like. This causes the biggest misunderstanding in their life and the people always see them from different angles. They are the most misunderstood characters. Because of this they feel lonely at heart and become secluded. They have a very contented nature and an individuality of their own. They usually become the instrument of fortunes for others.

People who are connected with them are always benefited and become most fortunate as 26 number people always extend their help to them. They are very sensitive and highly romantic which makes them sometimes suffer the biggest emotional setback. It is a fine combination of materialism and spiritualism but it all depends on the way they like and develop.

Description of Hand and Lines

The hand is more towards length side and makes the hand highly imaginative in type. The possessor is having long fingers with finger of Sun longer than finger of Jupiter which in common cases are equal in size. Fingers are pointed. This further gives the instinct of imagination to the subject. The subject is having long thumb which has high logical tendencies and a flexible will-power. The thumb is of a very unique kind as there is a forked line close to the base of thumb at the

place of logical portion. There is another ring-like line on the upper portion giving the subject intellectual capacities.

Coming to the lines of the palm there are a number of lines which are of equal importance. The line of Heart which lies on the upper portion of the palm covering almost all the Mounts which occupies the top portion of the palm, runs in a deep and fine manner, stops at the mount of Jupiter which is well developed and is an ideal Mount which gives highest ambitions rather over-ambitions to the subject. The line of Head also starts from the Mount of Mars First and the readers are requested to see the parallel line of Head which runs immediately under the main line and has great importance and shows the subject's highest intellectual capacity. The relationship between the Head and Heart Lines is very cordial and the line of Head controls the Heart very well and prevents the subject from becoming over-ambitious. The line of Fate is most prominent on the palm and at the same time you can see another parallel line starting from the Mount of Moon which also has great significance on the palm. It is well supported by the line of Sun as well. This means that the subject has got a long life. The Mounts of Jupiter and Mercury are well developed which indicates that the subjects will gain name in business. The Mount of Mars though gives vitality and vigour to fight well at the same time it gives bad temperament to the subject.

Opinion and suggestions

After my explanation of palm and its lines and characterisation of date of birth, I am of the opinion that the subject being highly imaginative has taken full advantage of his planning power and has made the full views of the lines possessed by him. Considering the ambitions of the subject which are rather more than achievements he is bound to feel not contented inspite of the fact that he has made fantastic prosperity and progress in life. According to my opinion the subject belongs to a family of status as the line of Fate, line of Sun and Mounts, all speak the truth of my statement. The best suggestion I can render to the subject is to keep the temperament well-controlled so that less opposition will create less problems. With this he can lead a life of glory and peace.

Subject born on the th 27 day of the month with Mixed type of hand

The people born on the 27th day of the month are influenced by Moon which stands for rich imaginations, creativeness, and high ambitions. These people are romantic and inventive.

They are born restless and unsettled. They lack continuity in their plans, if they do not have strong will-power. In such cases, if not in happy surroundings, they lose self confidence and become despondent and dejected. They do not have a moulding character and feel very isolated and lonely in life. This brings another characteristic and that is oversensitiveness in their life. Thus they become very serious. If they have strong will-power, then they are very independent, original and have a strong mark of individuality. As restlessness is a part of their nature, they love changes and visit too many countries if they are rich. They feel depressed if they are not rich. They are also business minded and that too with full of new and original ideas. People born on the 27th day of the month have no patience. They have bad temperament which makes enemies and oppositions that keep them troubling throughout life. Because of this they have to face problems and always feel further upset in life.

Description of Hand and Lines

I am presenting a hand, the photograph of which is taken with the view that the Mounts of hand should be seen in prominence for suitable explanation. The hand is more towards length side than width, making it mixed in nature.

The subject is having fingers of medium size which are also mixed in nature. The subject has got a long thumb with high logical tendencies and strong will-power. The hand has got brief lines which are of meaningful type. Subject's Heart Line is broad and lies on the surface which stops at the base of the finger of Saturn. This gives the subject a life full of caution and care. Head Line starts from the base of Mount of Jupiter makes a sudden slope, then breaks under the Mount of Saturn and from there it makes a fresh start. This indicates that the subject will be starting a fresh career after the age of 35. Subject will suffer from severe kind of headaches.

The Fate Line is deep and fine which runs and occupies the entire respective portion in a most majestic way. It is well-supported by the Sun line. This means that after middle age the subject will be a great success in the financial field. The Life Line is long and fine. Mental tensions, if at all, will affect the health, otherwise the health will be normal. Mount of Jupiter is most prominent with a good support from Mounts of Mercury and Sun. Mount of Mars First also cannot be ignored of their significance.

The date of birth and hand speak accordingly and the hand is not successful in changing the characteristics of date of birth.

The subject, in spite of the fact that he is having all the materialistic gains which my readers can make out from the fine Fate Line, is having all the social status which is clear from the well-developed Mount of Jupiter, will still feel restless and despondent in life. Seldom will be the occasions when the subject will feel happy and contented and that too will not be lasting. The subject has entered a life of serious nature right from the beginning and the time gap has made him very sensitive. The subject having fine logic and will-power which too fail to guide him to a happy life. The best advice I can render to this subject is to change the thinking habit to an optimistic kind which can do some good to him.

Subject born on the 28th day of the month with Mixed type of hand

The subject born on the 28th day of the month is influenced by the Moon and Saturn planets. Date 28 will combine 2 and 8 which make number 10. We again add 1+0 and get a single digit number 1 as 0 is silent. The subject is highly ambitious, creative, possesses drive and initiative. Alongwith all above mentioned qualities the subject owns the biggest power from strong and ideal imaginations. This means that the possessor takes advantage out of intelligence. i.e., planning. The subject is extremist and if once he decides to do any kind of job he never would leave it undone and will always see the result whether it is positive or negative. They mostly hide their feelings and never expose them to people concerned. While doing so, they are misunderstood in their lives and become the victim of their innocence. They feel very lonely and isolated. They look cold outwardly but infact they are the warmest kind.

In friendship they are the real kind of friends and for the sake of friendship they will sacrifice anything. They are either great success or great failures. They are not among the class who feel satisfied with small professions or subordinate jobs. During their lifetime their work or service is never recognised. Mostly they become known or get reward and appreciation after their death.

Description of Hand and Lines

The subject is having a hand little towards length side than width, making it maxed in nature. The fingers are of medium size and square shaped. The thumb is very long having a long logical portion with strong will-power.

The line of Heart is deep and fine, but with chains. It ends in a forked shape under the finger of Saturn facing towards the Mount of Jupiter making the subject highly ambitious and innocent in nature and will have many financial betrayals by friends and relatives in life.

The line of Head makes an ideal start, travels in a most deep and fine form and finally lands in a most majestic way on the Mount of Moon. The Head line gives best planning and ideas to the subject and overrules the heart in many ways.

The Fate Line is the clear indication of the subject being most fortunate. It starts from the Mount of Moon in a most deep and fine manner, travels and covers the entire respective portion indicating that the subject belongs to a respectable family. The Fate Line is supported by Sun Line. This also is a fine sign to possess. The Life Line is long and deep. It shows that the life is long with sound health. The hand is well developed where the Mounts are concerned. The Mounts of Mercury and Jupiter have special say on the hand—that the subject will be a success in business.

Opinion and Suggestions

After the explanation of date of birth and hand I can say that the coordination between both is ideal. Here the subject has got an ideal hand and he, after taking birth in a good family has not spoiled the fortune of the inherited blessings, but has added more name to the family.

The hand will make a turn to spiritualism at the later stage and will then have great contentment and peaceful life. This hand needs no suggestion and I pray that everybody should have such a fortunate hand which is only a dream in such a materialistic world.

Subject born on the 29th day of the month with Mixed type of hand

The subject born on the 29th day of the month is influenced by Moon and Mars. They indeed are opposite to each other, but the description of hand will reveal which out of the two is dominating the subject. The 29th day of birth will combine 2 and 9 make number 11. Then we add $1+1$ and get number 2 as a single digit. This means that the subject will be highly imaginative artistic, very inventive and mostly gentle by nature. The subjects with this number will not be forceful in carrying out the ideas and plans as they are mostly in the habit of putting up their plans for tomorrow, and we all know that there is another tomorrow. Because of this habit they miss a lot of opportunities in life. I will only be able to pass comment after studying the hand, whether Moon or Mars is dominating the subject. They are born restless, feel very unsettled and as mentioned earlier they lack continuity in their plans and ideas which makes them lose self confidence. They are born over-sensitive. That is why they get despondent and dejected in life.

Description of Hand and Lines

The subject is having a hand more towards length side than width, makes it mixed in type and shape. The subject is having medium size of fingers with mixed nature. The finger of Sun is comparatively longer than the finger of Jupiter which in most cases are equal in size. The thumb is of medium size with high logic and strong will-power. The lines of the palm are brief and meaningful. The Heart Line is deep and fine and lies at an ideal place and makes a fine fork under the Saturn Finger. While making the stop at this place it provides ambitions with cautions. The subject is having a very deep and fine Head Line which is in the centre of Mount of Jupiter and Mars First, travels in a fine manner and lands at the centre of Mars Second and Mount of Moon. The relationship between Heart

and Head Lines is very cordial and fine as such co-ordination is rare to be found. Through the logic and strong will-power the subject has made full control over ambitions and planning. The line of Fate is one of the most important and ideal line starting from the base of the palm and travels and lands in a most majestic way while covering the entire respective portion. The Fate Line is well supported by the line of Sun. Another significance of this line is a fresh line starting from the line of Head which indicates that the subject will gain prosperity after the age of 35. The hand is well developed where Mounts are concerned. Mount of Mercury, Venus and Moon are in prominence with Jupiter. The subject will have a long and healthy life.

My Opinion and Suggestions

I told earlier that the subject's date of birth is influenced by two planets and they are Moon and Mars. I promised my readers that I will come down to the controversy that out of the two planets which is more influencing the subject. I will not hesitate to say that the Moon is overruling the Mars which is only a supporting planet here. The subjects' planning is ideal, logic is high and to all of them will-power is the best support. Besides all these virtues and qualities the subject is blessed with fine fortune. He has proved to be very cautious which is the main quality of the hand. I do not want to pass any suggestion to this subject which will create conflict in the mind, as they are already on the ideal path and are blessed with prosperity in their life.

Subject born on the 30th day of the month with Mixed type of hand

The person born on the 30th day of the month is influenced by Jupiter planet. Jupiter is known for its name and fame. It is not necessary that people born under the influence of this planet should either become great politicians or industrialists, but they carry good name in any kind of circumstances they live and work in. As mentioned earlier that out of the 30 days in a month there are only 3 dates 10, 20 and 30 where zero is present. Zero is a silent number in numerological studies. The subject is highly ambitious and they are not satisfied by small

professions, whether in job or in business. Their desire is to rise and to have authority in all the jobs they undertake. They virtually become great commanders or leaders. They love discipline in all the matters. They obey and make others obey. They are extremely faithful in carrying out their duties.

The biggest fault in them is that sometimes they lay down their own laws and insist on implementing their own ideas and plans and for this reason they make enemies. They look proud and also tend to lose temper for small reasons but they are clear by heart.

Description of Hand and lines

The subject is having a hand which is slightly more towards length side and it makes the hand mixed in type. The hand has medium size of fingers with finger of Sun longer than finger of Jupiter which in common cases are equal in size. The fingers are square in shape. The thumb is of medium size with high logic and flexible will-power. The line of Heart lies at a most ideal place in a deep and fine form. It stops at the Mount of Jupiter. This gives great desires and ambitions to the subject. Coming down to the line of Head, which is deep but short in size, indicates that the subject does not have intelligence to plan well and because of this reason the ideas and planning do not co-ordinate well.

The relationship between both the lines i.e., the Head and Heart Lines is not ideal. In spite of the fact that the relationship between Heart and Head Lines is not good, the line of Fate is good and the subject will have good fortune where money matters are concerned. The subject will have a long life with sound health. The Mount of Mars First is quite in prominence and gives bad temperament to the subject as the achievements are not according to the desires.

Opinion and suggestions

After my explanation of hand and date of birth, I will not hesitate to say that it is not a fine combination where achievements are concerned. Subject's Heart Line overrules the Head Line. When the subject fails to plan well for achievements he gets frustrated and desperate in life. Coming down to the logic portion, though it is good, lacks good support in plants

due to flexibility in nature. I will call it a hand of above average kind where the money is concerned because in spite of the fact that he is not intelligent he will never feel shortage of money. I only suggest that the subject must develop will-power to match desires and ambitions.

Subject born on the 31st day of the month with Imaginative type of hand

People born on the 31st day of the month are influenced by Jupiter and Sun. It is an ideal combination where the planets are concerned. I will describe later after reading the palm that which out of the two planets is more dominating the subject. The combination of 3 and 1 makes 4 as one single digit. Number 4 is a pessimistic number. The subject is highly ambitious, creative and they have great mark of individuality. They are obstinate and are most determined for better results in all their undertakings. They have positive views, highly inventive and are most definite in actions. They hate restraints and if fortunate, they rise to the top positions of their occupations whether in service or in business. They virtually are liked by their subordinates. If by chance they are over ambitious and if the ambitions are not according to their desires they become revolutionary or pessimistic characters. In both cases they loose opportunities and good people. So they become highly sensitive and feel lonely and isolated. It make them lead a life of desperation and frustration.

Description of Hand and Lines

The hand is more towards length side than width side making it imaginative in shape and type. Subject is having medium size of fingers with finger of mercury tilting towards Sun finger, and Jupiter Finger bending towards finger of Saturn. This means that the subject will be a successful businessman and will make money in the trade or profession he belongs to. The subject has got a medium size of thumb with high logic but flexible will-power due to circumstances. The subject has got brief lines on the palm. The line of Heart lies at an ideal place, runs in a deep and fine form stops at the Mount of Jupiter making the subject highly ambitious and desirous. The line of

Head is also deep and fine but comparatively shorter in size. The direction of the Head Line is towards the Mount of Moon confirming the imaginative tendencies of the subject. The relationship between the Head and Heart Line is not cordial as the subject is highly ambitious. He will not be able to speculate and act well because of the Head Line which shows confusion and leads to flexibility in actions. The line of Fate is extremely deep and fine and covers its entire respective place. This indicates that the subject is still very fortunate in spite of certain bad elements, especially in money matters. The possessor of such a Fate Line will never go down for the sake of money. The subject has got a long Life Line with good health. Mount of Mars First is very prominent with Venus as its best support and Jupiter assisting the subject.

Opinion and Suggestions

After describing the date of birth and palm I will not hesitate to say that they do not correspond well to each other. The subject's high ambitions, desires, and wishes will not give peaceful life to the subject. Subject will make certain attempts, but because of certain restrictions the attempts will not bear the fruits. This will bring frustration to subject's life. It in turn brings pessimistic attitude towards life and deprives him of creativeness, drive and initiative. To avoid such a kind of life the subject must develop strong will-power to face this cruel world.
